Geochronology and Thermochronology by the 40Ar/39Ar Method -

Ian McDougall 1999
Argon isotopic dating is one of the most important techniques for estimating the ages of rocks and can be used on very small samples. It has been used to assign reliable ages to the Earth and numerous meteorites. This second edition covers the standard principles and methods and incorporates many of new developments from the last decade. It covers the basis of the method, technical aspects, data presentation, diffusion theory, thermochronology, and many applications and case studies.

Critical Political Studies - Colin Leys 2002

A collective picture of modern capitalism suggests that economic prospects, political costs, and implications for human development and freedom under this system are grim indeed. However the possibility of an alternative viewpoint, and an alternative system, provide grounds for optimism. The authors in Critical Political Studies challenge the neo-liberal, pro-market ideology that has arisen in the age of the so-called "post-communist" new world order, wrestling with the implications of globalization, democratization, and the politics of radical social change Written as a tribute to the remarkable intellectual career of Colin Leys, the debates in this book deal with some of the most pressing problems confronting the majority of citizens in both first world and third world contexts. Their contributions provide the confidence to pursue new possibilities that permit a more optimistic, if critical, outlook. Topics covered include contemporary debates about globalization and the nation state, African development, prospects for British socialism after Blair, social movements, and current issues in political and social theory. Contributors include Laurie Adkin (University of Alberta), Abigail Bakan, Bruce Berman (Queen's University), Manfred Bienefeld (Carleton University), Alex Callinicos (University of York, UK), Bonnie Campbell (University of Quebec at Montreal), Michael Chege (University of Florida), Radhika Desai (University of Victoria), Lauren Dobell (PhD candidate, Oxford University), Phil Goldman (Queen's University), Banu Helvacioğlu (Bilkent University, Turkey), Robert Jessop (University of Lancaster, UK), Colin Leys (emeritus, Queen's University), Eleanor MacDonald, Marguerite Mendell

The Oxford Handbook of the Social Science of Poverty - David Brady 2016-01-29

Despite remarkable economic advances in many societies during the latter half of the twentieth century, poverty remains a global issue of enduring concern. Poverty is present in some form in every society in the world, and has serious implications for everything from health and well-being to identity and behavior.

Nevertheless, the study of poverty has remained disconnected across disciplines. The Oxford Handbook of the Social Science of Poverty builds a common scholarly ground in the study of poverty by bringing together an international, inter-disciplinary group of scholars to provide their perspectives on the issue. Contributors engage in discussions about the leading theories and conceptual debates regarding poverty, the most salient topics in poverty research, and the far-reaching consequences of poverty on the individual and societal level. The volume incorporates many methodological perspectives, including survey research, ethnography, and mixed methods approaches, while the chapters extend beyond the United States to provide a truly global portrait of poverty. A thorough examination of contemporary poverty, this Handbook is a valuable tool for non-profit practitioners, policy makers, social workers, and students and scholars in the fields of public policy, sociology, political science, international development, anthropology, and economics.

International Food Assistance - Thomas Melito 2009-11

The U.S. approach of providing in-kind food aid

has assisted millions of hungry people for more than 50 years. But, there have been reports on limitations to its efficiency and effectiveness. To improve U.S. food assistance, Congress has authorized some funding for local and regional procurement (LRP) -- donors' purchase of food aid in countries affected by food crises or in a country within the same region. Through analysis of agency documents, interviews with agency officials, experts, and practitioners, and fieldwork in four African countries, this report examines: (1) LRP's impact on the efficiency of food aid delivery; (2) its impact on economies where food is procured; and (3) U.S. legal requirements that could affect agencies' use of LRP. Mathematics Education in Africa - Brantina Chirinda 2022-11-28

This book is about mathematics teaching and learning in Africa during the Fourth Industrial Revolution. The Fourth Industrial Revolution (4IR) has evolved to utilize new technologies in the teaching and learning of Mathematics. It is characterized by the fusion of the biological, physical and digital worlds and embodies a new era of innovation in mathematics education, leading to the rapid emergence of new technologies for mathematics teaching and learning. Because 4IR in mathematics education is happening differently in various parts of Africa, the authors of the various chapters in this volume have positioned their work in their respective local contexts. The chapters address a wide variety of interests, concerns, and implications regarding 4IR and Mathematics Education in Africa. Additionally, a number of chapters address teaching mathematics in the context of the COVID-19 pandemic that has gripped the world. Other chapters discuss the implications of inequalities in Africa that effect mathematics education during 4IR. Chapters also incorporate arguments, observations, and suggestions to, improve and transform the teaching and learning of mathematics in Africa during the 4IR. This book highlights a new era of innovation in mathematics education in the context of the Fourth Industrial Revolution, leading to the rapid emergence of new technologies in mathematics teaching and learning. It is a valuable resource for graduate

students, people with research interests in the fourth industrial revolution and mathematics educators at any level, including all mathematics teachers; mathematics education curriculum designers and policymakers.

The Hate U Give - Angie Thomas 2018-08

Read the book that inspired the movie! Sixteen-year-old Starr lives in two worlds: the poor neighbourhood where she was born and raised and her posh high school in the suburbs. The uneasy balance between them is shattered when Starr is the only witness to the fatal shooting of her unarmed best friend, Khalil, by a police officer. Now what Starr says could destroy her community. It could also get her killed. Inspired by the Black Lives Matter movement, this is a powerful and gripping novel about one girl's struggle for justice.

Kenyan English - Alfred Buregeya 2019-08-05
English in Kenya is a stable post-colonial variety that is used as an inter-ethnic lingua franca in private domains, is the medium of instruction as well as the language spoken in parliament and court rooms. Yet so far no comprehensive research monograph on Kenyan English has been published that surveys its characteristic linguistic features. The present book closes this gap by giving a full description of the characteristic linguistic features of Kenyan

English. The book provides an in-depth overview of Kenyan English phonetics, phonology, morphology, syntax, semantics and pragmatics and also gives a meticulous account of the diachronic evolution of this post-colonial variety.

Aid and the Political Economy of Policy Change - Tony Killick 1998

This volume looks at the effectiveness of conditionality in structural adjustment programmes. Tony Killick charts the emergence of conditionality, and challenges the widely held assumption that it is a co-operative process, arguing that in fact it tends to be coercive and detrimental to development objectives. Through detailed case studies of twenty one recipient countries, he explores the key issues of: * ownership * role of agencies * government objectives and the effects of policy. The conclusion is that conditionality has been counterproductive to price stability, economic growth and investment.

Fission-Track Thermochronology and its Application to Geology - Marco G. Malusà 2018-07-14

This book is focused on the basics of applying thermochronology to geological and tectonic problems, with the emphasis on fission-track thermochronology. It is conceived for relatively new practitioners to thermochronology, as well

as scientists experienced in the various methods. The book is structured in two parts. Part I is devoted to the fundamentals of the fission-track method, to its integration with other geochronologic methods, and to the basic principles of statistics for fission-track dating and sedimentology applied to detrital thermochronology. Part I also includes the historical development of the technique and thoughts on future directions. Part II is devoted to the geological interpretation of the thermochronologic record. The thermal frame of reference and the different approaches for the interpretation of fission-track data within a geological framework of both basement and detrital studies are discussed in detail. Separate chapters demonstrate the application of fission-track thermochronology from various perspectives (e.g., tectonics, petrology, stratigraphy, hydrocarbon exploration, geomorphology), with other chapters on the application to basement rocks in orogens, passive continental margins and cratonic interiors, as well as various applications of detrital thermochronology.

Storm in My Soul - Loren K. Brown 2012-08

Loren is in his early-30s, living a successful and beautiful life. The death of his lover Steve from AIDS hits like a storm. This is the story of two entwined chapters of Loren's life: the last 10 days of Steve's existence, and Loren's year-long quest to find closure while traveling around the world with nothing but a backpack. Country by country, discovery by discovery, Loren makes the journey from what was once familiar and comfortable to face his fears, let go of the past, forgive and heal. By the time he returns home from his pilgrimage, Loren has gone through a tremendous life-altering transformation. Now filled with peace, empathy, and empowerment, he moves beyond the constraints he had once set for himself. What started as a tragic event leads Loren to a voyage of discovery that will result in the wisdom and trust to embrace every moment of life in its simplicity and greatness.

A Virgin's Guide to Everything - Lauren

McCutcheon 2008-05-30

You can admit it-you're a virgin. Everyone was at one point. And no, we're not talking about sex.

We don't care who you've slept with (okay, we do, but that will have to wait for another book). What we're talking about is that you've never before been to a wine tasting, bought real art (posters from college don't count), had a personal trainer, nor known the proper way to eat or order sushi. Life is full of firsts-thankfully this book is here to help. This perfect guide for Virgins, non-and Born-Again Virgins, makes sure that your first times (or second or third) are done right. Filled with advice from Go-to-Girls who are experts in their fields, A VIRGIN'S GUIDE TO EVERYTHING is like having a cool, older sister who's always willing to show you the way.

Geographies of Commodity Chains - Alex Hughes 2004-07-31

Individuals, consumer groups, nation states and supra-national bodies increasingly have interrogated the ethics of particular production and consumption relations such as GM foods. Flowing from and bound up with these political concerns is the growing interest in the mutual dependence of sites of (for example) production, distribution, retailing, design, advertising, marketing and final consumption. This timely volume draws together contributions concerned with the production, circulation and consumption of commodities. Not only do these case study examples seek to transcend older understandings of production and consumption, but they also explicitly tap into wider public debate about the meanings, origins and biographies of commodities. Taking a geographical approach to the analysis of links between producers and consumers, the book focuses upon the ways in which these ties increasingly are stretched across spaces and places. Critical engagements with the ways in which these spaces and places affect the economies, cultures and politics of the connections between producers and consumers are skilfully threaded through each section.
