Weeds - Helen Hiebert 2006-01-01

Handmade paper has a unique texture and an individual quality that makes it not only a surface to write or print on, but also an object of beauty. With a small investment in equipment (or the supplies to make it from scratch), a small harvest of backyard weeds or garden plants, and the guidance of papermaking expert Helen Hiebert, anyone can make exquisite papers right in the home kitchen. Hiebert's basic papermaking techniques, laid out in illustrated step-by-step instructions, make it easy to blend and shape a variety of organic papers from such common plants as hosta, milkweed, and thistle, as well as the more unusual pineapple, yucca, and seaweed. She describes how to collect, harvest, and process the plant fibers and then create sheets using both Western and Japanese techniques. Inspired by the community of papermaking artists she is a part of, Hiebert features profiles of papermakers from around the world, highlighting their individual tips and techniques. She also includes project instructions for using handmade paper to create one-of-a-kind cards and envelopes, multi-paneled lampshades, and accordion-fold books. There are also instructions for embellishing techniques such as adding flower petals, creating collages, and dyeing with richly colored walnut shells. From plant to finished paper, the simple completeness and beauty of Papermaking with Garden Plants & Common Weeds will appeal to craftspeople, gardeners, environmentalists, teachers, and anyone who enjoys creating from nature.

Working with Paper - Carla Bittel 2019-06-18

Working with Paper builds on a growing interest in the materials of science by exploring the gendered uses and meanings of paper tools and technologies, considering how notions of gender impacted paper practices and in turn how paper may have structured knowledge about gender. Through a series of dynamic investigations covering Europe and North America and spanning the early modern period to the twentieth century, this volume breaks new ground by examining material histories of paper and the gendered worlds that made them. Contributors explore diverse uses of paper—from healing to phrenological analysis to model making to data processing—which often occurred in highly gendered, yet seemingly divergent spaces, such as laboratories and kitchens, court rooms and boutiques, ladies' chambers and artisanal workshops, founding houses and colonial hospitals, and college gymnasiums and state office buildings. Together, they reveal how notions of masculinity and femininity became embedded in and expressed through the materials of daily life. Working with Paper uncovers the intricate negotiations of power and difference underlying epistemic practices, forging a material history of knowledge in which quotidian and scholarly practices are intimately linked.

Salt - Mark Kurlansky 2011-03-18

From the award-winning and bestselling author of *Cod* comes the dramatic, human story of a simple substance, an element almost as vital as water, that has created fortunes, provoked revolutions, directed economies and enlivened our recipes. Salt is common, easy to obtain and inexpensive. It is the stuff of kitchens and cooking. Yet trade routes were established, alliances built and empires secured - all for something that filled the oceans, bubbled up from springs, formed crusts in lake beds, and thickly veined a large part of the Earth's rock fairly close to the surface. From pre-history until just a century ago - when the mysteries of salt

were revealed by modern chemistry and geology - no one knew that salt was virtually everywhere. Accordingly, it was one of the most sought-after commodities in human history. Even today, salt is a major industry. Canada, Kurlansky tells us, is the world's sixth largest salt producer, with salt works in Ontario playing a major role in satisfying the Americans' insatiable demand. As he did in his highly acclaimed *Cod*, Mark Kurlansky once again illuminates the big picture by focusing on one seemingly modest detail. In the process, the world is revealed as never before.
