Robert Penn Warren After Audubon - Joseph R. Millichap 2009-12

Despite nearly universal critical acclaim for Robert Penn Warren's later poetry, much about this large body of work remains unexplored, especially the psychological sources of these poems' remarkable energy. In this groundbreaking work, Warren scholar Joseph R. Millichap takes advantage of current research on developmental psychology, gerontology, and end-of-life studies to offer provocative new readings of Warren's later poems, which he defines as those published after Audubon: A Vision (1969). In these often intricate poems, Millichap sees something like an autobiographical epic focused on the process of aging, the inevitability of death, and the possibility of transcendence. Thus Warren's later poetry reviews an individual life seen whole, contemplates mortality and dissolution, and aspires to the literary sublime. Millichap locates the beginning of Warren's late period in the extraordinary collection Or Else: Poem/Poems 1968--1974, basing his contention on the book's complex, indeed obsessive sequencing of new, previously

published, and previously collected poems unified by themes of time, memory, age, and death. Millichap offers innovative readings of Or Else and Warren's five other late gatherings of poems -- Can I See Arcturus from Where I Stand?: Poems 1975; Now and Then: Poems 1976--1978, winner of the Pulitzer Prize; Being Here: Poetry 1977--1980; Rumor Verified: Poems 1979--1980; and Altitudes and Extensions 1980--1984. Among the autobiographical elements Millichap brings into his careful readings are Warren's loneliness in these later years, especially after the deaths of family members and friends; his alternating feelings of personal satisfaction and emptiness toward his literary achievements; and his sense of the power, and at times the impotence, of memory. Millichap's analysis explores how Warren often returned to images and themes of his earlier poems, especially those involving youth and midlife, with the new perspective given by advancing age and time's passage. Millichap also relates Warren's work to that of other poets who have dealt profoundly with memory and age, including Robert Frost, T. S. Eliot, Thomas Hardy, and, at times, John Milton, William Wordsworth, and the whole English and American nineteenth-century Romantic tradition. An epilogue traces Warren's changing reputation as a poet from the publication of his last volume in 1985 through his death in 1989 and the centennial of his birth in 2005, concluding persuasively that the finest of all of Warren's literary efforts can be found in his later poetry, concerned as it is with the work of aging and the quest for transcendence.

Risk Theory and Reinsurance - Griselda Deelstra 2013-11-22

Reinsurance is an important production factor of non-life insurance. The efficiency and the capacity of the reinsurance market directly regulate those of insurance markets. The purpose of this book is to provide a concise introduction to risk theory, as well as to its main application procedures to reinsurance. The first part of the book covers risk theory. It presents the most prevalent model of ruin theory, as well as a discussion on insurance premium calculation principles and the mathematical tools that enable portfolios to be ordered according to their risk levels. The second part describes the institutional context of reinsurance. It first strives to clarify the legal nature of reinsurance transactions. It describes the structure of the reinsurance market and then the different legal and technical features of reinsurance contracts, known as reinsurance 'treaties' by practitioners. The third part creates a link between the theories presented in the first part and the practice described in the second one. Indeed, it sets out, mostly through examples, some methods for pricing and optimizing reinsurance. The authors aim is to apply the formalism presented in the first part to the

institutional framework given in the second part. It is reassuring to find such a relationship between approaches seemingly abstract and solutions adopted by practitioners. Risk Theory and Reinsurance is mainly aimed at master's students in actuarial science but will also be useful for practitioners wishing to revive their knowledge of risk theory or to quickly learn about the main mechanisms of reinsurance.

Robert E. Lee on Leadership - H.W. Crocker III 2010-05-19

Robert E. Lee was a leader for the ages. The man heralded by Winston Churchill as "one of the noblest Americans who ever lived" inspired an out-manned, out-gunned army to achieve greatness on the battlefield. He was a brilliant strategist and a man of unyielding courage who, in the face of insurmountable odds, nearly changed forever the course of history. "A masterpiece—the best work of its kind I have ever read. Crocker's Lee is a Lee for all leaders to study; and to work, quite deliberately, to emulate." — Major General Josiah Bunting III, superintendent of the Virginia Military Institute In this remarkable book, you'll learn the keys to Lee's greatness as a man and a leader. You'll find a general whose standards for personal excellence was second to none, whose leadership was founded on the highest moral principles, and whose character was made of steel. You'll see how he remade a rag-tag bunch of men into one of the most impressive fighting forces history has ever known. You'll also discover other sides of Lee—the businessman who inherited the debt-ridden Arlington plantation and streamlined its operations, the teacher who took a backwater college and made it into a prestigious university, and the motivator who inspired those he led to achieve more than they ever dreamed possible. Each chapter concludes with the extraordinary lessons learned, which can be applied not only to your professional life, but also to your private life as well. Today's business world requires leaders of uncommon excellence who can overcome the cold brutality of constant change. Robert E. Lee was such a leader. He triumphed over challenges people in business face every day. Guided by his magnificent example, so can you.

Risk Analysis in Theory and Practice - Jean-Paul Chavas 2004-07-01

The objective of Risk Analysis in Theory and Practice is to present this analytical framework and to illustrate how it can be used in the investigation of economic decisions under risk. In a sense, the economics of risk is a difficult subject: it involves understanding human decisions in the absence of perfect information. How do we make decisions when we do not know some of events affecting us? The complexities of our uncertain world and of how humans obtain and process information make this difficult. In spite of these difficulties, much progress has been made. First, probability theory is the corner stone of risk assessment.

This allows us to measure risk in a fashion that can be communicated among decision makers or researchers. Second, risk preferences are now better understood. This provides useful insights into the economic rationality of decision making under uncertainty. Third, over the last decades, good insights have been developed about the value of information. This helps better understand the role of information in human decision making and this book provides a systematic treatment of these issues in the context of both private and public decisions under uncertainty. Balanced treatment of conceptual models and applied analysis Considers both private and public decisions under uncertainty Website presents application exercises in Excel

River Angel - A. Manette Ansay 2009-03-17

In April 1991, in a little Wisconsin town about a hundred miles southwest of the town where I grew up, a misfit boy was kidnapped by a group of high school kids who, later, would testify they'd merely meant to frighten him, to drive him around for a while. Somehow they ended up at the river, whooping and hollering on a two-lane bridge. Somehow the boy was shoved, he jumped, he slipped—accounts vary—into the icy water. The kids told police they never heard a splash; one reported seeing a brilliant flash of light. (Several people in the area witnessed a similar light, while others recalled hearing something "kind of like thunder.") All night, volunteers walked the river's edge, but it was dawn before the body was found in a barn a good mile from the bridge . . . The owner of the barn had been the one to discover the body, and she said the boy's cheeks were rosy, his skin warm to the touch. A sweet smell hung in the air. "It was," she said "as if he were just sleeping." And then she told police she believed an angel had carried him there. For years, it had been said that an angel lived in the river. Residents flipped coins into the water for luck, and a few claimed they had seen the angel, or known someone who'd seen it. The historical society downtown had a farmwife's journal, dated 1898, in which a woman described how an angel had rescued her family from a flood. Now, as the story of the boy's death spread, more people came forward with accounts of strange things that had happened on that night. Dogs had barked without ceasing till dawn; livestock broke free of

padlocked barns. Someone's child crayoned a bridge and, above it, a wide-winged tapioca angel. A miracle? A hoax? Or something in between? With acute insight and great compassion, A. Manette Ansay captures the inner life of a town and its residents struggling to forge a new identity in the face of a rapidly changing world.

Riveted: The Science of Why Jokes Make Us Laugh, Movies Make Us Cry, and Religion Makes Us Feel One with the Universe - Jim Davies 2014-08-05

Why do some things pass under the radar of our attention, but other things capture our interest? Why do some religions catch on and others fade away? What makes a story, a movie, or a book riveting? Why do some people keep watching the news even though it makes them anxious? The past 20 years have seen a remarkable flourishing of scientific research into exactly these kinds of questions. Professor Jim Davies' fascinating and highly accessible book, *Riveted*, reveals the evolutionary underpinnings of why we find things compelling, from art to religion and from sports to superstition. Compelling things fit our minds

like keys in the ignition, turning us on and keeping us running, and yet we are often unaware of what makes these "keys" fit. What we like and don't like is almost always determined by subconscious forces, and when we try to consciously predict our own preferences we're often wrong. In one study of speed dating, people were asked what kinds of partners they found attractive. When the results came back, the participants' answers before the exercise had no correlation with who they actually found attractive in person! We are beginning to understand just how much the brain makes our decisions for us: we are rewarded with a rush of pleasure when we detect patterns, as the brain thinks we've discovered something significant; the mind urges us to linger on the news channel or rubberneck an accident in case it might pick up important survival information; it even pushes us to pick up *People* magazine in order to find out about changes in the social structure. Drawing on work from philosophy, anthropology, religious studies, psychology, economics, computer science, and biology, Davies offers a comprehensive explanation to show that in spite of the differences between the many things that we find compelling, they have similar effects on our minds and brains.

Rising from the Plains - John McPhee 2011-04-01

Pulitzer Prize-winning author John McPhee continues his Annals of the Former World series about the geology of North America along the fortieth parallel with *Rising from the Plains*. This third volume presents another exciting geological excursion with an engaging account of life—past and present—in the high plains of Wyoming. Sometimes it is said of geologists that they reflect in their professional styles the sort of country in which they grew up. Nowhere could that be more true than in the life of a geologist born in the center of Wyoming and raised on an isolated ranch. This is the story of that ranch, soon after the turn of the twentieth century, and of David Love, the geologist who grew up there, at home with the composition of the high country in the way that someone growing up in a coastal harbor would be at home with the vagaries of the sea.

Rising Star (Silver Dolphins, Book 7) - Summer Waters 2010-02-04
Exciting magical adventure series - will you answer the call of the Silver Dolphins?

Rising Road - Sharon Davies 2010-02-16

It was among the most notorious criminal cases of its day. On August 11, 1921, in Birmingham, Alabama, a Methodist minister named Edwin Stephenson shot and killed a Catholic priest, James Coyle, in broad daylight and in front of numerous witnesses. The killer's motive? The priest had married Stephenson's eighteen-year-old daughter Ruth to Pedro Gussman, a Puerto Rican migrant and practicing Catholic. Sharon Davies's *Rising Road* resurrects the murder of Father Coyle and the trial of his killer. As Davies reveals with novelistic richness, Stephenson's

crime laid bare the most potent bigotries of the age: a hatred not only of blacks, but of Catholics and "foreigners" as well. In one of the case's most unexpected turns, the minister hired future U.S. Supreme Court Justice Hugo Black to lead his defense. Though regarded later in life as a civil rights champion, in 1921 Black was just months away from donning the robes of the Ku Klux Klan, the secret order that financed Stephenson's defense. Entering a plea of temporary insanity, Black defended the minister on claims that the Catholics had robbed Ruth away from her true Protestant faith, and that her Puerto Rican husband was actually black. Placing the story in social and historical context, Davies brings this heinous crime and its aftermath back to life, in a brilliant and engrossing examination of the wages of prejudice and a trial that shook the nation at the height of Jim Crow. "Davies takes us deep into the dark heart of the Jim Crow South, where she uncovers a searing story of love, faith, bigotry and violence. Rising Road is a history so powerful, so compelling it stays with you long after you've finished its final page." -- Kevin Boyle, author of the National Book Award-winning Arc of Justice "This gripping history...has all the makings of a Hollywood movie. Drama aside, Rising Road also happens to be a fine work of history." --History News Network

Risk and Acceptability - Mary Douglas 2013-04-15

First published in 1985, Mary Douglas intended *Risk and Acceptability* as a review of the existing literature on the state of risk theory. Unsatisfied with the current studies of risk, which she found to be flawed by individualistic and psychologistic biases, she instead uses the book to argue risk analysis from an anthropological perspective. Douglas raises questions about rational choice, the provision of public good and the autonomy of the individual.
