OECD Reviews of Integrity in Education: Ukraine 2017 - OECD 2017-03-27

Education in Ukraine is marked by integrity violations from early childhood education and care through postgraduate study. In the past decade policy makers and civic organisations have made progress in addressing these challenges. However, much remains to be done.

Politics of Quality in Education - Jaakko Kauko 2018-05-11

The question of quality has become one of the most important framing factors in education and has been of growing interest to international organisations and national policymakers for decades. *Politics of Quality in Education* focuses on Brazil, China, and Russia, part of the so-called emerging nations' BRICS block, and draws on a four-year project to develop a new theoretical and methodological approach. The book builds a comparative, sociohistorical, and transnational understanding of political relations in education, with a particular focus on the policies and practices of Quality Assurance and Evaluation (QAE). Tracking QAE processes from international organisations to individual schools, contributors analyse how QAE changes the dynamics in the roles of state, expertise, and governance. The book demonstrates how national and sub-national actors play a central role in the adaptation, modification or rejection of transnational policies. *Politics of Quality in Education* will be of great interest to academics, researchers and postgraduate students engaged in the study of comparative and international education, as well as educational policy and politics. It should also be essential reading for practitioners and policymakers. The School Law Answer Manual: 2014-15 Florida Edition - Douglas G. Griffin, Esq. 2014-08-08

Many school system stakeholders know that education legal matters are often dominated by employees, students, and special education. Mr. Griffin has spent vast amounts of time addressing each of these areas; working directly with administrators on a daily basis has afforded Mr. Griffin the opportunity to master all ranges of the spectrum. Most importantly, Mr. Griffin has dedicated his career to giving educators the highest quality legal and practical advice to help them navigate the complex modern framework of laws that govern what they do on a day-to-day basis. Whether the legal issue involves a student, parent, teacher, staff, administrator, or a combination of all of them, Mr. Griffin has almost certainly addressed it. In fact, that is why he wrote this book. He knows, first hand, that it is desperately needed.

The Impacts of Language and Literacy Policy on Teaching Practices in Ghana - Philomena Osseo-Asare 2021-03-16

This text critically examines changes in Ghanaian language and literacy policy following independence in 1957 to consider its impacts on early literacy teaching. By adopting a postcolonial theoretical perspective, the text interrogates the logic behind policy changes which have prioritised English, local language, or biliteracy. It draws on data from interviews with teachers and researcher observation to demonstrate how policies have influenced teaching and learning. Dr Osseo-Asare's findings inform the development of a conceptual framework which highlights the socio-cultural factors that impact the literacy and biliteracy of young children in Ghana, offering solutions to help teachers combat the challenges of frequent policy changes. This timely monograph will prove to be an essential resource not only for researchers working on education policies, teacher education, and English-language learning in postcolonial Ghana but also for those looking to identify the thematic and methodological nuances of studying literacy and education in

postcolonial contexts.

Schooling in the ASEAN Region - T. Neville Postlethwaite 2014-05-19

Schooling in the ASEAN Region evaluates primary and secondary education in Indonesia, Malaysia, the Philippines, Singapore, and Thailand. The book describes the type of present-day schooling in these countries and, to some extent, their cooperative efforts to pursue common goals. The text discusses the aims of schooling; the structure and process of schooling; and the cooperative education ventures present in the ASEAN region. The book describes the social conditions and government efforts toward developing education in each of the five countries. The text summarizes the historical background of the country as it relates to education, the quality and supply of teachers, the curriculum, administrative structure of the educational system, and some data on school enrollment. The book also notes the problems that are present in the educational system of each country, and the existence of non-formal education in some countries. The book then addresses the education trend and future of education. The last chapter then evaluates the performance and achievements of these five countries toward reaching the goals they had set. The book also lists the challenges that these countries face in the future, such as expanding educational needs, improved quality of learning, effective educational structure, administrative efficiency, teacher supply, and better intercountry cooperation. The text can prove informative for historians, educators, school administrators, government policymakers in education, and education students and professors.

Education in Tanzania in the Era of Globalisation - L.P. Lugalla 2019-03-29

Education in Tanzania in the Era of Globalisation Challenges and Opportunities is a product of papers presented at a National Education Conference held in Dodoma, Tanzania in November 2016 and organised by the Aga Khan University-Institute for Educational Development, East Africa (AKU-IED-EA). At present, Tanzania's development direction is guided by Vision 2025, which aims to achieve a high quality livelihood for its people. The attainment of Vision 2025 will depend largely on rapid socio-economic development based on several social and economic pillars including, most importantly, education. Clearly, for Tanzania, the scope and quality of education remains the single most important prerequisite to the attainment of Vision 2025 and the 17 Sustainable Development Goals (SDGs). The individual chapters in this publication, and their collective thrust, discuss the challenges in the education system in good faith and in the spirit of cooperation and collaboration guided by the belief that it is not the responsibility of the Government alone to see how these can be addressed. AKU IED EA has identified this as the responsibility of all well-meaning corporate bodies and citizens, and initiated this conference of its type as its contribution to this conference, as well as the publication, has to be seen as a model of good practice for universities in terms of sharing knowledge, experience, and practice with other stakeholders who are not in the academy, and more so, with politicians as well as government policy planners. The various authors of *Education in Tanzania in the Era of Globalisation Challenges and Opportunities* discuss issues within the context of the Tanzanian political economy against the effects of globalization and seek to initiate a new kind of debate that is long overdue; a debate aimed at charting out appropriate strategies whose objective is to improve the quality of education in Tanzania so that it becomes a useful vehicle in enhancing processes of social change, transformation and development.

Benefiting from Basic Education, School Quality and Functional Literacy in Kenya - T. O. Eisemon 2014-06-28

Studies of the retention of literacy and numeracy by adults who have only obtained primary schooling have given little encouragement to the belief that the cognitive effects of schooling are enduring for many school leavers. How these findings can be reconciled with the claims made for the importance of schooling as an instrument of social and economic change is the subject of investigation in this volume. The cognitive outcomes of literacy acquisition and secular schools in coastal Kenya are the focus of this ethnographic study, which stresses the relevance of an international understanding of the particular problems and dilemmas that face the educational systems of individual countries.

Unraveling the Assessment Industrial Complex - Michelle Tenam-Zemach 2021-03-16

This book offers a comprehensive critique of how the assessment industry and standardized testing adversely impact students, teachers, and society. The authors present the case that the interconnected developments of the testing industry and the Assessment Industrial Complex (AIC) have effectively anchored American schooling to testing. Using an antiracist lens, the authors deconstruct the AIC, exposing the neoliberal agenda of education reformers and how proponents utilize the rhetoric of testing, and the data extracted from them, to normalize the reliance on AIC systems. This critique further exposes education reformers' ideological agenda, their hypocrisy, and how they grossly profit from the AIC at the expense of society's marginalized and most vulnerable students. The CoVid-19 pandemic, society's racial unrest, and anti-testing movements have aligned to underscore the need to examine systemic oppression and the impact it has on society through our education system. This text exposes how standardized testing perpetuates these injustices and provides the opportunity to disrupt the systems they rely upon and bolster the societal resistance that is needed.

Handbook on the History of Mathematics Education - Alexander Karp 2014-01-25

This is the first comprehensive International Handbook on the History of Mathematics Education, covering a wide spectrum of epochs and civilizations, countries and cultures. Until now, much of the research into the rich and varied history of mathematics education has remained inaccessible to the vast majority of scholars, not least because it has been written in the language, and for readers, of an individual country. And yet a historical overview, however brief, has become an indispensable element of nearly every dissertation and scholarly article. This handbook provides, for the first time, a comprehensive and systematic aid for researchers around the world in finding the information they need about historical developments in mathematics education, not only in their own countries, but globally as well. Although written primarily for mathematics educators, this handbook will also be of interest to researchers of the history of education in general, as well as specialists in cultural and even social history.

Criteria for Awarding School Leaving Certificates - Frances M. Ottobre 2014-05-19

Criteria for Awarding School Leaving Certificates: An International Discussion focuses on formal and official evaluation of school learning and student achievement at the time schooling is discontinued. The book is based on the proceedings of the 1977 Conference of the International Association for Educational Assessment held at the Kenyatta Conference Center in Nairobi, Kenya on May 23-28, 1977. The selection first discusses school leaving examinations as a function of external and educational factors and the terms of reference for school leaving examinations. The book also takes a look at the comparability of grading standards in public examinations in England and Wales; basic assessment issues in school-leaving examination programs; and the case for school leaving examinations in The Netherlands. The text reviews the alternatives to school leaving examinations in Sweden and Brazil, as well as the abolition of final examination, transition from secondary school to higher education, and support structures. The book also ponders on the structure of secondary school system in Austria, Australia, Bermuda, Cyprus, Hong Kong, India, and Ireland. The selection is a dependable reference for readers interested in school learning and student achievement measurements.

Learning French oral skills using role play as a learning strategy: The kenyan experience - Odhiambo Oduke 2014-02-01

Role play and foreign language learning helps the learners to develop speaking skills within defined social contexts. Languages are always spoken within certain defined spacio-social context. The learning of French as a foreign language in Kenya takes cognizance that oral skills are important to facilitate competent communication in any given language. The Kenyan reality of learning oral French skills within a learning set-up in Kenyan secondary schools is well presented in this text. The salient challenges are also highlighted since language learning is normally not a smooth sail for the learner and for the teacher who plays a pivotal facilitation role in guiding the learner to imbibe the vital communicative skills in the

language that is being taught. On the whole role play is not just a language learning activity; it is an activity that provides impetus which propels human development in its entire gamut of activities. A conspicuous hint on the importance of role play in our daily lives is also presented in this text with some examples well presented and cited in this write-up. Stephen Kraschen's Montior Model on language acquisition and the Grounded Theory which helps to interpret social research findings have been used to analyze the data which was derived from the inquiry done in the Kenyan secondary schools. The classical importance of role play and simulation in the learning process has been well underscored in this particular text.

Employability via Higher Education: Sustainability as Scholarship - Alice Diver 2019-09-23

This book discusses the topic of graduate employability from the premise that in this era of 'massification,' economic austerity, and political uncertainties, higher education (HE) no longer guarantees a clear 'work place advantage.' Divided into three sections, the book offers theoretical and philosophical discourses on the 'HE quandary,' whilst taking into account - and critiquing - political, temporal, and national contexts. It culminates in an investigation into specific discipline areas. It offers insights into the way that institutions, decision-makers, academics, and professional support staff can work together towards ensuring that our graduates are able to cope with the varied demands and challenges of modern job markets. It harnesses arguments and reflections on the breadth and depth of the functions of HE, such as social transformation,

promoting principles of social justice, and providing opportunities. It grounds these in a triadic model for enhancing student engagement and holistic learning, namely, the emotional, cognitive, and behavioural aspects. As an anthology, it is forward-gazing in terms of the sustainability debate, whilst still offering evidence-based, research-grounded, practical suggestions to readers looking for tips and tools of the trade.

Community Participation with Schools in Developing Countries - Mikiko Nishimura 2020-08-04

The Sustainable Development Goals (SDGs) (2016-2030) set by the United Nations in 2015 restated the importance of universal primary education for all, and specifically discuss quality, equity, and inclusion in basic education. To achieve this, the role of community has been emphasized and participation has become a "buzzword" in international development over the past several decades. Despite the growing attention to community participation in school management, previous literature has shown mixed results in terms of its actual practice and its impacts on quality, equity, and inclusion in education. This book deepens the contextual understanding of community in developing countries and its involvement in schools in general, and its impact on quality, equity, and inclusion of school education in particular. By presenting various case studies in Asia, Africa, Latin America, and a post-conflict state in Europe, the book analyses commonalities and differences in the ways communities are involved and cast their impacts and challenges. The book contributes knowledge on the ways in which community involvement could work in developing countries, the detailed processes and factors that make community participation work in different dimensions, and remaining challenges that scholars and practitioners still need to be concerned and mindful in the field. This book will appeal to both researchers and practitioners who are concerned about the community participation approach for the SDGs.

World Yearbook of Education 2017 - Julie Allan 2016-12-01

This latest volume in the World Yearbook of Education series examines the relationship between assessment systems and efforts to advance equity in education at a time of growing inequalities. It focuses on the political motives behind the expansion of an assessment industry, the associated expansion of an SEN industry and a growth in consequential accountability systems. Split into three key sections, the first part is concerned with the assessment industry, and considers the purpose and function of assessment in policy and politics and the political context in which particular assessment practices have emerged. Part II of the book, on assessing deviance, explores those assessment and identification practices that seek to classify different categories of learners, including children with Limited English Proficiency, with special needs and disabilities and with behavioural problems. The final part of the book considers the consequences of assessment and the possibility of fairer and more equitable alternatives, examining the production of inequalities within assessment in relation to race, class, gender and disability. Discussing in detail the complex historical intersections of assessment and educational equity with particular attention to the implications for marginalised populations of students and their families, this volume seeks to provide reframings and reconceptualisations of assessment and identification by offering new insights into economic and cultural trends influencing them. Co-edited by two internationally renowned scholars, Julie Allan and Alfredo J. Artiles, World Yearbook of Education 2017 will be a valuable resource for researchers, graduates and policy makers who are interested in the economic trends of global education assessment.

Bilingualism and Bilingual Education: Politics, Policies and Practices in a Globalized Society - B. Gloria Guzmán Johannessen 2019-01-14

This volume presents a multinational perspective on the juxtaposition of language and politics. Bringing together an international group of authors, it offers theoretical and historical constructs on bilingualism and bilingual education. It highlights the sociocultural complexities of bilingualism in societies where indigenous and other languages coexist with colonial dominant and other prestigious immigrant languages. It underlines the linguistic diaspora and expansion of English as the world's lingua franca and their impact on indigenous and other minority languages. Finally, it features models of language teaching and teacher education. This book challenges the existent global conditions of non-dominant languages and furthers the discourse on language politics and policies. It does so by pointing out the need to change the bilingual/multilingual educational paradigm across nations and all levels of educational systems.

The Wiley International Handbook of Educational Leadership - Duncan Waite 2017-03-16

A provocative and authoritative compendium of writings on leadership in education from distinguished scholar-educators worldwide. What is educational leadership? What are some of the trends, questions, and social forces most relevant to the current state of education? What are the possible futures of education, and what can educational leadership contribute to these futures? To address these questions, and more, editors Duncan Waite and Ira Bogotch asked distinguished international thought leaders on education to share their insights, observations, and research findings on the nature of education and educational leadership in the global village. The Wiley International Handbook of Educational Leadership brings together contributions from authors in twenty-one countries, spanning six continents. Topics examined include leadership and aesthetics, creativity, eco-justice, advocacy, Big Data and technology, neoliberalism, emerging philosophies and theories, critical democracy, gender and radical feminism, political economies, emotions, postcolonialism, and new directions in higher education. A must-read for teachers, researchers, scholars, and policy makers, this Handbook: Champions radical pluralism over consensus and pseudoscientific or political solutions to problems in education Embraces social, economic, and political relevance alongside the traditions of careful and systematic rigor Challenges traditional epistemological, cultural, and methodological concepts of education and educational leadership Explores the field's historical antecedents and ways in which leadership can transcend the narrow disciplinary and bureaucratic constraints imposed by current research designs and methods Advances radically new

possibilities for remaking educational leadership research and educational institutions

Public Examinations Examined - Thomas Kellaghan 2019-11-19

High-stakes public examinations exert a dominant influence in most education systems. They affect both teacher and student behavior, especially at the middle and upper levels of secondary education. The content of past examinations tends to dictate what is taught and how it is taught and, more important, what is learned and how it is learned. By changing aspects of these examinations, especially their content and format, education systems can have a strong positive impact on teacher behavior and student learning, help raise student achievement levels, and better prepare students for tertiary-level education and for employment. Examination agencies, many of which have followed the same procedures over decades, can learn from the successes and failures of other systems. This book addresses current issues related to the development, administration, scoring, and usage of these high-stakes public examinations, identifying key issues and problems related to examinations in many emerging market economies as well as in advanced economies. The book's primary audience consists of public examination officials on national, regional, and state examination boards, but the book should also be of interest to senior education policy makers concerned with certification and learning achievement standards, to academics and researchers interested in educational assessment, to governmental and education agencies responsible for student selection, and to professionals at development organizations. "This extremely well-written and comprehensive book offers a timely review of the diversity of public examination practices worldwide; of the tensions between examinations and learning; and of the technical expertise involved in the creation of valid, reliable, and fair assessments. It reminds us that as "the diploma disease" takes hold with an ever-greater intensity at every stage of education worldwide, and the commercial business of testing flourishes, those concerned with educational quality and meaningful learning must be on guard to prevent the assessment tail wagging the educational dog." Angela W. Little, Professor Emerita, Institute of Education, University College London "This book is very well structured and written and draws on the authors' remarkable global knowledge across countries and histories. It will be a great asset both to administrators responsible for examinations and to academics and other professionals who seek to understand the nature and impact of examinations of different types and in different settings." Mark Bray, UNESCO Chair Professor of Comparative Education, University of Hong Kong; and former Director, UNESCO International Institute for Educational Planning "I am sure that *Public Examinations Examined*, which thoroughly analyzes the practice of public examinations in different countries and makes profound and well-grounded conclusions, will arouse very great interest and will serve to further improve public examinations." Victor Bolotov, Distinguished Professor, Higher School of Economics, National Research University, Moscow; member, Russian Academy of Education; and former Deputy Minister of Education, Russian Federation
