Modern East Asia details the history of the region while recognizing the intellectual, religious, artistic, economic and scientific contributions East Asians have made to the contemporary world. The three national narratives of China, Japan and Korea are told separately within each chapter, and the text emphasizes connections among them as well as the unique evolution of each society, allowing readers to experience the individual countries' histories as well as the region's history as a whole. The text takes into consideration the radical changes in the field of history in the past 40 years, as the authors have incorporated scholarship in areas such as gender studies, social history and minority histories. **The Emergence Of Modern Southeast Asia** - Norman G. Owen 2005-01-01

The modern states of Indonesia, Vietnam, Thailand, the Philippines, Myanmar, Malaysia, Singapore, Cambodia, Laos, Brunei, and East Timor were once a tapestry of kingdoms, colonies, and smaller polities linked by sporadic trade and occasional war. By the end of the nineteenth century, however, the United States and several European powers had come to control almost the entire region - only to depart dramatically in the decades following World War II. perspective on this complex region. Although it does not neglect nation-building (the central theme of its popular and long-lived predecessor, *In Search of Southeast Asia*), the present work focuses on economic and social history, gender, and ecology. It describes the long-term impact of global forces on the region and traces the spread and interplay of capitalism, nationalism, and socialism. It acknowledges that modernization has produced substantial gains in such areas as life expectancy and education but has also spread dislocation and misery. Organizationally, the book shifts between thematic chapters that describe social, economic, and cultural change, and country chapters emphasizing developments within specific areas. will establish a new standard for the history of this dynamic and radically transformed region of the world.

*Religion and the Making of Modern East Asia* - Thomas David DuBois 2011-04-18

Religious ideas and actors have shaped Asian cultural practices for millennia and have played a decisive role in charting the course of its history. In this engaging and informative book, Thomas David DuBois sets out to explain how religion has influenced the political, social, and economic transformation of Asia from the fourteenth century to the present. Crossing a broad terrain from Tokyo to Tibet, the book highlights long-term trends and key moments, such as the expulsion of Catholic missionaries from Japan, or the Taiping Rebellion in China, when religion dramatically transformed the political fate of a nation. *Gender, Health, and History in Modern East Asia* - Angela Ki Che Leung 2017-11-22

This groundbreaking volume captures and analyzes the exhilarating and at times disorienting experience when scientists, government officials, educators, and the general public in East Asia tried to come to terms with the introduction of Western biological and medical sciences to the region. The nexus of gender and health is a compelling theme, for this is an area in which private lives and personal characteristics encounter the interventions of public policies. The nine empirically based studies by scholars of history of medicine, sociology, anthropology, and STS (science, technology, and society), spanning Japan, Korea, China, Taiwan, and Hong Kong from the 1870s to the present, demonstrate just how tightly concerns with gender and health have been woven into the enterprise of modernization and nation-building throughout the long twentieth century. The concepts of "gender" and "health" have become so commonly used that one might overlook that they are actually complicated notions with vexed histories even in their native contexts. Transposing such terminologies into another historical or geographical dimension is fraught with problems, and what makes the East Asian cases in this volume particularly illuminating is that they present concepts of gender and health in motion. The studies show how individuals and societies made sense of modern scientific discourses on diseases, body, sex, and reproduction, redefining existing terms in the process and adopting novel ideas to face new challenges and demands. "Whether reviewing the comparative national histories of birth control, debating early cases of transsexual surgery, or highlighting the resurgence of 'traditional' Asian medical commodities, this volume provides accessible and productive studies on these intriguing topics in Asia. Scholars of modern East Asia and indeed anyone concerned with the analysis of gender and health in light of intersecting postcolonial studies will find the book rewarding." —Rayna Rapp, New York University "A bold and important volume that explores the interweaving of gender, body, and modernity throughout East Asia. With vivid articles on sexuality, reproductive technologies, and sexual identities, the book opens multiple possibilities for how 'Asia as method' can shine new light on persistent theoretical questions from biopower to biocitizenship." —Ruth Rogaski, Vanderbilt University

"There could only be a few winners, and a lot of losers. And yet we played on, because we had hope that we might be the lucky ones." In the early 1900s, teenaged Sunja, the adored daughter of a crippled fisherman, falls for a wealthy stranger at the seashore near her home in Korea. He promises her the world, but when she discovers she is pregnant--and that her lover is married--she refuses to be bought. Instead, she accepts an offer of marriage from a gentle, sickly minister passing through on his way to Japan. But her decision to abandon her home, and to reject her son's powerful father, sets off a dramatic saga that will echo down through the generations. Richly told and profoundly moving, *Pachinko* is a story of love, sacrifice, ambition, and loyalty. From bustling street markets to the halls of Japan's finest universities to the pachinko parlors of the criminal underworld, Lee's complex and passionate characters--strong, stubborn women, devoted sisters and sons, fathers shaken by moral crisis--survive and thrive against the indifferent arc of history. \*Includes reading group guide\*

*Disease, Colonialism, and the State* - Ka-che YIP 2009-01-01

Studying malaria in modern East Asia in the context of the global history of the disease, this book fills an important gap in our understanding of the cultural, social, economic, and political dimensions of the relationship between malaria and human society in a region which has often been neglected by historians of the disease. The authors examine the development and consequences of various anti-malaria strategies in Hong Kong, Okinawa, Taiwan, mainland China, and East Asia as a whole. The British and Japanese colonial models of disease control are explored, as is the later American technological model of DDT residue spraying, promoted by the Rockefeller Foundation which played a significant role in the global anti-malaria campaign and the development of public health in Asia. In the post- World War II period, the use of DDT and international political and economic interests helped to shape anti-malaria policies of the Nationalist government in Taiwan. In mainland China, the Beijing government's mass mobilization and primary health care model of anti-malaria control has given way to new strategies as recent changes in the health care system have affected anti-malaria efforts and public health developments. This book illuminates an important and largely unexplored dimension of the history of malaria: the interplay of the state (colonial or sovereign), international interests, new medical knowledge and technology, changing concepts of health and disease, as well as local society in the formulation and implementation of anti-malaria policies. It will be of interest to historians of colonialism, medicine and public health, Asia, as well as health and social policy planners.

*The Making of South East Asia* - G. Coedes 1983

**Archaeology of East Asia** - Gina L. Barnes 2015-10-31

Archaeology of East Asia constitutes an introduction to social and political development from the Palaeolithic to 8th-century early historic times. It takes a regional view across China, Korea, Japan and their peripheries that is unbounded by modern state lines. This viewpoint emphasizes how the region drew on indigenous developments and exterior stimuli to produce agricultural technologies, craft production, political systems, religious outlooks and philosophies that characterize the civilization of historic and even modern East Asia. This book is a complete rewrite and update of *The Rise of Civilization in East Asia*, first published in 1993. It incorporates the many theoretical, technical and factual advances of the last two decades, including DNA, gender, and isotope studies, AMS radiocarbon dating and extensive excavation results. Readers of that first edition will find the same structure and topic progression. While many line drawings have been retained, new color illustrations abound. Boxes and Appendices clarify and add to the understanding of unfamiliar technologies. For those seeking more detail, the Appendices also provide case studies that take intimate looks at particular data and current research. The book is suitable for general readers, East Asian historians and students, archaeology students and professionals. Praise for *The Rise of Civilization in East Asia*: "... the best English introduction to the archaeology of East Asia ... brilliantly integrates the three areas into a broad regional context." Prof. Mark Hudson

*Beyond Alterity* - Qinna Shen 2014

With the economic and political rise of East Asia in the second half of the twentieth century, many Western countries have re-evaluated their links to their Eastern counterparts. Thus, in recent years, Asian German Studies has emerged as a promising branch within interdisciplinary German Studies. This collection of essays examines German-language cultural production pertaining to modern China and Japan, and explicitly challenges orientalist notions by proposing a conception of East and West not as opposites, but as complementary elements of global culture, thereby urging a move beyond national paradigms in cultural studies. Essays focus on the mid-century German-Japanese alliance, Chinese-German Leftist collaborations, global capitalism, travel, identity, and cultural hybridity. The authors include historians and scholars of film and literature, and employ a wide array of approaches from postcolonial, globalization, media, and gender studies. The collection sheds new light on a complex and ambivalent set of international relationships, while also testifying to the potential of Asian German Studies.

*A New Modern History of East Asia* - Eckhardt Fuchs 2017-12-04

For decades, historians and societal forces have campaigned for rapprochement, reconciliation and dialogue between East Asian nations. This book is a result of these efforts. Debates regarding the interpretation of the modern history of East Asia continue to affect bilateral relations between the states of the region. History education has become a particularly controversial issue in this context. This book's main message is that a common understanding regarding the history of East Asia is possible, even though some differences remain. It is not only a major contribution to reconciliation in the region, but as the first textbook on the history of East Asia written collaboratively by scholars from three East Asian countries, it is also highly recommended for use in an anglophone teaching environment. The authors are a group of historians, teachers and concerned citizens from China, Japan and South Korea.

Important themes and topics woven through the text include Confucianism, writing and language, the role of the state in gender construction, nationalism, sexuality and prostitution, New Women and Modern Girls, feminisms, "comfort" women, and imperialism. **East Asia Before the West** - David C. Kang 2012

From the founding of the Ming dynasty in 1368 to the start of the Opium Wars in 1841, China has engaged in only two large-scale conflicts with its principal neighbors, Korea, Vietnam, and Japan. These four territorial and centralized states have otherwise fostered peaceful and long-lasting relationships with one another, and as they have grown more powerful, the atmosphere around them has stabilized. Focusing on the role of the "tribute system" in maintaining stability in East Asia and fostering diplomatic and commercial exchange, Kang contrasts this history against the example of Europe and the East Asian states' skirmishes with nomadic peoples to the north and west. Scholars tend to view Europe's experience as universal, but Kang upends this tradition, emphasizing East Asia's formal hierarchy as an international system with its own history and character. His approach not only recasts common understandings of East Asian relations but also defines a model that applies to other hegemonies outside of the European order.

**Buddhist Dynamics in Premodern and Early Modern Southeast Asia** - D Christian Lammerts 2015-07-13

The study of historical Buddhism in premodern and early modern Southeast Asia stands at an exciting and transformative juncture. Interdisciplinary scholarship is marked by a commitment to the careful examination of local and vernacular expressions of Buddhist culture as well as to reconsiderations of long-standing questions concerning the diffusion of and relationships among varied texts, forms of representation, and religious identities, ideas, and practices. The twelve essays in this collection, written by leading scholars in Buddhist Studies and Southeast Asian history, epigraphy, and archaeology, comprise the latest research in the field to deal with the dynamics of mainland and (pen)insular Buddhism between the sixth and nineteenth centuries C.E. Drawing on new manuscript sources, inscriptions, and archaeological data, they investigate the intellectual, ritual, institutional, sociopolitical, aesthetic, and literary diversity of local Buddhisms, and explore their connected histories and contributions to the production of intraregional and transregional Buddhist geographies.

*A History of East Asia* - Charles Holcombe 2017-01-11

Charles Holcombe begins by asking the question 'what is East Asia?' In the modern age, many of the features that made the region - now defined as including China, Japan, Korea and Vietnam - distinct have been submerged by the effects of revolution, politics or globalization. Yet, as an ancient civilization, the region had both an historical and cultural coherence. This shared past is at the heart of this ambitious book, which traces the story of East Asia from the dawn of history to the twenty-first century. The second edition has been imaginatively revised and expanded to place emphasis on cross-cultural interactions and connections, both within East Asia and beyond, with new material on Vietnam and modern pop culture. The second edition also features a Chinese character list, additional maps and new illustrations.

*Making Borders in Modern East Asia* - Nianshen Song 2018-04-30

Until the late nineteenth century, the Chinese-Korean Tumen River border was one of the oldest, and perhaps most stable, state boundaries in the world. Spurred by severe food scarcity following a succession of natural disasters, from the 1860s, countless Korean refugees crossed the Tumen River border into Qing-China's Manchuria, triggering a decades-long territorial dispute between China, Korea, and Japan. This major new study of a multilateral and multiethnic frontier highlights the competing state- and nation-building projects in the fraught period that witnessed the Sino-Japanese War, the Russo-Japanese War, and the First World War. The power-plays over land and people simultaneously promoted China's frontier-building endeavours, motivated Korea's nationalist imagination, and stimulated Japan's colonialist enterprise, setting East Asia on an intricate trajectory from the late-imperial to a situation that, Song argues, we call modern.

*Asia as Method* - Kuan-Hsing Chen 2010-03-26

Centering his analysis in the dynamic forces of modern East Asian history, Kuan-Hsing Chen recasts cultural studies as a politically urgent global endeavor. He argues that the intellectual and subjective work of decolonization begun across East Asia after the Second World War was stalled by the cold war. At the same time, the work of deimperialization became impossible to imagine in imperial centers such as Japan and the United States. Chen contends that it is now necessary to resume those tasks, and that decolonization, deimperialization, and an intellectual undoing of the cold war must proceed simultaneously. Combining postcolonial studies, globalization studies, and the emerging field of "Asian studies in Asia," he insists that those on both sides of the imperial divide must assess the conduct, motives, and consequences of imperial histories. Chen is one of the most important intellectuals working in East Asia today; his writing has been influential in Taiwan, South Korea, Hong Kong, Japan, Singapore, and mainland China for the past fifteen years. As a founding member of the Inter-Asia Cultural Studies Society and its journal, he has helped to initiate change in the dynamics and intellectual orientation of the region, building a network that has facilitated inter-Asian connections. *Asia as Method* encapsulates Chen's vision and activities within the increasingly "inter-referencing" East Asian intellectual community and charts necessary new directions for cultural studies.
