## **Scripture and Interpretation** - Ariel Feldman 2014-11-10

The discovery of the Dead Sea Scrolls more than sixty years ago has revealed a wealth of literary compositions which rework the Hebrew Bible in various ways. This genre seems to have been a popular literary form in ancient Judaism literature. However, the Qumran texts of this type are particularly interesting for they offer for the first time a large sample of such compositions in their original languages, Hebrew and Aramaic. Since the rewritten Bible texts do not use the particular style and nomenclature specific to the literature produced by the Qumran community. Many of these texts are unknown from any other sources, and have been published only during the last two decades. They therefore became the object of intense scholarly study. However, most the attention has been directed to the longer specimens, such as the Hebrew Book of Jubilees and the Aramaic Genesis Apocryphon. The present volume addresses the less known and poorly studied pieces, a group of eleven small Hebrew texts that rework the Hebrew Bible. It provides fresh editions, translations and detailed commentaries for each one. The volume thus places these texts within the larger context of the Qumran library, aiming at completing the data about the rewritten Bible.

## *Biosorption for Wastewater Contaminants* - Pardeep Singh 2021-10-13

Pollution due to various anthropogenic activities continues to increase. In terms of water pollutants, organic and inorganic pollutants are the most problematic. Although several measures have been proposed and implemented to prevent or reduce contamination, their increased concentration in water bodies has created serious concerns. Over the years, the problem has been aggravated by industrialization, urbanization and the exploitation of natural resources. The direct discharge of wastewater contaminants and their geographical mobilization have caused an increase in concentration in ground, surface, fluvial and residual waters. Extensive information about detection and disposal methods is needed in order to develop technological solutions for a variety of environments, both urban and rural. This book provides up-to-date information on wastewater contaminants, aimed at researchers, engineers and technologists working in this field. Conventional physicochemical techniques used to remove contaminants from wastewater include ion exchange, precipitation, degradation, coagulation, coating, membrane processes and adsorption. However, these applications have technological and economic limitations, and involve the release of large amounts of chemical reagents and by-products that are themselves difficult to remove. Biosorption - the use of organically generated material as an adsorbent - is attracting new research and scholarship. Thermally-treated calcined biomaterials may be treated to remove heavy metals from wastewater. To ensure the elimination of these contaminants, existing solutions must be integrated with intelligent biosorption functions. Biosorption for Wastewater Contaminants will find an appreciative audience among academics and postgraduates working in the fields of environmental biotechnology, environmental engineering, wastewater treatment technology and environmental chemistry.

Their dangerous occupation keeps food on the table but constantly threatens to leave empty seats around it. To Cal, Alaska remains as mythical and mysterious as Treasure Island, and the stories his father returns with are as mesmerizing as those he once invented about Captain Flint before he turned pirate. But while Cal is too young to accompany his father, he is old enough to know that everything depends on the fate of those few boats thousands of miles to the north. He is also old enough to feel the tension between his parents over whether he will follow in his father's footsteps. And old enough to wonder about his mother's relationship with John Gaunt, owner of the fleet. Then Gaunt dies suddenly, leaving the business in the hands of his son, who seems intent on selling away the fishermen's livelihood. Soon Cal stumbles on evidence that his father may have taken extreme measures to salvage their way of life. As winter comes on, his suspicions deepening and his moral compass shattered, he is forced to make a terrible choice.

Denying Her Voice: The Figure of Miriam in Ancient Jewish Literature - Hanna K. Tervanotko 2016-09-12 Hanna Tervanotko first analyzes the treatment and development of Miriam as a literary character in ancient Jewish texts, taking into account all the references to this figure preserved in ancient Jewish literature from the exilic period to the early second century C.E.: Exodus 15:20-21; Deuteronomy 24:8-9; Numbers 12:1-15; 20:1; 26:59; 1 Chronicles 5:29; Micah 6:4, the Septuagint, the Dead Sea Scrolls (4Q365 6 II, 1-7; 4Q377 2 I, 9; 4Q543 1 I, 6 = 4Q545 1 I, 5; 4Q546 12, 4; 4Q547 4 I, 10; 4Q549 2, 8), Jubilees 47:4; Ezekiel the Tragedian 18; Demetrius Chronographer frag. 3; texts by Philo of Alexandria: De vita contemplativa 87; Legum allegoriae 1.76; 2.66-67; 3.103; De agricultura 80-81; Liber antiquitatum biblicarum 9:10; 20:8, and finally texts by Josephus: Antiquitates judaicae 2.221; 3.54; 3.105; 4.78. These texts demonstrate that the picture of Miriam preserved in the ancient Jewish texts is richer than the Hebrew Bible suggests. The results provide a contradictory image of Miriam. On the one hand she becomes a tool of Levitical politics, whereas on the other she continues to enjoy a freer role. People continued to interpret earlier literary traditions in light of new situations, and interpretations varied in different contexts. Second, in light of poststructuralist literary studies that treat texts as reflections of specific social situations, Tervanotko argues that the treatment of Miriam in ancient Jewish literature reflects mostly a reality in which women had little space as active agents. Despite the general tendency to allow women only little room, the references to Miriam suggest that at least some prominent women may have enjoyed occasional freedom.

Reforming Institutions in Water Resource Management - Lin Crase 2009

As water scarcities increase, nations throughout the world are in search of better institutions to manage water resources. India has been making substantial efforts to develop its water management systems since independence and significant increases in irrigated agriculture have taken place through both public and private initiatives. However, scarcities are increasing and major problems presently confront the management of water resources and irrigated agriculture. Resolving these problems is crucial for the future. The main purpose of this book is to provide a new approach for the analysis and design of water institutions that govern the use and development of water resources, particularly for agriculture which is the largest user. Drawing on the theory of New Institutional Economics and comparisons with Australia (as a developed country) and other less developed nations in Africa and Asia, the authors present original empirical data from three Indian states. Detailed analysis of these data is used to identify and recommend attributes and features of water management institutions that are conducive to effective resource management, its long-term success, and its best contribution to development.

**Khirbet Qeiyafa in the Shephelah** - Silvia Schroer 2017

Excavations at the early Iron age site of Khirbet Qeiyafa (Israel), directed from 2007 to 2011 by Yosef Garfinkel and Saar Ganor under the auspices of the Hebrew University of Jerusalem and the Israel Antiquities Authority, have attracted considerable scholarly and media attention since the very first season, when the discovery of an inscribed ostrakon sparked controversies over the site's historical significance and nature. Located at the entrance of the Elah Valley, protected by a casemate wall and two monumental gateways, the settlement of Qeiyafa existed for barely half a century. Its dating and the correlation of the archaeological evidence with the regional history, not least the rise of an early Judahite monarchy, have become matters of intense academic debate. Resulting from a colloquium of the Swiss Society of Ancient Near Eastern Studies, this volume offers a condensed report by main excavator Yosef Garfinkel as well as several in-depth studies on archaeological, historical, epigraphical, iconographical and biblical issues.

**From Self to Self** - Leo Hartong 2005-09-18

A compilation of expressions, questions and answers that came about in response to Leo's highly praised first book *Awakening to the Dream*. Leo writes with characteristic insight and uses metaphor to illuminate the paradoxical and apparently confusing nature of non-dual reality. His original writing is reinforced by a vast knowledge of non-duality in other spiritual traditions and he weaves these together with his own direct path to present clear pointers to contemporary seekers. An appropriately chosen quotation taken from various sources appears at the end of each short chapter. Also included at the end of the book is the full text of the Hsin-hsin Ming by the third Chan patriarch Seng-ts'an. "The words in this book repeatedly point to the essence which knows the reading as it takes place. Rather than an encouragement to follow a lengthy path, it is an invitation to step off the path. It does not point to 'your' awareness, but to Awareness itself in which the idea of 'you' appears. It does not point to 'your' beingness, but to the undeniable Beingness that appears as you."

*Bring the Noise* - Raphael Honigstein 2018-02-06

JüKlopp's coaching career began in the German second tier at the unfashionable club of FSV Mainz 05, whom he steered to the Bundesliga for the first time in forty-one years. In 2008, he joined Borussia Dortmund, where he achieved back-to-back league titles and took the club to the UEFA Champions League final. He left Germany for one of the England's most challenging jobs: to manage Liverpool, a once-mighty club that had not managed sustained success since the 1980s. It was not a task for the fainthearted. Anfield, Liverpool's home, is a temple to flamboyant attacking soccer powered by passion. In Klopp, Liverpool finally found a manager who embodied the essence of the club. Klopp is dynamic, expressive, restless, driven—he feels every move and play, every tactical shift, every contact on the field. His eyes betray a wild ecstasy and agony as his team thrives or falls. His game plan demands relentless commitment—the famous gegenpress—and he is one of the great personal motivators in all sport. Raphael Honigstein, author of *Das Reboot* and Bundesliga correspondent for the Guardian, has interviewed Klopp and followed his career since his early years, and better than anyone knows how to "bring the noise" to his subject.

**Energy** - Pardeep Singh 2021-09-06

Energy Global energy demand has more than doubled since 1970. The use of energy is strongly related to almost every conceivable aspect of development: wealth, health, nutrition, water, infrastructure, education and even life expectancy itself are strongly and significantly related to the consumption of energy per capita. Many development indicators are strongly related to per-capita energy consumption. Fossil fuel is the most conventional source of energy but also increases greenhouse gas emissions. The economic development of many countries has come at the cost of the environment. However, it should not be presumed that a reconciliation of the two is not possible. The nexus concept is the interconnection between the resource energy, water, food, land, and climate. Such interconnections enable us to address trade-offs and seek synergies among them. Energy, water, food, land, and climate are essential resources of our natural environment and support our quality of life. Competition between these resources is increasing globally and is exacerbated by climate change. Improving resilience and securing resource availability would require improving resource efficiency. Many policies and programs are announced nationally and internationally for replacing the conventional mode and also emphasizing on conservation of fossil fuels and reuse of exhausted energy, so a gap in implications and outcomes can be broadly traced by comparing the data. This book aims to highlight problems and solutions related to conventional energy utilization, formation, and multitudes of ecological impacts and tools for the conservation of fossil fuels. The book also discusses modern energy services as one of the sustainable development goals and how the pressure on resource energy disturbs the natural flows. The recent advances in alternative energy sources and their possible future growth are discussed and on how conventional energy leads to greenhouse gas formation, which reduces energy use efficiency. The different policies and models operating is also addressed, and the gaps that remained between them. Climate change poses a challenge for renewable energy, and thus it is essential to identify the factors that would reduce the possibility of relying on sustainable energy sources. This book will be of interest to researchers and stakeholders, students, industries, NGOs, and governmental

agencies directly or indirectly associated with energy research.

Luther's Theology of Music - Miikka E. Anttila 2013-08-29

The sweetness of music is something that has puzzled Christian theologians for centuries. In this study,

Luther's theology of music is approached from the point of view of pleasure. It examines the significance of joy, beauty and pleasure in relationship with music and Luther's theology. The notion of music as the supreme gift of God requires also a discussion about the idea of 'gift'. Music opens up new perspectives into Luther's thinking. Luther has seldom been reckoned among aesthetic theologians. Nevertheless, Luther has a peculiar view on beauty, understanding faith as a kind of aesthetic contemplation.

**The Good Life in a Technological Age** - Philip Brey 2012

Modern technology has changed the way we live, work, play, communicate, fight, love, and die. Yet few

works have systematically explored these changes in light of their implications for individual and social welfare. How can we conceptualize and evaluate the influence of technology on human well-being? Bringing together scholars from a cross-section of disciplines, this volume combines an empirical investigation of technology and its social, psychological, and political effects, and a philosophical analysis and evaluation of the implications of such effects.
