UFOs - Leslie Kean 2011-08-02

NEW YORK TIMES BESTSELLER • Impeccably researched, this riveting journalistic investigation separates fact from fiction, and documents the existence of—and government reactions to—actual UFOs. “A treasure trove of insightful and eye-opening information.”—Michio Kaku, PH.D., bestselling author of *Physics of the Future* Leslie Kean, a veteran investigative reporter who has spent the past ten years studying the still-unexplained UFO phenomenon, reviewed hundreds of government documents, aviation reports, radar data, and case studies with corroborating physical evidence. She interviewed dozens of high-level officials and aviation witnesses from around the world. Among them, five Air Force generals and a host of high-level sources—including Fife Symington III, former governor of Arizona, and Nick Pope, former head of the British Defence Ministry’s UFO Investigative Unit—have written their own breathtaking, firsthand accounts about UFO encounters and investigations exclusively for this book. With the support of former White House chief of staff John Podesta, Kean lifts the veil on decades of U.S. government misinformation about this mysterious phenomenon and presents irrefutable evidence that unknown flying objects—metallic, luminous, and seemingly able to maneuver in ways that defy the laws of physics—actually exist. With a Foreword by John Podesta “The most

important book on the phenomenon in a generation.”—*Journal of Scientific Exploration* “Written with penetrating depth and insight, the revelations in this book constitute a watershed event in lifting the taboo against rational discourse about this controversial subject.”—Harold E. Puthoff, PH.D., Director of the Institute for Advanced Studies at Austin “Kean presents the most accurate, most credible reports on UFOs you will ever find. She may not have the final smoking gun, but I smell the gunpowder.”—Miles O’Brien, science correspondent for PBS’s *NewsHour* *Defense Industry Bulletin* - 1966

**The 37th Parallel** - Ben Mezrich 2016-09-06

A real-life mix of *The X-Files* and *Close Encounters of the Third Kind*, Mezrich “writes vividly and grippingly...A terrific story...[that] will make a heck of a movie” (*The Washington Post*). Here is the “fascinating” (*Publishers Weekly*) true story of a computer programmer who tracks paranormal events in remote areas of the western United States and is drawn deeper and deeper into a mysterious conspiracy. Like Agent Mulder of *The X-Files*, microchip engineer and sheriff’s deputy Chuck Zukowski is obsessed with tracking down UFO reports in Colorado. He

even takes the family with him on weekend trips to look for evidence of aliens. But this innocent hobby takes on a sinister urgency when Zukowski learns of mutilated livestock—whose exsanguination is inexplicable by any known human or animal means. Along an expanse of land stretching across the southern borders of Utah, Colorado, and Kansas, Zukowski documents hundreds of bizarre incidences of mutilations, and discovers that they stretch through the heart of America. His pursuit of the truth draws him deeper into a vast conspiracy, and he journeys from Roswell and Area 51 to the Pentagon and beyond; from underground secret military caverns to Native American sacred sites; and to wilderness areas where strange, unexplained lights traverse the sky at extraordinary speeds. Inspiring and terrifying, Mezrich's "dramatic narrative...connects dots we didn't even know existed...Something's clearly happening out there in the high meadows and along desert highways" (Kirkus Reviews). The 37th Parallel will make you, too, wonder if we are really alone.

Full body teleportation. Wormhole generators. Gravity control. Time displacement. Quantum vortex implosion drives. Warp drive technology. These are not the elements of the latest science fiction movie. No, these are the inventions that people are trying to patent in the United States and in the World today. This isn't happening "long, long ago in a galaxy far, far away." Nor is it happening in the 23rd century. These are inventions being reviewed by the United States and world Patent Offices right now. What if I told you that the gas companies know how to make technology that would allow you to get 10,000 miles to the gallon? Would you believe it if you saw Shell Gas Co. admit to it? Well here is that admission on page 603: 10,000 MPG Carburetor Confirmed by Shell Gas Company. You are living in an era of boundless possibilities.

Wonders in the Sky - Jacques Vallee 2010-10-28

One of the most ambitious works of paranormal investigation of our time, here is an unprecedented compendium of pre-twentieth-century UFO accounts, written with rigor and color by two of today's leading investigators of unexplained phenomena. In the past century, individuals, newspapers, and military agencies have recorded thousands of UFO incidents, giving rise to much speculation about flying saucers, visitors from other planets, and alien abductions. Yet the extraterrestrial phenomenon did not begin in the present era. Far from it. The authors of *Wonders in the Sky* reveal a thread of vividly rendered-and sometimes strikingly similar- reports of mysterious aerial phenomena from antiquity through the modern age. These accounts often share definite physical features- such as the heat felt and described by witnesses-that have not changed much over the centuries. Indeed, such similarities between ancient and modern sightings are the rule rather than the exception. In *Wonders in the Sky*, respected researchers Jacques Vallee and Chris

Aubeck examine more than 500 selected reports of sightings from biblical-age antiquity through the year 1879-the point at which the Industrial Revolution deeply changed the nature of human society, and the skies began to open to airplanes, dirigibles, rockets, and other opportunities for misinterpretation represented by military prototypes. Using vivid and engaging case studies, and more than seventy-five illustrations, they reveal that unidentified flying objects have had a major impact not only on popular culture but on our history, on our religion, and on the models of the world humanity has formed from deepest antiquity. Sure to become a classic among UFO enthusiasts and other followers of unexplained phenomena, *Wonders in the Sky* is the most ambitious, broad-reaching, and intelligent analysis ever written on premodern aerial mysteries.

*The Shadow Government* - Len Bracken 2002

This book presents the alarming evidence that nation-states actively engage in terror, and also passively allow terror to be visited upon their citizens. It is not just liberation movements and radical groups that deploy terrorist tactics for offensive ends. States use terror defensively to directly intimidate their citizens, and to indirectly attack themselves or harm their citizens under a false flag. Their motivation? To provide pretexts for otherwise unwanted wars, or to gain increased police powers. Statesmen have executed indirect terrorism in various ways, but most plots tend to involve the pretence of blind eyes, misdirection, and cover-ups that give the statesmen plausible deniability. The shrinking of the 'Lusitania', the bombing of Pearl Harbour, the October Surprise, the first World Trade Center bombing, the Oklahoma City bombing and other well-known incidents suggest that terrorism is often successfully used by states to take the offensive against enemies at home and abroad. Was 9-11 such an indirect defensive attack? Len Bracken traces the clues circumstantially connecting a multi-armed hydra of oil interests, the CIA, FBI diplomats and statesmen to the September 11 attacks and examines whether they were engineered or allowed as a pretext for the war in Afghanistan. The subsequent anthrax attack targeting Democratic senators is considered in light of the controversial USA Patriot Acts

rights-encroaching measures and the act's easy passage under conditions of terror. A shadow government appears to have covered the land like black ice.

**UFOs** - John B. Alexander, Ph.D. 2011-02-15

Foreword by Jacques F. Vallee Introduction by Burt Rutan Commentary by Tom Clancy A never-before-heard firsthand account of a government insider's experience on the cutting edge of UFO exploration While still on active duty in the U.S. Army during the 1980s, Colonel John B. Alexander, Ph.D., created an interagency group to explore the controversial topic of UFOs. Participants came from the Army, Navy, Air Force, CIA, NSA, DIA, and the aerospace industry. All members held Top Secret clearance. What they discovered was not at all what was expected. UFOs covers the numerous cases they saw, and answers questions like: • What was really in Hanger 18? • Did a UFO land at Holloman Air Force Base? • What happened at Roswell? • What is Majestic 12? • What is the Aviary? • What does the government know about UFOs? • What has happened with disclosure in other countries? • Has the U.S. reverse engineered a UFO? • Why don't presidents get access to UFO info? UFOs is at once a complete account of Alexander's findings, and a call to action. There are no conspiracy theories here—only hard facts—but they are merely the beginning. Serious research is needed in order to understand and anticipate the workings of UFOs, and John Alexander is leading the charge.
