IELTS practice tests - Peter May 2004

'IELTS Practice Tests' contains four practice tests with exam skills training and practice, and detailed explanations of answers.

Content and Language Integrated Learning - Yolanda Ruiz de Zarobe 2009

This book contributes to the growth of interest in Content and Language Integrated Learning (CLIL), an approach to second/foreign language learning that requires the use of the target language to learn content. Within the framework of European strategies to promote multilingualism, CLIL has begun to be used extensively in a variety of language learning contexts, and at different educational systems and language programmes. This book brings together critical analyses on theoretical and implementation issues of Content and Language Integrated Learning, and empirical studies on the effectiveness of this type of instruction on learners' language competence. The basic theoretical assumption behind this book is that through successful use of the language to learn content, learners will develop their language proficiency more effectively while they learn the academic content specified in the curricula.

Translation in Language Teaching and Assessment - Georgios Floros 2013-09-11

The aim of this volume is to record the resurgent influence of Language Learning in Translation Studies and the various contemporary ways in which translation is used in the fields of Language Teaching and Assessment. It examines the possibilities and limitations of the interplay between the two disciplines in attempting to investigate the degree to which recent calls for reinstating translation in language learning have borne fruit. The volume accommodates high-quality original submissions that address a variety of issues from a theoretical as well as an empirical point of view. The chapters of the volume raise important questions and demonstrate the beginning of a new era of conscious epistemological traffic between the two aforementioned disciplines. The contributors to the volume are academics, researchers and professionals in the fields of Translation Studies and Language Teaching and Assessment from various countries and educational contexts, including the USA, Canada, Taiwan R.O.C., and European countries such as Belgium, Germany, Greece, Slovenia and Sweden, and various professional and instructional settings, such as school sector and graduate, undergraduate and certificate programs. The contributions approach the interplay between the two disciplines from various angles, including functional approaches to translation, contemporary types of translation, and the discursive interaction between teachers and students.

English Language Teaching - Lee McCallum 2022

This book provides an overview of current trends and practices in English Language Teaching (ELT) across the European Union. It offers insights into key ELT issues which are at the forefront of twenty-first-century classrooms. It discusses theoretical and empirical work based on topics such as linguistic imperialism, English as a Medium of Instruction, contrastive language analysis, and the interplay between English and the use of countries respective native languages. It also explores the challenges of English Language Teaching under different circumstances such as, while using different technological platforms, working with different learner groups (those with Special Educational Needs) and revising traditional practices in grammar and vocabulary teaching. Throughout the book, the link between policy, theory and practice is explicitly highlighted and exemplified. The book is of interest to ELT instructors, course designers, language teachers and teacher trainers, and students enrolled in pre-service English training courses.

Oxford Placement Tests 2: Marking Kit - Dave Allan 2004-08-26

A reliable and efficient means of grading and placing students into classes. Both Test Packs contain: 40 Test Papers; a practical introduction which outlines the Test and gives guidance on how to administer it; and a Levels Chart which helps determine realistic examination targets and suitable teaching material. The tests are divided into two sections: a

Listening Test (ten minutes) and a Grammar Test (up to one hour). Tests 1 and 2 function as parallel tests, providing tests for different situations, such as progress and exit testing. A Marking Kit is also available, providing marking overlays, further guidance on administering and grading the tests, and a diagnostic key.

Individual differences in early instructed language learning - Raphael Berthele

Variability in predispositions for language learning has attracted scholarly curiosity for over 100 years. Despite major changes in theoretical explanations and foreign/second language teaching paradigms, some patterns of associations between predispositions and learning outcomes seem timelessly robust. This book discusses evidence from a research project investigating individual differences in a wide variety of domains, ranging from language aptitude over general cognitive abilities to motivational and other affective and social constructs. The focus lies on young learners aged 10 to 12, a less frequently investigated age in aptitude research. The data stem from two samples of multilingual learners in German-speaking Switzerland. The target languages are French and English. The chapters of the book offer two complementary perspectives on the topic: On the one hand, cross-sectional investigations of the underlying structure of these individual differences and their association with the target languages are discussed. Drawing on factor analytical and multivariable analyses, the different components are scrutinized with respect to their mutual dependence and their relative impact on target language skills. The analyses also take into account contextual factors such as the learners' family background and differences across the two contexts investigated. On the other hand, the potential to predict learner's skills in the target language over time based on the many different indicators is investigated using machine learning algorithms. The results provide new insights into the stability of the individual dispositions, on the impact of contextual variables, and on empirically robust dimensions within the array of variables tested.

Second Language Pronunciation Assessment - Talia Isaacs 2016-12-22

This book is open access under a CC BY licence. It spans the areas of assessment, second language acquisition (SLA) and pronunciation and examines topical issues and challenges that relate to formal and informal assessments of second language (L2) speech in classroom, research and real-world contexts. It showcases insights from assessing other skills (e.g. listening and writing) and highlights perspectives from research in speech sciences, SLA, psycholinguistics and sociolinguistics, including lingua franca communication, with concrete implications for pronunciation assessment. This collection will help to establish commonalities across research areas and facilitate greater consensus about key issues, terminology and best practice in L2 pronunciation research and assessment. Due to its interdisciplinary nature, this book will appeal to a mixed audience of researchers, graduate students, teacher-educators and exam board staff with varying levels of expertise in pronunciation and assessment and wide-ranging interests in applied linguistics.

ELT in Asia in the Digital Era: Global Citizenship and Identity - Suwarsih Madya 2018-06-27

This proceedings book captures a wide range of timely themes for readers to be able to foresee the digital era's impact on English teaching

in non-English speaking countries. English used in the global environment, the frequent mobile communication, and the use of AI-based translators are bringing about dramatic changes in our English language learning and teaching. Who can provide us the wisdom to know what to do? Those scholars going through these complex environmental changes! A collection of puzzle pieces may bring us a better contour for the future than a perfectly edited book. It's indeed a pleasure reading these insightful pieces to gain wisdom for the future of ELT practices in global contexts.

Multimedia, Computer Graphics and Broadcasting - Dominik Slezak 2010-05-10

As future generation information technology (FGIT) becomes specialized and fragmented, it is easy to lose sight that many topics in FGIT have common threads and, because of this, advances in one discipline may be transmitted to others. Presentation of recent results obtained in different disciplines encourages this interchange for the advancement of FGIT as a whole. Of particular interest are hybrid solutions that combine ideas taken from multiple disciplines in order to achieve something more significant than the sum of the individual parts. Through such hybrid philosophy, a new principle can be discovered, which has the propensity to propagate throughout multifaceted disciplines. FGIT 2009 was the first mega-conference that attempted to follow the above idea of hybridization in FGIT in a form of multiple events related to particular disciplines of IT, conducted by separate scientific committees, but coordinated in order to expose the most important contributions. It included the following international conferences: Advanced Software Engineering and Its Applications (ASEA), Bio-Science and Bio-Technology (BSBT), Control and Automation (CA), Database Theory and Application (DTA), Disaster Recovery and Business Continuity (DRBC; published independently), Future Generation Communication and Networking (FGCN) that was combined with Advanced Communication and Networking (ACN), Grid and Distributed Computing (GDC), Multimedia, Computer Graphics and Broadcasting (MulGraB), Security Technology (SecTech), Signal Processing, Image Processing and Pattern Recognition (SIP), and e-Service, Science and Technology (UNESST).

Contemporary Second Language Assessment - Jayanti Veronique Banerjee 2016-06-30

Includes chapters on key aspects of second language assessment such as test construct, diagnosis, exam design, and the growing range of public policy, social and ethical issues. Each of the contributors is an expert in their area; some are established names while others are talented newcomers to the field. The chapters present new research or perspectives on traditional concerns such as test quality; fairness and bias; the testing of different language skills; the needs of different groups of examinees, including English language learners who need to take content tests in English; and the use of language assessments for gate-keeping purposes. The volume demonstrates how language assessment is informed by and engages with neighbouring areas of applied linguistics such as technology and language corpora. The book represents the best of current practice in second language assessment and, as a one volume reference, will be invaluable to students and researchers looking for material that extends their understanding of the field.

Q Skills for Success: Reading and Writing 5: Student Book with Online Practice - Sarah Lynn 2011-07-14

Validity Argument in Language Testing - Carol A. Chapelle 2021-01-21

Language tests play pivotal roles in education, research on learning, and gate-keeping decisions. The central concern for language testing professionals is how to investigate whether or not tests are appropriate for their intended purposes. This book introduces an argument-based validity framework to help with the design of research that investigates the validity of language test interpretation and use. The book presents the principal concepts and technical terms, then shows how they can be implemented successfully in practice through a variety of validation studies. It also demonstrates how argument-based validity intersects with technology in language testing research and highlights the use of validity argument for identifying research questions and interpreting the results of validation research. Use of the framework helps researchers in language testing to communicate clearly and consistently about technical issues with each other and with researchers of other types of tests.

The Acquisition of English Restrictive Relative Clauses by Hungarian Learners of English - Judit Kiss-Gulyás 2004

"The present work uses the standard version of principles and parameters theory of Universal Grammar to address second language acquisition issues. It is assumed that comparative analysis of Hungarian and English based on the model enables the researcher to formulate precise and testable questions and the empirical research provides reliable answers." "The investigated area is the acquisition of English restrictive relative clauses by L1 Hungarian learners of L2 English. This area of grammar causes problems: most of these are proficiency-determined, but there are some which are observable even at fairly advanced levels. In the given framework it is postulated that some properties of parameters set differently for the L1 can be reset to the new language, whereas other properties seem to resist re-setting and remain non-native-like in the interlanguage of even near-native L2 English speakers of L1 Hungarian." "The book may interest pure and applied linguists, psycholinguists as well as practising teachers as it attempts to offer a possible answer to the often made observation: there are parts of L2 grammar which are relatively easy to acquire despite the language differences, yet there are several features that remain faulty or misunderstood despite teacher and learner effort."--BOOK JACKET.

Financial Accounting - Jerry J. Weygandt 2009-12-31

In the new sixth edition, readers will be able to clearly see the relevance of accounting in their everyday lives. The authors introduce challenging accounting concepts with examples that are familiar to everyone, which helps build motivation to learn the material. Accounting issues are also placed within the context of marketing, management, IT, and finance.

The Oxford Handbook of Applied Linguistics - Robert B. Kaplan 2010-09-03

The Oxford Handbook of Applied Linguistics contains 39 original chapters on a broad range of topics in applied linguistics by a diverse group of contributors. Its goal is to provide a comprehensive survey of the current state of the field, the many connections among its various sub-disciplines, and the likely directions of its future development. The Oxford Handbook of Applied Linguistics addresses a broad audience: applied linguists; educators and other scholars working in language acquisition, language learning, language planning, teaching, and testing; and linguists concerned with applications of their work. Systematically encompassing the major areas of applied linguistics and drawing from a wide range of disciplines such as education, language policy, bi- and multi-lingualism, literacy, language and gender, neurobiology of language, psycholinguistics and cognition, language and computers, discourse analysis, language and concordances, ecology of language, pragmatics, translation, and many other fields, the editors and contributors to The Oxford Handbook of Applied Linguistics provide a panoramic and comprehensive look at this complex and vigorous field. This second edition includes five new chapters, and the remaining chapters have been thoroughly revised and updated to give a clear picture of the current state of applied linguistics.

Designing Listening Tests - Rita Green 2017-02-20

This book examines the crucial role that sound file selection plays in assessing listening ability and introduces the reader to the procedure of textmapping, which explores how to exploit a sound file. The book discusses the role of the task identifier, the task instructions and the example, and analyses the strengths and weaknesses of different test methods. Guidelines for developing listening items, and procedures that can be used in peer review and task revision are also provided. A range of sample listening tasks illustrates the benefits of following the test development approach described in the book. Developing Listening Tests also provides insights into the advantages that field trials, statistical analyses and standard setting can offer the language test developer in determining how well their tasks work. This practical book will be of interest to researchers, language testers, testing commissions, and teachers engaged in assessing listening performance around the world.

Language in Focus - Kasia Papaja 2016-12-14

Applied Linguistics is a field of academic enquiry that deals with the theoretical and empirical investigation of real issues which focus on language. These issues include aspects of linguistics, first or second language acquisition, literacy, language disorders, foreign language learning and teaching, bilingual education, linguistic discrimination, and language policy, among others. New approaches, new theoretical

concepts and new methods are a prerequisite for dealing with particular educational issues, and, as such, this book focuses on the challenges and opportunities that emerge from this. It brings together selected presentations given at the LIF2014 conference, which took place in Antalya, Turkey. The main focus of this event was to reflect the internationality of the English language by drawing academicians, researchers, teachers and educational authorities from all over the world and providing them with the opportunity to exchange an interdisciplinary dialogue on the theoretical as well as purely practical implications of Applied Linguistics and ELT.

Assessing L2 Listening - Gary J. Ockey 2018-08-08

This book is relevant for language testers, listening researchers, and oral proficiency teachers, in that it explores four broad themes related to the assessment of L2 listening ability: the use of authentic, real-world spoken texts; the effects of different speech varieties of listening inputs; the use of audio-visual texts; and assessing listening as part of an interactive speaking/listening construct. Each theme is introduced with a review of the relevant literature, and then is examined through either two or three empirical studies. The notion of authenticity underlies each of these four themes. By creating more authentic test tasks that are similar to real world language tasks, test developers can create listening assessments that not only more effectively assess test takers' communicative competence, but can also have a positive washback effect on educational systems.

Cambridge English: Advanced Result Student's Book - Oxford University Press 2014-08-01

Language Skills - Halina Chodkiewicz 2014-01-14

This volume brings an international perspective to language skills - an area of importance to both theorists and practitioners in all contexts of language teaching and learning. The twenty-seven chapters included here are arranged into six sections devoted to fundamental background issues, spoken interaction, perception of speech sounds and production skills, reading contexts and purposes, writing challenges for advanced learners, and technology and language skills. Explored themes range from the conceptualization of language as skill and the development of L2 skills in communicative and intercultural approaches, through challenges in teaching specific skills and their components, to the consideration of the possibilities and limitations of the use of modern technology in assisting students in skill acquisition. The volume's contributors point to the multiaspectuality of the process of developing language skills with reference to different age groups, diverse educational and social contexts, as well as instructional activities focusing on isolated and integrated skills. The book also includes original empirical studies concerning learning, teaching, and testing numerous aspects of language skills in L2 attainment. The book will be of interest to researchers, classroom teachers, and specialists in language education, philology and applied linguistics, as well as to graduate students involved in the study of language skills acquisition and instruction.

Measuring L2 Proficiency - Pascale Leclercq 2014-06-23

This volume brings together concrete ideas on identifying and measuring second language (L2) proficiency from different branches of SLA. The chapters introduce a range of tools for the evaluation of learners' language level with respect to both productive and receptive skills and provide a variety of answers to the question of how to assess L2 proficiency in a valid, reliable and practical manner.
