Health 2020 - Who Regional Office for Europe 2014-05-30
In 2012, the WHO Regional Committee for Europe approved Health 2020 in two forms. This publication gives both. The shorter policy framework provides European politicians and policy-makers with Health 2020's main values and principles, and key strategic advice to support action for health and well-

being. The longer policy framework and strategy give more detail in terms of evidence and practice. It has two strategic objectives, constructed around equity, gender and human rights and improved governance for health. It is aimed at those committed to improving health, well-being and health equity, in a way that is sensitive to each country's situation and political

and organisational circumstances. It is a "living" guide to policies and strategies. Addressing these questions is as much a political as a scientific endeavour and Health 2020 puts strong emphasis on political commitment, as well as professional expertise and the engagement of civil society. Focused on "solutions", it offers practical and achievable, yet flexible, policy options capable politically of being successfully implemented in the individual context of each country.

Mindfulness in the Workplace - Margaret A. Chapman-Clarke 2016-05-03
Mindfulness-based interventions in organizations offer the potential to build individual and organizational resilience, engage employees and address workplace stress.

Mindfulness in the Workplace is a practical guide written for practitioners who want to learn how mindfulness can be used as a change management and organizational development strategy. Drawing from the latest research evidence from neuro- and behavioural science, Mindfulness in the Workplace offers a framework and guidance on how to start evolution- not revolution- in the organization. It ensures the greatest chance of success, showing how to identify the key stakeholders and work with them on understanding the power of a mindfulness initiative, how to identify a mindfulness champion, adapt the language of mindfulness to the context of the organization, establish metrics, and measure return on investment.

Mindfulness in the Workplace proposes that HR and OD professionals are best placed to understand the complexity of implementing change in organizational systems and, therefore, the practice of mindfulness need to be brought in-house, even if they bring in

external mindfulness coaches to train their leaders. Case studies including Capital One Finance and the NHS Mental Health Trust cover the reasoning behind these initiatives, how they were planned, the barriers they faced, the lessons learned, and their results. This book offers a forum for HR and OD practitioners to hear from other practitioners who have implemented organizational mindfulness-based interventions using change management principles so that they can understand how they might be applied to their own practice and their own organizations.

While this is not a self-help book, some may find a few of the vignettes within the pages here as helpful if you have an open mind and consider the consequences of ignoring the common-sense rules that guide your personal universe. In other words, the underlying messages are meant to mitigate the circumstances of the choices you made or the ones you will make down the road ahead. Basically, it's all about paying attention to details that you may take for granted. This is a true account of things that occurred in this author's sixty-five years here, both good and bad and in between. It's also anonymous, as is the custom of truth-telling without consequences. So there are really no named individuals here except Bill W., the founder of AA, who is not associated with this work

Guide to the Quality and Safety of Tissues and Cells for Human Application -

European Directorate for the Quality of Medicines & Healthcare 2013-10-11

This guide provides state-of-the-art information in order to maximise the quality and minimise the risks during donation, procurement, testing, processing, preservation, storage and distribution of

tissues and cells. As with all transplanted material of human origin, tissues and cells carry risks of disease transmission, which must be controlled by the application of scrupulous donor selection criteria (including testing) and comprehensive quality systems. The idea behind this guide is to help professionals on a practical level by providing generic guidance that will help improve the rate of successful clinical application of tissues and cells. The guide makes reference to EU mandatory requirements where appropriate and describes generally-accepted good practice. It has been divided into two parts. Part A contains general requirements applicable to all establishments involved in the donation, procurement, testing, processing, preservation, storage and distribution of tissues and cells. Part B contains specific guidelines and requirements for the different tissue and/or cell types

Sustainable healthy diets -

Food and Agriculture

Organization of the United Nations 2019-10-15

Considering the detrimental environmental impact of current food systems, and the concerns raised about their sustainability, there is an urgent need to promote diets that are healthy and have low environmental impacts. These diets also need to be socio-culturally acceptable and economically accessible for all. Acknowledging the existence of diverging views on the concepts of sustainable diets and healthy diets, countries have requested guidance from the Food and Agriculture Organization of the United Nations (FAO) and the World Health Organization (WHO) on what constitutes sustainable healthy diets. These guiding principles take a holistic approach to diets; they consider international nutrition recommendations; the environmental cost of food production and consumption;

and the adaptability to local social, cultural and economic contexts. This publication aims to support the efforts of countries as they work to transform food systems to deliver on sustainable healthy diets, contributing to the achievement of the SDGs at country level, especially Goals 1 (No Poverty), 2 (Zero Hunger), 3 (Good Health and Well-Being), 4 (Quality Education), 5 (Gender Equality) and 12 (Responsible Consumption and Production) and 13 (Climate Action).

Standard-Setting at UNESCO -

Abdulqawi A. Yusuf 2007-10-15

Standard-setting represents one of the main constitutional functions of UNESCO and an important tool for realizing the goals for which the Organization was created. In addition to conventions and recommendations, the declarations adopted by the General Conference promulgate principles and norms intended to inspire the action of Member States in specific fields of activity. This first of a two-volume work on

Standard-setting in UNESCO contains the essays presented at a symposium held on the occasion of its sixtieth anniversary. Topics addressed in Normative Action in Education, Science and Culture include methods of elaboration and implementation; constitutional objectives and legal commitments; international collaboration; and impact. Implementation of the Millennium Development

Goals - Awortwi, Nicholas
2016-06-13

This book brings together results of studies on progresses and challenges in the implementation of the Millennium Development Goals (MDGs) in Lesotho, Kenya, Botswana, Madagascar, Tanzania, Ghana, Uganda and Nigeria. The authors focus on selected goals as cases; and the book presents resulting lessons that can inform the post-2015 development agenda. The studies are against the background that in September 2000, world leaders

from 189 countries, including 147 Heads of State, gathered at the United Nations General Assembly to consider the challenges of the new millennium. They adopted the Millennium Declaration, which set out a vision for inclusive and sustainable globalization: UN 2000 (A/RES/55/2). The leaders pledged to work towards ensuring that conditions of extreme poverty are eradicated wherever they existed. To realise this declaration, the UN established eight MDGs to be achieved by 2015. The goals were broken down into 18 concrete targets and 48 indicators to track progresses in implementation. For the years lost 2000, countries in sub-Saharan Africa have been striving to achieve the goals. So far, some have achieved some of the goals, and the results toward the rest of the goals are also by and large positive, though off-target.

report of the Asian Development Bank (ADB) on Asia's progress in regional cooperation and integration. It covers ADB's 48 regional members and analyzes regional and global economic linkages. This year's special chapter, "Toward Optimal Provision of Regional Public Goods in Asia and the Pacific," examines how collective action among countries can help find solutions to growing transnational development challenges. It discusses how to best provide regional public goods that transcend the so-called "collective action problem," which occurs when individual interests are too weak on their own to drive cooperation on common issues. The chapter suggests that multilateral development banks should act as honest broker in enhancing mutual trust and facilitating regional cooperation for regional public goods.

Public Health in Austria - Joy Ladurner 2011

This book explores the key challenges facing Austria's

public health system. Set firmly in the context of the history, scope, functions and responsibilities of public health in developed countries, it examines how the Austrian system has developed and adapted over the last 50 years to the benefit of the population. It also looks at the challenges presented by life in the 21st century. The book draws on both national research and expert interviews to present a fully-rounded picture. This shows that the public health system in Austria is struggling to maintain essential services and develop policies for improvement, and the study proposes strategies and policies to tackle these developments, looking in particular at change within the fields of education, research and training. This book is essential reading for policy-makers, advisers and analysts interested in developing a public health strategy and competence in both developed and developing countries, as well as researchers interested in the Austrian health system.

Polyunsaturated Fatty Acid Metabolism - Graham C.

Burdge 2018-05-04

Polyunsaturated Fatty Acid Metabolism explores a number of major roles of PUFA in the body, including its role as a component of cell membranes and how it provides substrates for the synthesis of lipid second messengers. Recent studies are unraveling the effect of interactions between diet and endocrine factors and genetic and epigenetic variation on the regulation of PUFA biosynthesis in animals.

Together, these recent findings provide novel insights into the impact of differences in PUFA supply on health. This book captures these findings in a manner that marks the state-of-the-art, placing them in the wider context of PUFA metabolism and nutritional science. Users will find a comprehensive discussion on the topic that presents the contributions of leading researchers who combine their knowledge to create a cohesive academic resource for researchers, those involved in

production, and health policymakers. Provides a comprehensive view of polyunsaturated fatty acid metabolism Describes underlying metabolism on lipids that include polyunsaturated fatty acids Includes discussions on recent findings on the genetic and epigenetic regulation of polyunsaturated fatty acid metabolism

Price Setting and Price Regulation in Health Care -

OECD 2019-06-26

The objectives of this study are to describe experiences in price setting and how pricing has been used to attain better coverage, quality, financial protection, and health outcomes. It builds on newly commissioned case studies and lessons learned in calculating prices, negotiating with providers, and monitoring changes. Recognising that no single model is applicable to all settings, the study aimed to generate best practices and identify areas for future research, particularly in low- and middle-income settings. The report and the case studies were jointly developed by the OECD and the WHO Centre for Health Development in Kobe (Japan).

Migration And Health In The European Union - Rechel, Bernd 2011-12-01

"This book can be read by anyone with an interest in migration and health, whether as an advocate for migrants health, as a student in a health profession, researcher or policy maker. It provides an ample orientation to the field in the European context. Among other important raised issues, it underlines an all too often neglected fact; health is a human right. By involving broad issues and problem areas from a variety of perspectives, the volume illustrates that migration and health is a field that can not be allocated to a single discipline." Carin Bjrngrn Cuadra, Senior Lecturer, Malm University, Sweden Migrants make up a growing share of European populations. However, all too often their situation is compounded by problems with accessing health and other basic services. There is a need

for tailored health policies, but robust data on the health needs of migrants and how best these needs can be met are scarce. Written by a collaboration of authors from three key international organisations (the European Observatory on Health Systems and Policies, the EUPHA Section on Migrant and Ethnic Minority Health, and the International Organization for Migration), as well as leading researchers from across Europe, the book thoroughly explores the different aspects of migration and health in the EU and how they can be addressed by health systems. Structured into five easy-to-follow sections, the volume includes: Contributions from experts from across Europe Key topics such as: access to human rights and health care; health issues faced by migrants; and the national and European policy response so far Conclusions drawn from the latest available evidence Comprehensive information on different aspects of health and migration and how they can best be addressed by health

Pocket Guide to COPD Diagnosis, Management and Prevention - Global Initiative for Chronic Obstructive Lung Disease 2017-11-15
Chronic Obstructive Pulmonary Disease (COPD) represents an important public health challenge and is a major cause of chronic morbidity and mortality throughout the world. COPD is currently the fourth leading cause of death in the world¹ but is projected to be the 3rd leading cause of death by 2020. More than 3 million people died of COPD in 2012 accounting for 6% of all deaths globally. Globally, the COPD burden is projected to increase in coming decades because of continued exposure to COPD

risk factors and aging of the population.² This Pocket Guide has been developed from the Global Strategy for the Diagnosis, Management, and Prevention of COPD (2018 Report), which aims to provide a non-biased review of the current evidence for the assessment, diagnosis and treatment of patients with COPD that can aid the clinician. Discussions of COPD and COPD management, evidence levels, and specific citations from the scientific literature are included in that source document, which is available from www.goldcopd.org. The tables and figures in this Pocket Guide follow the numbering of the 2018 Global Strategy Report for reference consistency.

Comparative experiences from around the world put the EMR in context, while the book also highlights where the EMR is special - in particular, the burden for health care of refugees and displaced persons, and the need of public-private partnerships.

Handbook on Measuring Quality of Employment - United Nations Economic Commission for Europe 2015-12-31

Employment is a key driver of social and economic development. It is also at the centre of most people's lives and the quality of an individual's employment is an important element of his or her well-being. At the same time, labour markets are evolving and the conditions of employment are continuously

changing, which affects the lives of workers and their households. This development has been accompanied by growing interest in quality of employment and demands from policymakers, governments and researchers for more systematic information on the quality of employment to complement the well-established quantitative labour market indicators. The Framework offers a coherent structure for measuring quality of employment and provides practical guidance for compiling and interpreting a number of proposed indicators.

Solidarity in Biomedicine and Beyond - Barbara

Prainsack 2017-01-19

In times of global economic and political crises, the notion of solidarity is gaining new currency. This book argues that a solidarity-based perspective can help us to find new ways to address pressing problems. Exemplified by three case studies from the field of biomedicine: databases for health and disease research, personalised healthcare, and organ donation, it explores how solidarity can make a difference in how we frame problems, and in the policy solutions that we can offer.
