Continuing Professional Education in Australia - Barrie Brennan 2016-09-01

This book offers a history of Continuing Professional Development (CPD) in the Australian context. It presents an approach that links the development of CPD to a series of 'missed opportunities' and the identification of three key themes (mandatory CPD, competencies and regulation/registration) as well as with national regulation for select health professions. It not only relates the evolution of CPD in Australia but also serves as a guide to examining the situation in other countries and the emergence of CPD in individual professions. CPD has been provided for many decades, but it has not been rated as a 'high priority' or a key area of provision and has not been the focus of discussions or disputes in the higher education sector or in vocational education circles. Nevertheless in describing CPD's development, evidence is presented that CPD has made a significant contribution to the broad field of vocational education.

A U.S.-Canada Medical-Dental-Pharmacy Organization-Hospital Website Guide - Tony Kelbrat 2022-09-08

This is a book for people in the academic or business aspects of the medical industry, medical professionals doing research or looking for a job, medical students, patients and anyone else interested in the United

States and Canada infrastructure of medical organization and hospital websites. I focused on American, Canadian and some UK medical organizations and hospitals in this book which made it good-sized already without dipping into my world medical book which offers medical resources for most countries. I created an American medical job book and a general American medical book which were both quite long so I took information about medical organizations and hospitals out of them and created a separate book. As far as information about American-Canadian medical organization and hospital websites go, there is no book or database anywhere that comes close to this one. It's for the medical professional who wants this information at their fingertips all in one place. I got a bunch of medical organization and hospital websites from a website called theagapecenter.com then it disappeared. A German outfit has taken the name over. The original website probably exists at archive.org. Dmoz.org was a human-filtered search site with good lists. It disappeared but is archived at dmoz-odp.org. It had a lot of good information on it. Beyond that, I put the lists of medical organizations and hospitals that I found all over the place in this book. I'm not repeating information in this book that is already in my other books. Find job websites and organizations for most medical careers at my book called: A Medical-Dental-Pharmacy Job-School-Organization Guide The 100 volumes of this book are as follows: Volume 1.
