The Snow Queen - Michael Cunningham 2014-05-06

A darkly luminous new novel from the Pulitzer Prize-winning author of The Hours Michael Cunningham's luminous novel begins with a vision. It's November 2004. Barrett Meeks, having lost love yet again, is walking through Central Park when he is inspired to look up at the sky; there he sees a pale, translucent light that seems to regard him in a distinctly godlike way. Barrett doesn't believe in visions—or in God—but he can't deny what he's seen. At the same time, in the not-quite-gentrified Bushwick neighborhood of Brooklyn, Tyler, Barrett's older brother, a struggling musician, is trying—and failing—to write a wedding song for Beth, his wife-to-be, who is seriously ill. Tyler is determined to write a song that will be not merely a sentimental ballad but an enduring expression of love. Barrett, haunted by the light, turns unexpectedly to religion. Tyler grows increasingly convinced that only drugs can release his creative powers. Beth tries to face mortality with as much courage as she can summon. Cunningham follows the Meeks brothers as each travels down a different path in his search for transcendence. In subtle, lucid prose, he demonstrates a profound empathy for his conflicted characters and a singular understanding of what lies at the core of the human soul. The Snow Queen, beautiful and heartbreaking, comic and tragic, proves again that Cunningham is one of the great novelists of his generation.

"You want the dreams they dreamed of to come true-Then They Do." That line from one of country music's best songs in recent memory pretty much sums up the way millions of parents feel about their children. Many times as they are growing up and driving you crazy, you dream of when they will be out of the house-and you will have your life back again-and then they do. Then They Do is filled with heartwarming, and sometimes tear-inducing, stories from parents about cherishing the moments with your children and celebrating the fine young men and women they have become. This book will serve as a reminder to parents to seize those moments when their tiny ones are still underfoot, and will be a nostalgia-inducing keepsake for those whose children have moved upwards and onwards. Motos, Sudor Y África - Ricardo Fité 2021-11-18

Burned - Edward Humes 2019-01-08

Was a monstrous killer brought to justice or an innocent mother condemned? On an April night in 1989, Jo Ann Parks survived a house fire that claimed the lives of her three small children. Though the fire at first seemed a tragic accident, investigators soon reported finding evidence proving that Parks had sabotaged wiring, set several fires herself, and even barricade her four-year-old son inside a closet to prevent his escape. Though she insisted she did nothing wrong, Jo Ann

Parks received a life sentence without parole based on the power of forensic fire science that convincingly proved her guilt. But more than a quarter century later, a revolution in the science of fire has exposed many of the incontrovertible truths of 1989 as guesswork in disguise. The California Innocence Project is challenging Parks's conviction and the so-called science behind it, claiming that false assumptions and outright bias convicted an innocent mother of a crime that never actually happened. If Parks is exonerated, she could well be the "Patient Zero" in an epidemic of overturned guilty verdicts—but only if she wins. Can prosecutors dredge up enough evidence and roadblocks to make sure Jo Ann Parks dies in prison? No matter how her last-ditch effort for freedom turns out, the scenes of betrayal, ruin, and hope will leave readers longing for justice we can trust.
