Standards for Internal Control in the Federal Government - Government Accountability Office 2014-12
This key resource is often referred to as the "Green Book". Federal policymakers and program managers are continually seeking ways to better achieve agencies' missions and program results, in other words, they are seeking ways to improve accountability. A key factor in helping achieve such outcomes and minimize operational problems is to implement appropriate internal control. Effective internal control also helps in managing change to cope with shifting environments and evolving demands and priorities. As programs change and as agencies strive to improve operational processes and implement new technological developments, management must continually assess and evaluate its internal control to assure that the control activities being used are effective and updated when necessary. The Federal Managers' Financial Integrity Act of 1982 (FMFIA) requires the General Accounting Office (GAO) to issue standards for internal control in government. The standards provide the overall framework for establishing and maintaining internal control and for identifying and addressing major performance and management challenges, and areas at greatest risk of fraud, waste, abuse and mismanagement. This report explores the Five Standards for Internal Control as identified by GAO for policymakers and program managers: - Control Environment - Risk Assessment - Control Activities - Information and Communications - Monitoring These standards apply to all aspects of an agency's operations: programmatic, financial, and compliance. However, they are not intended to limit or interfere with duly granted authority related to developing legislation, rule-making, or other discretionary policy-making in an agency. These standards provide a general framework. In implementing these standards, management is responsible for developing the detailed policies, procedures, and practices to fit their agency's operations and to ensure that they are built into and an integral part of operations. Finding Funding - Ernest W. Brewer 2001-01-24

The materials collected, developed, and compiled in this volume are mostly related to grant-proposal development for education, but the push for uniformity in grants among the various federal agencies means that the materials have wider application. Some of the ideas and tips may be of general interest and value to a grantwriter; some ideas about "project management" should benefit anyone operating a project. The book is divided into three major parts and several additional supporting sections: Part I discusses the planning and some of the major "tools of the trade" needed to get started in the grant/project field and to use the Internet to access funding resources. Part II covers some important steps in developing a successful grant application. Part III discusses both closing out a project annually and the often difficult but realistic element of terminating the project at the end of external support. This handbook includes problem definition, analysis of need, goals and objectives, activities, some management details (timelines, personnel, budget, reports) evaluation, and dissemination of results. The work is about exploring, writing, implementing, and terminating an idea as a strong proposal and as an operating project. Appendixes include list abbreviations, state points of contact, and a glossary. (Contains 51 references.) (DFR)
