Cooking for the Common Good - Larry Stettner 2010-08-31

On Mount Desert Island, Maine, winter can mean six months of isolation and tough times, as year-round residents hunker down through the cold season. Larry Stettner and Bill Morrison vowed to change that. In November 2009, the Common Good Soup Kitchen opened its doors to the public, offering free soup as well as live music and a place for locals to gather, interact, and help each other. In its first winter of operation, the Common Good served over 10,000 bowls of soup to the community. Run entirely by donations, grants, and volunteer labor, the café also runs a distribution program to deliver soup to senior residences and others who cannot make it out to the café. In *Cooking for the Common Good*, Stettner and Morrison argue that we need to radically rethink the concept of the soup kitchen, emphasizing true community building along with incorporating healthy and locally sourced food. The book includes a

lively third-person narrative telling the story of how the Common Good Soup Kitchen was created; the authors' unique cooking philosophy; some of their most popular soup and salad recipes; and a full appendix with resources and a sample grant application for others interested in starting their own soup kitchen. "Today access to whole foods, local organic foods, and sustainable fisheries is more important than ever for our well-being. But, because of economic inequities, good whole food is once again hard to get. Organic foods are largely available to the wealthiest and most privileged among us. Let us break down the bastions and make natural, whole food—including organically based soups—for everyone." —from chapter 2, "The Soup Manifesto"

American Education and Corporations - Deron Boyles 1998

The legendary Greek figure Orpheus was said to have possessed magical powers capable of moving all living and inanimate things through the sound of his lyre and voice. Over time, the Orphic theme has come to indicate the power of music to unsettle, subvert, and ultimately bring down oppressive realities in order to liberate the soul and expand human life without limits. The liberating effect of music has been a particularly important theme in twentieth-century African American literature. The nine original essays in *Black Orpheus* examines the Orphic theme in the fiction of such African American writers as Jean Toomer, Langston Hughes, Claude McKay, James Baldwin, Nathaniel Mackey, Sherley Anne

Williams, Ann Petry, Ntozake Shange, Alice Walker, Gayl Jones, and Toni Morrison. The authors discussed in this volume depict music as a mystical, shamanistic, and spiritual power that can miraculously transform the realities of the soul and of the world. Here, the musician uses his or her music as a weapon to shield and protect his or her spirituality. Written by scholars of English, music, women's studies, American studies, cultural theory, and black and Africana studies, the essays in this interdisciplinary collection ultimately explore the thematic, linguistic structural presence of music in twentieth-century African American fiction.

Investigation of Political Activities by White House and Federal Agency Officials During the 2006 Midterm Elections - William E. Reukauf 2011-03-01

This report presents the U.S. Office of Special Counsel's (OSC) investigative findings regarding White House Office of Political Affairs (OPA) employees conducting political briefings for agency political appointees during work hours and in the federal workplace. The activities investigated by OSC occurred during President George W. Bush's administration (Bush II). In addition, OSC explains its findings and legal conclusions, and recommends certain practices and regulatory amendments that OSC believes should be adopted to ensure future compliance with the Hatch Act. The Source - Loretto Dennis Szucs 2006

Genealogists and other historical researchers have valued the first two editions of this work, often referred to as the genealogist's bible. The new edition continues that tradition. Intended as a handbook and a guide to selecting, locating, and using appropriate primary and secondary resources, The Source also functions as an instructional tool for novice genealogists and a refresher course for experienced researchers. More than 30 experts in this field--genealogists, historians, librarians, and archivists--prepared the 20 signed chapters, which are well written, easy to read, and include many helpful hints for getting the most out of whatever information is acquired. Each chapter ends with an extensive

bibliography and is further enriched by tables, black-and-white illustrations, and examples of documents. Eight appendixes include the expected contact information for groups and institutions that persons studying genealogy and history need to find. ""

America's Voucher Politics - Ursula Hackett 2020-04-30

What explains the explosive growth of school vouchers in the last two decades? In *America's Voucher Politics*, Ursula Hackett shows that the voucher movement is rooted in America's foundational struggles over religion, race, and the role of government versus the private sector.

Drawing upon original datasets, archival materials, and more than one hundred interviews, Hackett shows that policymakers and political advocates use strategic policy design and rhetoric to hide the role of the state when their policy goals become legally controversial. For over sixty years of voucher litigation, white supremacists, accommodationists, and individualists have deployed this strategy of attenuated governance in court. By learning from previous mistakes and anticipating downstream effects, policymakers can avoid painful defeats, gain a secure legal footing, and entrench their policy commitments despite the surging power of rivals. An ideal case study, education policy reflects multiple axes of conflict in American politics and demonstrates how policy learning unfolds over time.

Education in the Marketplace - Kevin Currie-Knight 2019-04-12

This book offers an intellectual history of the libertarian case for markets in education. Currie-Knight tracks the diverse and evolving arguments libertarians have made, with each chapter devoted to a different libertarian thinker, their reasoning and their impact. What are the issues libertarians have had with state-controlled public schooling? What have been the libertarian voices on the benefits of markets in education? How have these thinkers interacted with law and policy? All of these questions are considered in this important text for those interested in debates over market mechanisms in education and those who are keen to understand how those arguments have changed over time.

Pathways to Privatization in Education - Joseph Murphy 1998

Voting as a Christian: The Social Issues - Wayne A. Grudem 2012-02-07

Written not by a journalist or politician but rather by a theology professor with a Ph.D. in New Testament studies, *Voting as a Christian: The Social Issues* begins with the assumption that God intended the Bible to give guidance to every area of life—including how governments should function. Derived from author Wayne Grudem's magisterial *Politics According to the Bible*, this book highlights those social issues that have dominated political debate recently. Throughout, author Wayne Grudem supports political positions that would be called more "conservative" than "liberal." However, "it is important to understand that I see these positions as flowing out of the Bible's teachings rather than positions I hold prior to, or independently of, those biblical teachings," he writes. "My primary purpose in the book is not to be liberally or conservative, or Democrat or Republican, but to explain a biblical worldview and a biblical perspective on issues of politics, law, and government." Concise yet carefully argued, this book is a must-read for any Christian concerned about current debates over social issues such as abortion, education, homosexual marriage, pornography, religious freedom, and others. Not every reader will agree with the book's conclusions. But by grounding his analysis deeply on Scripture, Grudem has equipped Christians to better understand and respond to some of today's key political debates wisely and in a manner consistent with their primary

citizenship as members and ambassadors of the kingdom of God.

The Fight for Local Control - Campbell F. Scribner 2016-05-12

Throughout the twentieth century, local control of school districts was one of the most contentious issues in American politics. As state and federal regulation attempted to standardize public schools, conservatives defended local prerogative as a bulwark of democratic values. Yet their commitment to those values was shifting and selective. In *The Fight for Local Control*, Campbell F. Scribner demonstrates how, in the decades after World War II, suburban communities appropriated legacies of rural education to assert their political autonomy and in the process radically changed educational law. Scribner's account unfolds on the metropolitan fringe, where rapid suburbanization overlapped with the consolidation of thousands of small rural schools. Rural residents initially clashed with their new neighbors, but by the 1960s the groups had rallied to resist government oversight. What began as residual opposition to school consolidation would transform into campaigns against race-based busing, unionized teachers, tax equalization, and secular curriculum. In case after case, suburban conservatives carved out new rights for local autonomy, stifling equal educational opportunity. Yet Scribner also

provides insight into why many conservatives have since abandoned localism for policies that stress school choice and federal accountability. In the 1970s, as new battles arose over unions, textbooks, and taxes, districts on the rural-suburban fringe became the first to assert individual choice in the form of school vouchers, religious exemptions, and a marketplace model of education. At the same time, they began to embrace tax limitation and standardized testing, policies that checked educational bureaucracy but bypassed local school boards. The effect, Scribner concludes, has been to reinforce inequalities between districts while weakening participatory government within them, keeping the worst aspects of local control in place while forfeiting its virtues.

Freedom of Choice: Vouchers in American Education - Jim Carl 2011-09-13

This book reveals that, far from being the result of a groundswell of support for parental choice in American education, the origins of school vouchers are seated in identity politics, religious schooling, and educational entrepreneurship. • Case studies describe, explain, and compare the origins of school vouchers in four states: Louisiana, New Hampshire, Ohio, and Wisconsin • Interviews with key participants in the debates over school vouchers, including Christopher Jencks and the late Milton Friedman • Eight tables and graphs detail demographic and educational changes in New Orleans, Milwaukee, and Cleveland • Four maps show the locations of voucher schools and programs in New Orleans, New Hampshire, Milwaukee, and Cleveland • Photographs of student and parent supporters of school vouchers • A bibliography of primary and secondary sources in urban history, history of education,

and educational policy studies

Wall Street, Main Street, and the Side Street - Julianne Malveaux 1999

Here is a collection of 100 thought-provoking, hard-hitting essays that excite, inspire, and invigorate. With sly wit and profound irony, the essays explore the contradictions of African Americans, feminists, nationalists, conservatives, and others while diminishing cherished assumptions about American culture, gender, politics, and economics. Though many may not agree with the thesis of the book -- everything is economic -- the book will demand an audience as long as the gender gap exists, as long as people of color are perched at the periphery of our society's economic life, and as long as there is political disenfranchisement.
