Using Personal Judgement in Nursing and Healthcare - David Seedhouse 2020-03-30

What is personal judgement?  
How can it help me interpret and follow official guidelines?  
How can I use it successfully in my daily practice? Rules and codes for healthcare professionals continue to proliferate yet are unable to offer practical advice in specific circumstances. To help balance official rules with the

variable, unique human element, David Seedhouse and Vanessa Peutherer explain what personal judgement is and how it can be applied routinely and effectively in everyday decision-making in healthcare. Through the use of over 40 interactive scenarios drawn from real-life practice, the authors encourage readers to use a range of techniques to boost their personal judgement, introducing different models and approaches to decision-making and exploring their strengths as well as their limitations. The authors then talk through their own suggestions for solving commonplace but challenging healthcare problems. Timely, original and accessible, this book provides nurses and healthcare professionals with the tools needed to navigate the reality of everyday practice, while working with the many protocols they must consider and apply in both education and practice. Read author David Seedhouse's overview of the importance of personal judgement in the

*The Artinian Intersystem*

*Model* - Dr. Barbara M

Artinian, PhD, RN 2011-04-01

This second edition graduate textbook and reference guide for nurses presents a practice-focused intervention from the notable Artinian Intersystem Model. While the first edition focused largely on theory, this second editions seeks to integrate both theory and practice to ultimately help enhance the nurse-patient relationship as well as nursing practice at large. The authors offer practical care plans at various levels of expertise across the continuum of care,

from acute care to long term care to resolve concerns through joint decision making and to document interventions. The text establishes exclusive care plans and scales for the Artinian Intersystem Model to document changes in health status. The book also employs evidence-based, Glaserian Grounded Theory research methods, and serves as a companion to Springer Publishing's Glaserian Grounded Theory in Nursing Research. Key features: Uses evidence-based Grounded Theories to guide clinical nursing practice Establishes a care plan that accounts for the interaction of the biological, psychosocial, and spiritual subsystems Discusses the application of the Artinian Intersystem Model in various practice settings, including community health, cosmetic procedures, case management, and assisted living Book includes a link to a digital adjunct containing forms for applying the model at the graduate and undergraduate levels, as well as conceptual

Emphasizing evidence-based care, the book balances coverage of scientifically based treatment approaches with insights into effective communication skills, so you will be prepared to offer the best possible care when you enter practice. Written by nursing expert Chyllia D. Fosbre, this edition adds new Next Generation NCLEX® (NGN) examination-style case studies to help you develop critical thinking skills and prepare for the NGN exam. Applying Critical Judgment questions introduce clinical situations in psychiatric nursing and encourage critical thinking. Neurobiology of the Brain feature includes illustrations depicting how a disorder affects brain function and how drugs help to mitigate the symptoms. Applying Evidence-Based Practice boxes in the clinical chapters pose a question, walk you through the process of gathering evidence-based data from a variety of sources, and present a plan of care based on the evidence. Vignettes describe real-world

psychiatric patients and their disorders. Assessment Guidelines boxes summarize the steps of patient assessment for various disorders. Applying the Art boxes offer clinical scenarios demonstrating the interaction between a nurse and a patient, the nurse's perception of the interaction, and the mental health nursing concepts in play. Potential Nursing Diagnoses tables list possible nursing diagnoses for a particular disorder, based on ICNP terminology, along with the associated signs and symptoms. Nursing Interventions tables list interventions for a given disorder or clinical situation, along with rationales for each intervention. DSM-5 Criteria boxes identify the diagnostic criteria for most major disorders. Integrative Care boxes highlight the different types of therapy may be used to enhance treatment. Giddens Concept boxes at the beginning of each chapter tie concepts to the topics to be discussed. NEW! Next Generation NCLEX® (NGN) examination-

style case studies are included in the clinical disorders chapters to promote critical thinking and help to prepare you for the NGN exam.

**Varcarolis' Foundations of Psychiatric-Mental Health Nursing - E-Book** - Margaret Jordan Halter 2017-07-11  
Varcarolis' Foundations of Psychiatric-Mental Health Nursing, 8th Edition is the most comprehensive RN psychiatric nursing text on the market!
