Indonesian Law - Tim Lindsey
2018-09-06

Indonesia has a growing population of almost 300 million people, it is increasingly involved in world affairs, and has a booming economy. The need to better understand its unique, complex, and often obscure legal system, has become pressing. This is true across a wide range of sectors

including, but not limited to, trade and investment, crime and terrorism, and human rights. Indonesia's democratization after the fall of Soeharto in 1998 triggered massive social and political changes that opened up this diverse, and formerly tightly-controlled, society. Law reform was a key driver of Indonesia's transformation and its full effect remains to be seen. This

book offers clear and detailed explanations of the foundations of Indonesia's legal system in the context of its legal reform and rapid development. It offers succinct commentaries on a wide range of issues, examining the judicial process, the constitution, corruption and the court system, contract law, administrative law, foreign investment, taxation, Islamic law, and family law. It examines current substantive law and judicial interpretation and presents case studies of how the system operates in practice. Written in an accessible and engaging style, this book is an essential guide for readers seeking quick and clear answers to questions regarding the law and its application in Indonesia.

Landmark Cases in Family

Law - Stephen Gilmore

2011-07-01

There are a number of important (landmark) cases in the development of Family Law in England and Wales that deserve detailed examination and lend themselves particularly well to historical

examination. Family law cases tend to raise highly controversial issues, often on striking facts, frequently provoking wider social debate and/or extensive publicity. Consequently, the landmark cases chosen for this collection provide considerable scope, not only for doctrinal analysis and explanation of the importance and impact of the decisions, but also for in-depth examination of the social or policy developments that influenced them. The stories behind the cases provide a fascinating insight into the complexities of family life and the drama that can be found in the family courts. In recent years, Family Law has seen enormous changes in law's engagement with the notion of 'family', with the enactment, for example, of the Civil Partnership Act 2004, the Gender Recognition Act 2004 and, more recently, the Human Fertilisation and Embryology Act 2008. As we begin to move forward into the new millennium, this is an excellent time to engage in detailed

analyses and 'stock-taking' of the landmark decisions, many of which were decided in the 1970s, and which have shaped modern Family Law. This book provides a series of in-depth studies of the key leading cases, and will be of interest to students and lecturers alike.

The Invisible Constitution in Comparative Perspective - Rosalind Dixon 2018-06-30

Constitutions worldwide inevitably have 'invisible' features: they have silences and lacunae, unwritten or conventional underpinnings, and social and political dimensions not apparent to certain observers. *The Invisible Constitution in Comparative Perspective* helps us understand these dimensions to contemporary constitutions, and their role in the interpretation, legitimacy and stability of different constitutional systems. This volume provides a nuanced theoretical discussion of the idea of 'invisibility' in a constitutional context, and its relationship to more traditional understandings of written

versus unwritten constitutionalism. Containing a rich array of case studies, including discussions of constitutional practice in Australia, Canada, China, Germany, Hong Kong, Israel, Italy, Indonesia, Ireland and Malaysia, this book will look at how this aspect of 'invisible constitutions' is manifested across different jurisdictions.

Eritrea and Ethiopia -

Tekeste Negash 2019-09-30

The Ethiopian-Eritrean federation, a product of a United Nations resolution, came into existence in 1952 and was abolished ten years later. The primary objective of this book is to examine the rise and the fall of the federation in the light of present-day realities. This central theme is placed in context by a reconstruction of Eritrean political organizations during the crucial postwar years. The work includes a short account of the war between Eritrean nationalist forces and the Ethiopian government, which led up to the emergence of Eritrea as a sovereign state.

Based primarily on archival sources at the Public Record Office in London, Eritrea and Ethiopia argues that no other group in the region has repeatedly succeeded in shaping its political destiny as the Tigreans of Eritrea have. Negash maintains that the federation was abolished by Eritrean social and political forces rather than by Ethiopia. The UN-imposed federation, together with its accompanying constitution, were doomed to fail, as these were foreign to Eritrean and Ethiopian conceptions of political power. The attempts of the Eritrean Moslem League to defend and maintain the federation were frustrated by internal contradictions, by the Unionist party, and by misconstrued perceptions of the division of powers between Eritrea and Ethiopia. The author looks closely at the impact of the British period on Eritrean society. Such an examination provides a better understanding of the background to the conflict and it is an important part of

Eritrean political and social history. This book is the story of the slow but steady dissolution of the federation as seen and observed by the British diplomatic corps. Between 1952 and 1962, there were about thirty British nationals assigned to the Eritrean government. These expatriates kept in touch with the British consulate-general whose responsibility was to protect the interests of British nationals as well as to report developments to London. The conclusions and interpretations found in this book are, to a great extent, based on that documentation. Eritrea and Ethiopia is the first study of its kind to follow the rise and fall of the federation. It will be a challenging and insightful read for students of African affairs, diplomatic historians, policy studies scholars, and political theorists.

Abdolhossein Hemmati Sarapardeh 2020-08-26 Applications of Artificial Intelligence Techniques in the Petroleum Industry gives engineers a critical resource to help them understand the machine learning that will solve specific engineering challenges. The reference begins with fundamentals, covering preprocessing of data, types of intelligent models, and training and optimization algorithms. The book moves on to methodically address artificial intelligence technology and applications by the upstream sector, covering exploration, drilling, reservoir and production engineering. Final sections cover current gaps and future challenges. Teaches how to apply machine learning algorithms that work best in exploration, drilling, reservoir or production engineering Helps readers increase their existing knowledge on intelligent data modeling, machine learning and artificial intelligence, with foundational chapters covering the preprocessing of data and

training on algorithms Provides tactics on how to cover complex projects such as shale gas, tight oils, and other types of unconventional reservoirs with more advanced model input

World Development Report 1978 - 1978

This first report deals with

some of the major development issues confronting the developing countries and explores the relationship of the major trends in the international economy to them. It is designed to help clarify some of the linkages between the international economy and domestic strategies in the developing countries against the background of growing interdependence and increasing complexity in the world economy. It assesses the prospects for progress in accelerating growth and alleviating poverty, and identifies some of the major policy issues which will affect these prospects.

Alain A. Levasseur 2021
"For over eighty years, the Association Henri Capitant has endeavored to spread, update, and promote "continental law," or the law of the European continent. In pursuance of these objectives, the Association has decided to create the "Library of the Association Henri Capitant." The many different groups of the Association have been asked to outline and explain the most salient features of their legal system in a series of books, written in French, structured around a uniform table of contents and within a set limit of pages. Thereby, a reader will be able to know and compare the foundations and fundamental features of each one of these legal systems. With this purpose in mind, The Legal System of Québec, like the other books in this collection, presents to the reader the main features of the history of its legal system, its sources of law, its constitutional framework, its legal actors, its criminal law, its law of persons, family law,

property law, law of contract, law on delictual liability, quasi-contracts, business entities, and labor-employment law"--

A Call for Judgment - Amar Bhide 2010-10-01
Our prosperity requires the enterprise of innumerable individuals and businesses who exercise their imagination and judgment-and bear responsibility for outcomes. And widespread enterprise is fostered through dialogue and relationships, not merely prices in anonymous markets. Yet modern finance blatantly neglects these necessary

Downloaded from
omahafoodtruckassociation.org
on by guest

elements for enterprise. In the last several decades finance has become increasingly centralized, distanced, and mechanistic. Instead of many lending officers making judgments about borrowers they know, credit decisions are the output of the models of a few Wall Street wizards and credit agencies. This robotic centralized finance stifles the dynamism of the real economy and leads to recurring collapses. *A Call for Judgment* clearly explains how bad theories and mis-regulation have caused a dangerous divergence between the real economy and finance. In simple language Bhid? takes apart the so-called advances in modern finance, showing how backward-looking, top-down models were used to mass-produce toxic products. Thanks to excessively tight securities laws and loose banking laws, anonymous transactions have displaced relationship-based finance. And Bhid? offers, tough simple rules for restoring relationships and case-by-case judgment: limit

banks--and all deposit taking institutions--to basic lending and nothing else. *A Call for Judgment* is both a primer on the role of finance in a dynamic modern economy, and a cautionary tale about the pitfalls of banks functioning as highly centralized, mechanistic entities. It is essential reading for anyone interested in bringing the economy back to a point at which decisions can be made that foster organic economic growth without the potentially disastrous risks currently accepted by modern finance.

for those interested in problems of cross-cultural education as well as in Ethiopia." -- Herbert S. Lewis, Professor Emeritus, Department of Anthropology, University of Wisconsin-Madison Children play a vital role as a source of information on politics but have been neglected as political actors in research contexts. In this study, children are used as a window to an Ethiopian society where hierarchical relations persist, despite the numerous political and administrative transformations of the past century. With data gathered through participant observation the book examines how young, Addis Abeba school children learn to adapt to and reproduce relations of superordination or subordination based on gender, age, strength and social position. The children's experiences are viewed in the historical context of state-citizen relations where hierarchy and obsession with control have been and continue to be dominant. The discussion

focuses on the power of continuity in the reproduction of cultural patterns and political behaviour, and on how change towards more egalitarian relations could come about.

This publication provides an overview of the work of the UNECE Sustainable Transport Division in supporting countries to overcome challenges faced by their inland transport systems related to the COVID-19 pandemic. Covering five thematic areas, it assesses the different impacts for each area and provides an overview of policy support measures in each of these fields, as provided by the Division: 1. Border Crossing Facilitation; 2. Transport trends and economics; 3. Intermodal transport and logistics; 4. Dangerous goods; 5. Vehicles regulations. The publication also provides an overview of a number of national, regional and international policy responses as developed by Governments, partner organisations such as WHO, WCO, EC etc. as well as the private sector in the wake of the pandemic. Finally, it provides a set of general recommendations and possible areas for further work in strengthening inland transport

systems' resilience to and preparedness for (future) pandemics.

One People, One Blood - Don Seeman 2010

Today, along with those Ethiopians who have been recognized as Jews by the State of Israel, many who are called Feres Mura, the descendants of Ethiopian Jews who have now reasserted their Jewish identity, still await full acceptance in Israel. Since the 1990s, they have sought homecoming through Israel's Law of Return, but have been met with reticence and suspicion on a variety of fronts. This book documents this tenuous relationship and the challenges facing the Feres Mura.

Women as Constitution-Makers - Ruth Rubio-Marín 2019-03-28

That a constitution should express the will of 'the people' is a long-standing principle, but the identity of 'the people' has historically been narrow.

Women, in particular, were not included. A shift, however, has recently occurred. Women's participation in constitution-making is now recognised as a democratic right. Women's

demands to have their voices heard in both the processes of constitution-making and the text of their country's constitution, are gaining recognition. Campaigning for inclusion in their country's constitution-making, women have adopted innovative strategies to express their constitutional aspirations. This collection offers, for the first time, comprehensive case studies of women's campaigns for constitutional equality in nine different countries that have undergone constitutional transformations in the 'participatory era'. Against a richly-contextualised historical and political background, each charts the actions and strategies of women participants, both formal and informal, and records their successes, failures and continuing hopes for constitutional equality.

Responsible Man - Anders Hjort 1991

The book touches upon how the Atmaan Beja have survived over the last hundred years on their scarce resources by using mixed strategies: of herding and cultivation, of moving between urban and rural settings in order to supplement these activities with wage-labouring, and also of involving themselves in commercial enterprises. Such diversifying approaches to subsistence are frequent among pastoralists. It is characteristic of the Beja and other people in the arid regions of Africa that their subsistence requires continuous involvement in several mutually supplementing activities. When they are not able to invest the needed amount of labour, or if the time schedule for the different activities is put out of sequence, the consequences can be devastating. The process whereby "traditional" Atmaan life has become gradually more difficult to live, culminating in the 1984-86

disaster, is linked to changes in their position in relation to the Sudanese economy as a whole, and to Sudan's place in international trade. But it is also kinked to the general desiccation of the African Sahel.

Freedom in the World 2005 - Freedom House 2005

Freedom in the World, the Freedom House flagship survey whose findings have been published annually since 1972, is the standard-setting comparative assessment of global political rights and civil liberties. The survey ratings and narrative reports on 192 countries and a group of select territories are used by policy makers, the media, international corporations, and civic activists and human rights defenders to monitor trends in democracy and track improvements and setbacks in freedom worldwide. Press accounts of the survey findings appear in hundreds of influential newspapers in the United States and abroad and form the basis of numerous radio and television reports.

The Sumerians - Samuel Noah Kramer
2010-09-17

The Sumerians, the pragmatic and gifted people who preceded the Semites in the land first known as Sumer and later as Babylonia, created what was probably the first high civilization in the history of man, spanning the fifth to the second millenniums B.C. This book is an unparalleled compendium of what is known about them. Professor Kramer communicates his enthusiasm for his subject as he outlines the history of the Sumerian civilization and describes their cities, religion, literature, education, scientific achievements, social structure, and psychology. Finally, he

considers the legacy of Sumer to the ancient and modern world. "There are few scholars in the world qualified to write such a book, and certainly Kramer is one of them. . . . One of the most valuable features of this book is the quantity of texts and fragments which are published for the first time in a form available to the general reader. For the layman the book provides a readable and up-to-date introduction to a most fascinating culture. For the specialist it presents a synthesis with which he may not agree but from which he will nonetheless derive stimulation."—American Journal of Archaeology "An uncontested authority on the civilization of Sumer, Professor Kramer writes with grace and urbanity."—Library Journal

Weapons under International Human Rights Law - Stuart Casey-Maslen
2014-01-23
International human rights law offers an overarching

international legal framework to help determine the legality of the use of any weapon, as well as its lawful supply. It governs acts of States and non-State actors alike. In doing so, human rights law embraces international humanitarian law regulation of the use of weapons in armed conflict and disarmament law, as well as international criminal justice standards. In situations of law enforcement (such as counterpiracy, prisons, ordinary policing, riot control, and many peace operations), human rights law is the primary legal frame of reference above domestic criminal law. This important and timely book draws on all aspects of international weapons law and proposes a new view on international law governing weapons. Also included is a specific discussion on armed drones and cyberattacks, two highly topical issues in international law and international relations. *The Oxford Handbook of Late Antiquity* - Scott Fitzgerald Johnson 2015-11

Late antiquity extends from the accession of the Christian emperor Constantine to the rise of Muhammad and early Islam (ca. 300-700 AD). This volume takes account of the scholarship published in the last 30 years and provide a foundational synthesis for students of late antiquity.

Innovation and Transition in Law: Experiences and Theoretical Settings -

This book features a discussion on the modernisation of law and legal change, focusing on the key concepts of innovation" and "transition". These

concepts both appear to be relevant and poorly defined in contemporary legal science. A critical reflection on the heuristic value of these categories seems appropriate, particularly considering their dyadic value. While innovation is increasingly appearing in the present day as being the category in which one looks at the modernisation of law, the concept of transition also seems to be the privileged place of occurrence for such dynamics. This group of Italian and Brazilian scholars contributing to this volume intends to investigate such problems through an interdisciplinary prism. It includes points of view both internal to legal studies - such as the history of law, theory of law, constitutional law, private law and commercial law - and external, such as political philosophy and history of justice and political institutions.

Global Report on Psoriasis - World Health Organization

This WHO Global report on psoriasis brings the public health impact of psoriasis into focus. The report is written to help raise awareness of the range of ways that psoriasis can affect peoples' lives. It

Downloaded from
omahafoodtruckassociation.org

intends to empower policy-makers with practical solutions to improve the health care and social inclusion of people living with psoriasis in their populations. The report highlights that much of the suffering caused by this common and complex disease can be avoided. Improving access to early diagnosis and appropriate treatment for psoriasis requires universally accessible health-care systems that provide people-centered care for patients with complex, lifelong conditions.

Governments also have a key role to play in seeking to address the unnecessary social consequences of psoriasis by challenging the myths and behaviors that lead to the exclusion of patients from healthcare settings and daily life.

Drought characteristics and management in North Africa and the Near East

Food and Agriculture Organization of the United Nations 2018-06-19

The report assesses the occurrence and impacts of drought, the current policies

underlying drought management as well as the mitigation measures and responses adopted in the Near East and North Africa region, with a focus on the Agriculture Sector. It is the third of a series of similar studies carried out in different regions and countries of the world, with the objective of shedding light on drought effects, sensitizing policy-makers for the much needed paradigm shift to proactive drought management planning and providing guidance for the development of such policies. The studies are carried out by FAO, in collaboration with the Water for Food Institute, University of Nebraska-Lincoln, USA, as a direct contribution to FAO's Strategic Objective "increasing the resilience of livelihoods to disasters" and Strategic Objective "make agriculture, forestry and fisheries more productive and sustainable".

Election Interference - Jens David Ohlin 2020-06-30
Russian interference in the 2016 US presidential election produced the biggest political scandal in a generation, marking the beginning of an ongoing attack on democracy. In the run-up to the 2020 election, Russia was found to have engaged in more “information operations,” a practice that has been increasingly adopted by other countries. In *Election Interference*, Jens David Ohlin makes the case that these operations violate international law, not as a cyberwar or a violation of sovereignty, but as a profound assault on democratic values protected by the international legal order

under the rubric of self-determination. He argues that, in order to confront this new threat to democracy, countries must prohibit outsiders from participating in elections, enhance transparency on social media platforms, and punish domestic actors who solicit foreign interference. This important book should be read by anyone interested in protecting election integrity in

our age of social media disinformation.
