Children and the Great Hunger in Ireland - Christine Kinealy 2018-06-22
In any sustained period of food hunger and famine, children are one of the most vulnerable groups in terms of disease and mortality. The Great Hunger that occurred in Ireland between 1845 and 1852 is no exception. This publication explores the impact of famine on children and young adults through a multi-disciplinary approach. It includes research from some of the leading scholars in the field. Children and the Great Hunger in Ireland breaks new ground in its emphasis on the experiences of children during the Irish Famine. It features a diverse range of sources and eyewitness accounts, together with new methodologies, that attest to the Famine's devastating impact on young people. This book asks: how did children experience--and survive--the tragedy that unfolded in Ireland between 1845 and 1852? Children and the Great Hunger in Ireland brings together the work of some of the leading researchers in Irish studies, with new scholarship, methodologies and perspectives. This book takes a major step toward advancing our understanding of the Great Hunger.

Honorable Bandit - Brian Bouldrey 2007-10-01

Brian Bouldrey traveled to the island of Corsica, with its wine-dark Mediterranean waters, powdered-sugar beach sand, sumptuous cuisine, and fine wine. And then he walked away from all of them. Bouldrey strapped on a backpack and walked across Napoleon's native land with the same spirit many choose to dance or drink: to celebrate, to mourn, to think, to avoid thinking, to recall, to ignore, to escape, and to arrive. This wonderfully textured account of a two-week ramble along a famous Corsican hiking trail with his German friend Petra (she was good at the downhill while he was better at the uphill) offers readers a journal that is a launching point for reflection: thoughts on cultural differences, friendship, physical challenge, personal challenge, and getting very, very lost. Part travelogue, part memoir, and part lampoon, this book offers readers an impressionistic view of a little talked about yet stunningly beautiful landscape. Cannibalism - Bill Schutt 2018-01-30

"Surprising. Impressive. Cannibalism restores my faith in humanity."
—Sy Montgomery, The New York Times Book Review
For centuries scientists have written off cannibalism as a bizarre phenomenon with little biological significance. Its presence in nature was dismissed as a desperate response to starvation or other life-threatening circumstances, and few spent time studying it. A taboo subject in our culture, the behavior was portrayed mostly through horror movies or tabloids sensationalizing the crimes of real-life flesh-eaters. But the true nature of cannibalism--the role it plays in evolution as well as human history--is even more intriguing (and more normal) than the misconceptions we've come to accept as fact. In *Cannibalism: A Perfectly Natural History*, zoologist Bill Schutt sets the record straight, debunking common myths and investigating our new understanding of cannibalism's role in biology, anthropology, and history in the most fascinating account yet written on this complex topic. Schutt takes readers from Arizona's Chiricahua Mountains, where he wades through ponds full of tadpoles devouring their siblings, to the Sierra Nevadas, where he joins researchers who are shedding new light on what happened to the Donner Party--the most infamous episode of cannibalism in American history. He even meets with an expert on the preparation and consumption of human placenta (and, yes, it goes well with Chianti). Bringing together the latest cutting-edge science, Schutt answers questions such as why some amphibians consume their mother's skin; why certain insects bite the heads off their partners after sex; why, up until the end of the twentieth century, Europeans regularly ate human body parts as medical curatives; and how cannibalism might be linked to the extinction of the Neanderthals. He takes us into the future as well, investigating whether,

as climate change causes famine, disease, and overcrowding, we may see more outbreaks of cannibalism in many more species--including our own. Cannibalism places a perfectly natural occurrence into a vital new context and invites us to explore why it both enthralls and repels us.

Songs of the Fluteplayer - Sharman Apt Russell 2002-03-01

In *Songs of the Fluteplayer*, the charm and challenge of the spectacularly beautiful American Southwest are irresistibly captured by a woman who risked much to discover a new life and greater meaning there. Sharman Apt Russell and her husband moved to the Mimbres Valley in southwestern New Mexico in order to lead a simpler yet more substantial life. Their efforts to be self-sufficient--building an adobe house, giving birth at home, growing their own food--shattered many ideals and forced compromises but also renewed their ties to each other and kindled their respect for the land and its people. The American Southwest that Russell fell in love with comes to life vividly in her writing. From Navajo weavers to illegal Mexican workers, trading posts to prehistoric pottery, water rights disputes to the omnipresent fluteplayer Kokopelli--the energy and wonder of the Southwest is celebrated in this enchanting book. ø

Hunger in the Land of Plenty - James D. Wright 2019

In the United States today, 50 million people don't have enough food.

How is this possible in one of the world's wealthiest countries? Why hasn't the problem been solved? Is it simply an economic issue?

Challenging conventional wisdom, the authors of *Hunger in the Land of Plenty* explore the causes and consequences of food insecurity; assess some of the major policies and programs that have been designed to reduce it; and consider alternative paths forward.

Unnatural Exposure - Patricia Cornwell 2008-01-02

Kay Scarpetta finds herself pitted against a possible bioterrorist in this suspense-filled read from #1 New York Times bestselling author Patricia Cornwell. When a woman turns up dismembered in a landfill, Scarpetta initially suspects the work of a serial killer she's been tracking. But her investigation turns far more dangerous when she realizes the victim's skin is covered in an unusual rash--and Scarpetta herself may have just been exposed to a deadly virus.

The Coming Famine - Julian Cribb 2011-08-22

Lays out a picture of impending planetary crisis - a global food shortage that threatens to hit by mid-century - that would dwarf any in our previous experience. This book describes a dangerous confluence of shortages - of water, land, energy, technology, and knowledge - combined with the increased demand created by population and economic growth

An Obsession With Butterflies - Sharman Apt Russell 2009-04-24

Butterflies have always served as a metaphor for resurrection and transformation, but as Sharman Apt Russell points out in this lyrical meditation, butterflies are above all objects of obsession. She reveals the logic behind our endless fascination with butterflies and introduces us to the legendary collectors and dedicated scientists who have obsessively catalogued new species of Lepidoptera. A luminous journey through an exotic world of passion and strange beauty, this is a book to be treasured by anyone who has ever experienced the enchantment of butterflies.

Teresa of the New World - Sharman Apt Russell 2015-03-03

From the bestselling author of *An Obsession with Butterflies* comes a magical story of America in the time of the conquistadors. In 1528, the real-life conquistador Cabeza de Vaca shipwrecked in the New World where he lived for eight years as a slave, trader, and shaman. In this lyrical weaving of history and myth, the adventurer takes his young daughter Teresa from her home in Texas to walk westward into the setting sun, their travels accompanied by miracles--visions and prophecies. But when Teresa reaches the outposts of New Spain, life is not what her father had promised. As a kitchen servant in the household of a Spanish official, Teresa grows up estranged from the magic she knew as a child, when she could speak to the earth and listen to animals. When a new epidemic of measles devastates the area, the sixteen-year-

old sets off on her own journey, befriend a Mayan were-jaguar who cannot control his shape-shifting and a warhorse abandoned by his Spanish owner. Now Teresa moves through a land stalked by Plague: smallpox as well as measles, typhus, and scarlet fever. Soon it becomes clear that Teresa and her friends are being manipulated and driven by forces they do not understand. To save herself and others, Teresa will find herself listening again to the earth, sinking underground, swimming through limestone and fossil, opening to the power of root and stone. As she searches for her place in the New World, she will travel farther and deeper than she had ever imagined. Rich in historical detail and scope, *Teresa of the New World* takes you into the dreamscape of the sixteenth-century American Southwest. Sky Pony Press, with our Good Books, Racehorse and Arcade imprints, is proud to publish a broad range of books for young readers—picture books for small children, chapter books, books for middle grade readers, and novels for young adults. Our list includes bestsellers for children who love to play Minecraft; stories told with LEGO bricks; books that teach lessons about tolerance, patience, and the environment, and much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home.

Within Our Grasp - Sharman Apt Russell 2021-04-06

An important, hopeful book that looks at the urgent problem of childhood malnutrition worldwide and the revolutionary progress being made to end it. A healthy Earth requires healthy children. Yet nearly one-fourth of the world's children are stunted physically and mentally due to a lack of food or nutrients. These children do not die but endure a lifetime of diminished potential. During the past thirty years, says Sharman Russell, we have seen a revolution in how we treat these sick children and in how—with a new understanding of the human body and approach to nutrition, and new ways to reach out to hungry mothers and babies—we have gone from unwittingly killing severely malnourished children to bringing them back to health through the “miracle” of ready-to-eat therapeutic food. Intertwined with stories of scientists and nutrition experts on the front lines of finding ways to end malnutrition for good, Russell writes of her travels to Malawi, one of the poorest and least-developed countries in the world and also the site of pathbreaking, cutting-edge research into childhood malnutrition. (Eighty percent of Malawians are farmers subsisting on less than an acre of land and coping with erratic weather patterns due to global warming; fifty percent live below the poverty line; and forty-two percent of Malawi's children are affected by a lack of food or nutrients.) As she writes of her personal exploration of new friendships and insights in a country known as “the warm heart of Africa,” Russell describes the programs that are working best to reduce childhood stunting and explores how malnutrition in children is connected to climate change, how vitamins and minerals are preventing these harmful effects, why the empowerment of women is the single most effective factor in eliminating childhood malnutrition, and what the costs of ending childhood malnutrition are. Sharman Russell, much-admired writer of luminous prose and humane heart, whose writing has been called, “elegant” (*The Economist*) and “extraordinarily well-crafted, far-reaching, and heart-wrenching” (*Booklist*), winner of the John Burroughs Medal for distinguished natural history writing, has written an illuminating, inspiring book that makes clear the promise of what is today, gratefully, within our grasp.

Refuge - Terry Tempest Williams 1992-09-01

In the spring of 1983 Terry Tempest Williams learned that her mother was dying of cancer. That same season, The Great Salt Lake began to rise to record heights, threatening the Bear River Migratory Bird Refuge and the herons, owls, and snowy egrets that Williams, a poet and naturalist, had come to gauge her life by. One event was nature at its most random, the other a by-product of rogue technology: Terry's mother, and Terry herself, had been exposed to the fallout of atomic bomb tests in the 1950s. As it interweaves these narratives of dying and accommodation, *Refuge* transforms tragedy into a document of renewal and spiritual grace, resulting in a work that has become a classic.

Hunger - Raymond Tallis 2014-12-05

Understanding hunger is the key to understanding ourselves. While they seem the most obvious things about us, our hungers are also deeply mysterious, arising out of, and casting light on, the unique character of human consciousness. In humans, physiological need is transformed into a multitude of needs that are remote from organic necessity. Even first-level biological hunger is experienced differently in humans; and little in human feeding behaviour has any parallel in the animal kingdom. In this book, Ray Tallis takes us through the different levels of our hunger. Out

of our primary appetites arise a myriad of pleasures and tastes that are elaborated in second-level hedonistic hungers creating new values. The evolution of appetite into desire opens the way to social hungers such as the hunger for acknowledgement. Awareness of death awakens a further level of hunger for something that lies beyond the pell-mell of successive experiences leading towards extinction. The art of living is the art of managing our hungers.

Mockingjay (Hunger Games, Book Three) - Suzanne Collins 2010-08-24

The greatly anticipated final book in the New York Times bestselling Hunger Games trilogy by Suzanne Collins.

The Ballad of Songbirds and Snakes (A Hunger Games Novel) - Suzanne Collins 2020-05-19

Ambition will fuel him. Competition will drive him. But power has its price. It is the morning of the reaping that will kick off the tenth annual Hunger Games. In the Capitol, eighteen-year-old Coriolanus Snow is preparing for his one shot at glory as a mentor in the Games. The once-mighty house of Snow has fallen on hard times, its fate hanging on the slender chance that Coriolanus will be able to outcharm, outwit, and outmaneuver his fellow students to mentor the winning tribute. The odds are against him. He's been given the humiliating assignment of mentoring the female tribute from District 12, the lowest of the low. Their fates are now completely intertwined - every choice Coriolanus makes could lead to favor or failure, triumph or ruin. Inside the arena, it will be a fight to the death. Outside the arena, Coriolanus starts to feel for his doomed tribute . . . and must weigh his need to follow the rules against his desire to survive no matter what it takes.

Hunger - Elise Blackwell 2008-04-01

Scouring the world's most remote fields and valleys, a dedicated Soviet scientist has spent his life collecting rare plants for his country's premiere botanical institute in Leningrad. From Northern Africa to Afghanistan, from South America to Abyssinia, he has sought and saved seeds that could be traced back to the most ancient civilizations. And the adventure has set deep in him. Even at home with the wife he loves, the memories of his travels return him to the beautiful women and strange foods he has known in exotic regions. When German troops surround Leningrad in the fall of 1941, he becomes a captive in the siege. As food supplies dwindle, residents eat the bark of trees, barter all they own for flour, and trade sex for food. In the darkest winter hours of the siege, the institute's scientists make a pact to leave untouched the precious storehouse of seeds that they believe is the country's future. But such a promise becomes difficult to keep when hunger grows undeniable. Based on true events from World War II, *Hunger* is a private story about a man wrestling with his own morality. This beautiful debut novel asks us what is the meaning of integrity.

The Sixth Extinction - Instaread 2015-09-15

PLEASE NOTE: This is key takeaways and analysis of the book and NOT the original book. **The Sixth Extinction**: by Elizabeth Kolbert | Key Takeaways, Analysis & Review Preview: *The Sixth Extinction* is a book by award winning journalist, Elizabeth Kolbert. In this book, the author demonstrates that species are dying out at a rate comparable to the previous mass extinctions, and if the trend of global warming, deforestation, and pollution continues in its present course, the numbers of extinct species will meet or exceed that rate of destruction. This event will include the extinction of humanity. What this means is that the current loss of life today will soon justify the term "The Sixth Extinction," a mass extinction like the one that destroyed the dinosaurs 65 million years ago. When humans originated about 100,000 years ago, they began to hunt some species into extinction. Their ability to outcompete other early hominids for food led to the extinction of those species, including Neanderthals. The extinction of species picked up steam when humans began transforming great swaths of forest and plains into farmland about 10,000 years ago... The Unnatural History of the Sea - Callum Roberts 2009-01-05

A fascinating journey through 1,000 years of human exploitation and exploration of the sea.

A Florida State of Mind - James D. Wright 2019-04-30

A witty history of the state that's always in the news, for everything from alligator attacks to zany crimes. There's an old clip of Bugs Bunny sawing the entire state of Florida off the continent—and every single time a news story springs up about some shenanigans in Florida,

someone on the internet posts it in response. Why are we so ready to wave goodbye to the Sunshine State? In *A Florida State of Mind: An Unnatural History of Our Weirdest State*, James D. Wright makes the case that there are plenty of reasons to be scandalized by the land and its sometimes-kooky, sometimes-terrifying denizens, but there's also plenty of room for hilarity. Florida didn't just become weird; it's built that way. Uncharted swampland doesn't easily give way to sprawling suburbia. It took violent colonization, land scams to trick non-Floridians into buying undeveloped property, and the development of railroads to benefit one man's hotel empire. Even the most natural parts of Florida are unnatural. Florida citrus? Not from here, but from China. Gators? Oh, they're from Florida all right, but that doesn't make having 1 per every 20 humans normal. Animals...in the form of roadkill? Only Florida allows you to keep anything you kill on the road (and anything you find). Yet everyone loves Florida: tourists come in droves, and people relocate to Florida constantly (only 36% of residents were born there). Crammed with unforgettable stories and facts, Florida will show readers exactly why.

Hunger - Sharman Apt Russell 2008-08-01

Every day, we wake up hungry. Every day, we break our fast. *Hunger* explores the range of this primal experience. Sharman Apt Russell, the highly acclaimed author of *Anatomy of a Rose* and *An Obsession with Butterflies*, here takes us on a tour of hunger, from eighteen hours without food to thirty-six hours to seven days and beyond. What Russell finds—both in our bodies and in cultures around the world—is extraordinary. It is a biological process that transcends nature to shape the very fabric of societies. In a fascinating survey of centuries of thought on hunger's unique power, she discovers an ability to adapt to it that is nothing short of miraculous. From the fasting saints of the early Christian church to activists like Mahatma Gandhi, generations have used hunger to make spiritual and political statements. Russell highlights these remarkable cases where hunger can inspire and even heal, but she also addresses the devastating impact of starvation on cultures around the world today. Written with consummate skill, a compassionate heart, and stocked with facts, figures, and fascinating lore, *Hunger* is an inspiring window on history and the human spirit.

Diary of a Citizen Scientist - Sharman Apt Russell 2014

In the exploding world of citizen science, hundreds of thousands of volunteers are monitoring climate change, tracking bird migration and stardust for NASA, or excavating mastodons. The sheer number of citizen scientists, combined with new technology, is beginning to shape how research gets done. Russell takes over a year to study a little-known species of tiger beetle, often used as a marker of biodiversity. With an admitted degree of misplaced confidence, she patrols the New Mexico's Gila River, net in hand, negotiating the realities of climate change and celebrating the landscape's beauty. Concurrently, she explores other citizen science projects in archaeology, astronomy, meteorology, and phenology.

The Hunger and the Howling of Killian Lone - Will Storr 2014-03-11

Part sinister fairy tale, part gothic horror novel, this unique debut pulls back the curtain on the celebrity chef's kitchen, revealing a disturbing world of ambition and brutality. Killian Lone comes from a long line of gifted cooks, stretching back to the seventeenth century, and yearns to become a famous chef himself. When he starts an apprenticeship under Max Mann, the most famous chef in London, he looks set to continue the family tradition. But the reality of kitchen life is brutal. Even his fellow apprentice, Kathryn, who shows Killian uncharacteristic kindness, can't stop his being sucked into the vicious, debauched world of 1980s fine dining, and gradually he is forced to surrender his dream. Then he discovers a dark family secret—the legacy of an ancestor who was burnt as a witch for creating food so delicious it was said to turn all who tasted it mad. Killian knows he can use this secret to achieve his ambitions and maybe, finally, to win Kathryn's affections. But is he willing to pay the price? This is Killian's confession—a strange tragedy about love, ambition and incredible food . . .

Is Superman Circumcised? - Roy Schwartz 2021-05-19

Superman is the original superhero, an American icon, and arguably the most famous character in the world—and he's Jewish! Introduced in June 1938, the Man of Steel was created by two Jewish teens, Jerry Siegel, the son of immigrants from Eastern Europe, and Joe Shuster, an immigrant. They based their hero's origin story on Moses, his strength on Samson, his mission on the golem, and his nebulous secret identity on themselves. They made him a refugee fleeing catastrophe on the eve of World War II and sent him to tear Nazi tanks apart nearly two years before the US joined the war. In the following decades, Superman's mostly Jewish

writers, artists, and editors continued to borrow Jewish motifs for their stories, basing Krypton's past on Genesis and Exodus, its society on Jewish culture, the trial of Lex Luthor on Adolf Eichmann's, and a future holiday celebrating Superman on Passover. A fascinating journey through comic book lore, American history, and Jewish tradition, this book examines the entirety of Superman's career from 1938 to date, and is sure to give readers a newfound appreciation for the Mensch of Steel! **Standing in the Light** - Sharman Apt Russell 2016-08-10

Sharman Apt Russell's wise and haunting new memoir about her life as a pantheist. Perhaps no other religious philosophy is as simple and inclusive as pantheism. What is, right now, is divine; there is no god apart from the universe itself. In *Standing in the Light*, Russell explores the history of this tradition from the Stoic philosophers to the Transcendentalists while reflecting on her own life during a year spent in the mountains and desert of southwestern New Mexico. A season of banding birds, the migration of sandhill cranes, the panicked charge of a young javelina-nature provides the inspiration for meditations on subjects ranging from Buddhist thought to the death of her father, from the Quaker tradition to the sadness of children leaving home, from global warming to the ineffable loneliness of human experience. With a humane heart, an inquisitive mind, and luminescent prose, Sharman Apt Russell invites skeptics, scientists, and seekers everywhere to join her in her exploration of the soul of pantheism.

The Palgrave Handbook of the History of Human Sciences - David McCallum 2022-08-27

The *Palgrave Handbook of the History of Human Sciences* offers a uniquely comprehensive and global overview of the evolution of ideas, concepts and policies within the human sciences. Drawn from histories of the social and psychological sciences, anthropology, the history and philosophy of science, and the history of ideas, this collection analyses the health and welfare of populations, evidence of the changing nature of our local communities, cities, societies or global movements, and studies the way our humanness or 'human nature' undergoes shifts because of broader technological shifts or patterns of living. This Handbook serves as an authoritative reference to a vast source of representative scholarly work in interdisciplinary fields, a means of understanding patterns of social change and the conduct of institutions, as well as the histories of these 'ways of knowing' probe the contexts, circumstances and conditions which underpin continuity and change in the way we count, analyse and understand ourselves in our different social worlds. It reflects a critical scholarly interest in both traditional and emerging concerns on the relations between the biological and social sciences, and between these and changes and continuities in societies and conducts, as 21st century research moves into new intellectual and geographic territories, more diverse fields and global problematics.

The South Carolina Encyclopedia Guide to South Carolina Writers - Tom Mack 2014-01-30

Rich in natural beauty and historic complexity, South Carolina has long been a source of inspiration for writers. The talented novelists, essayists, poets, playwrights, journalists, historians, and other writers featured here represent the countless anonymous individuals who have shared tales and lore of South Carolina.

Beginning to End Hunger - M. Jahi Chappell 2018-01-23

Beginning to End Hunger presents the story of Belo Horizonte, home to 2.5 million people and the site of one of the world's most successful city-run food security programs. Since its Municipal Secretariat of Food and Nutritional Security was founded in 1993, Belo Horizonte has sharply reduced malnutrition, leading it to serve as an inspiration for Brazil's renowned Zero Hunger programs. The secretariat's work with local family farmers shows how food security, rural livelihoods, and healthy ecosystems can be supported together. While inevitably imperfect, Belo Horizonte offers a vision of a path away from food system dysfunction, unsustainability, and hunger. In this convincing case study, M. Jahi

Chappell establishes the importance of holistic approaches to food security, suggests how to design successful policies to end hunger, and lays out strategies for enacting policy change. With these tools, we can take the next steps toward achieving similar reductions in hunger and food insecurity elsewhere in the developed and developing worlds.

When Women Were Birds - Terry Tempest Williams 2013-02-26

The author of the memoir *Refuge* offers a meditation on the meaning of a strange legacy that her mother left her--three shelves of the elder woman's "journals," all discovered by the author after her mother's death to be empty.

Blood Orchid - Charles Bowden 2018-09-19

Through stark observations and visceral experiences, *Blood Orchid* begins Charles Bowden's dizzying excavation of the brutal, systemic violence and corruption at the roots of American society. Like a nightmarish fever dream that turns out to be our own reality, Bowden visits dying friends in skid row apartments in Los Angeles, traverses San Francisco byways lined with clubs and joints, and roams through village bars and streets in the Sierra Madre mountains. In these wanderings resides a yearning for the understanding of past and present sins, the human penchant for warfare, abuse, and oppression, and the true war between humanity, the industrialized world, and the immense tolls of our shared land. Deeply personal, hauntingly prophetic, and bracingly sharp, the start to Bowden's harrowed quest to unearth our ugly truths remains strikingly poignant today.

An Unspoken Hunger - Terry Tempest Williams 2015-03-18

The acclaimed author of *Refuge* here weaves together a resonant and often rhapsodic manifesto on behalf of the landscapes she loves, combining the power of her observations in the field with her personal experience—as a woman, a Mormon, and a Westerner. Through the grace of her stories we come to see how a lack of intimacy with the natural world has initiated a lack of intimacy with each other. Williams shadows lions on the Serengeti and spots night herons in the Bronx. She pays homage to the rogue spirits of Edward Abbey and Georgia O'Keeffe, contemplates the unfathomable wildness of bears, and directs us to a politics of place. The result is an utterly persuasive book—one that has the power to change the way we live upon the earth.

The Unnatural History of Cypress Parish - Elise Blackwell 2009-03-25

Set in southern Louisiana in the weeks preceding the great flood of 1927, this novel depicts a place and way of life about to be forever changed. On the verge of manhood and a stone's throw of the rising Mississippi River, Louis Proby is pulled between his love of the natural world and the glittering temptations of New Orleans, between the beautiful Nanette Lançon and a father who no longer seems larger-than-life, between the simplicity of childhood and the complicated decisions of adulthood. Louis comes of age at a time when the country is coming of age. In Louisiana, it's a time when the powerful prove themselves willing to sacrifice the poor to protect their position. As the people of Cypress Parish go about their daily lives, bankers in New Orleans are plotting to alter those lives irrevocably. Like so many calamities, the one that befalls Cypress Parish has both natural and human causes. Based on historical events and narrated on the eve of another disaster, *The Unnatural History of Cypress Parish* tells the story of a young man growing up in a time and place not quite like any other. And in doing so it reveals the complexity of our own relationship to the past. This a beautifully turned novel of love and natural history, married to the shadowy politics of Louisiana, a novel about what manhood means now and what it meant in the south in the 1920s.

Unnatural Deeds - Cyn Balog 2016-11-01

A novel of infatuation and obsession, *Unnatural Deeds* has an electrifying ending that readers won't see coming. Victoria Zell doesn't fit in, not that she cares what anyone thinks. She and her homeschooled boyfriend, Andrew, are inseparable. All they need is each other. That is, until Zachary Zimmerman joins her homeroom. Within an hour of meeting, he convinces good-girl Vic to cut class. And she can't get enough of that rush. Despite Vic's loyalty to Andrew, she finds her life slowly entwining with Z's. Soon she's lying to everyone she knows in an effort to unravel Z's secrets. Except Z's not the only one with a past. Victoria's hiding her own secrets, secrets that will come back to haunt her...and destroy everything in her path.

The Lower Quarter - Elise Blackwell 2015-09-21

A man murdered during Katrina in a hotel room two blocks from her art-restoration studio was closely tied to a part of Johanna's past that she would like kept secret. But missing from the crime scene is a valuable artwork painted in 1926 by a renowned Belgian artist that might bring it all back. An acquaintance, Clay Fontenot, who has enabled a wide variety

of personal violations in his life, some of which he has enjoyed, is the scion of a powerful New Orleans family. And Marion is an artist and masseuse from the Quarter who has returned after Katrina to rebuild her life. When Eli, a convicted art thief, is sent to find the missing painting, all of their stories weave together in the slightly deranged halls of the Quarter.

The Quest to End World Hunger - Kjelle Marylou 2014-06-10

The Quest to End World Hunger explores the crisis of world hunger and the people and organizations that are working to eliminate the problem. This title also focuses on people who have been helped, the progress that has already been made and the challenges still left to be met. The young reader analyzes the stories and develops their own opinion of what can be done to solve the world hunger crisis. The book has been developed to address many of the Common Core specific goals, higher level thinking skills, and progressive learning strategies from informational texts for middle grade and junior high level students.

Anatomy Of A Rose - Sharman Apt Russell 2009-04-24

In *Anatomy of a Rose*, Sharman Apt Russell eloquently unveils the "inner life" of flowers. From their diverse fragrances to their nasty deceptions, Russell proves that, where nature is concerned, "wonder is not only our starting point, it can also be our destination." Throughout this botanical journey, she reveals that the science behind these intelligent plants—how they evolved, how they survive, how they heal—is even more awe-inspiring than their fleeting beauty. Russell helps us imagine what a field of snapdragons looks like to a honeybee, and she introduces us to flowers that regulate their own temperature, attract pollinating bats, even smell like a rotting corpse. She also delves into cutting-edge research on everything from flower senses to their healing power. Long used to ease everything from depression to childbirth, flowers are now our main line of defense against childhood leukemia and the deadly Ebola virus. In this poetic rumination, which combines graceful writing with a scientist's clarity, Russell brings together the work of botanists around the globe, and illuminates a world at once familiar and exotic.

The Hunger - Alma Katsu 2019-03-05

"Deeply, deeply disturbing, hard to put down, not recommended reading after dark." --Stephen King A tense and gripping reimagining of one of America's most haunting human disasters: the Donner Party with a supernatural twist. Evil is invisible, and it is everywhere. That is the only way to explain the series of misfortunes that have plagued the wagon train known as the Donner Party. Depleted rations, bitter quarrels, and the mysterious death of a little boy have driven the isolated travelers to the brink of madness. Though they dream of what awaits them in the West, long-buried secrets begin to emerge, and dissent among them escalates to the point of murder and chaos, unknowingly propelling them into one of the deadliest and most disastrous Western adventures in American history. As members of the group begin to disappear, the survivors start to wonder if there really is something disturbing, and hungry, waiting for them in the mountains...and whether the evil that has unfolded around them may have in fact been growing within them all along. Effortlessly combining the supernatural and the historical, *The Hunger* is an eerie, thrilling look at the volatility of human nature, pushed to its breaking point.

The Eucharist and World Hunger - Izunna Okonkwo 2011-12-21

Hunger is a menace in different parts of the globe. It has more unnatural than natural causes. Though efforts have been made towards alleviating its causes and consequences, more actions still need to be taken for its genuine alleviation and eventual eradication in the world. For Joseph Grassi, 'painful hunger is a daily occurrence that must be countered by ongoing effective programs that enter into the lives of every Christian'. Such position not only recognises the frequency and excruciating nature of hunger but also suggests that Christians and other religious groups have a very important role to play in order to eradicate hunger and its devastating effects. This book explores the nuances of hunger, its causes, dimensions and approaches, as well as its connection to the Eucharist. It argues that hunger can be eradicated and that the Eucharist stands out as a veritable model.

The Sixth Extinction - Elizabeth Kolbert 2014-02-11

ONE OF THE NEW YORK TIMES BOOK REVIEW'S 10 BEST BOOKS OF THE YEAR A major book about the future of the world, blending intellectual and natural history and field reporting into a powerful account of the mass extinction unfolding before our eyes Over the last half a billion years, there have been five mass extinctions, when the diversity of life on earth suddenly and dramatically contracted. Scientists around the world are currently monitoring the sixth extinction, predicted to be the most devastating extinction event since the asteroid impact that wiped out the dinosaurs. This time around, the cataclysm is us. In *The Sixth Extinction*, two-time winner of the National Magazine Award and *New Yorker* writer Elizabeth Kolbert draws on the work of scores of researchers in half a dozen disciplines, accompanying many of them into the field: geologists who study deep ocean cores, botanists who follow the tree line as it climbs up the Andes, marine biologists who dive off the Great Barrier Reef. She introduces us to a dozen species, some already gone, others facing extinction, including the Panamian golden frog, staghorn coral, the great auk, and the Sumatran rhino. Through these stories, Kolbert provides a moving account of the disappearances occurring all around us and traces the evolution of extinction as concept, from its first articulation by Georges Cuvier in revolutionary Paris up through the present day. The sixth extinction is likely to be mankind's most lasting legacy; as Kolbert observes, it compels us to rethink the fundamental question of what it means to be human.

The Hungry Season - T. Greenwood 2010-02-01

It's been five years since the Mason family vacationed at the lakeside cottage in northeastern Vermont, close to where prize-winning novelist Samuel Mason grew up. The summers that Sam, his wife, Mena, and their twins Franny and Finn spent at Lake Gormlaith were noisy, chaotic,

and nearly perfect. But since Franny's death, the Masons have been flailing, one step away from falling apart. Lake Gormlaith is Sam's last, best hope of rescuing his son from a destructive path and salvaging what's left of his family. As Sam struggles with grief, writer's block, and a looming deadline, Mena tries to repair the marital bond she once thought was unbreakable. But even in this secluded place, the unexpected--in the form of an over-zealous fan, a surprising friendship, and a second chance--can change everything. From the acclaimed author of *Two Rivers* comes a compelling and beautifully told story of hope, family, and above all, hunger--for food, sex, love and success--and for a way back to wholeness when a part of oneself has been lost forever. Praise For T. Greenwood's *Two Rivers* "A dark and lovely elegy, filled with heartbreak that turns itself into hope and forgiveness. I felt so moved by this luminous novel." --Luanne Rice, *New York Times* bestselling author "T.
