## **Gender and Modernity in Andean Bolivia -**

Marcia Stephenson 2010-07-05

In Andean Bolivia, racial and cultural differences are most visibly marked on women, who often still wear native dress and speak an indigenous language rather than Spanish. In this study of modernity in Bolivia, Marcia Stephenson explores how the state's desire for a racially and culturally homogenous society has been deployed through images of womanhood that promote the notion of an idealized, acculturated female body. Stephenson engages a variety of texts-critical essays, novels, indigenous testimonials, education manuals, self-help pamphlets, and position papers of diverse women's organizations-to analyze how the interlocking tropes of fashion, motherhood, domestication, hygiene, and hunger are used as tools for the production of dominant, racialized ideologies of womanhood. At the same time, she also uncovers long-standing patterns of resistance to the modernizing impulse,

especially in the large-scale mobilization of indigenous peoples who have made it clear that they will negotiate the terms of modernity, but always "as Indians."

*Taking Back the Streets* - Temma Kaplan  
2004-02-16

Toward the end of the twentieth century in places ranging from Latin America and the Caribbean to Europe, the United States, South Africa, Nigeria, Iran, Japan, China, and South Asia, women and young people took to the streets to fight injustices they believed they could not confront in any other way. In the hope of changing the way politics is done, they called officials to account for atrocities they had committed and unjust laws they had upheld.

They attempted to drive authoritarian governments from power by publicizing the activities these officials tried to hide. This powerful book takes us into the midst of these movements to give us a close-up look at how a new generation bore witness to human rights violations, resisted the efforts of regimes to shame and silence young idealists, and created a vibrant public life that remains a vital part of ongoing struggles for democracy and justice today. Through personal interviews, newspaper accounts, family letters, and research in the archives of human rights groups, this book portrays women and young people from Argentina, Chile, and Spain as emblematic of others around the world in their public appeals for direct democracy. An activist herself, author Temma Kaplan gives readers a deep and immediate sense of the sacrifices and accomplishments, the suffering and the power of these uncommon common people. By showing that mobilizations, sometimes accompanied by

shaming rituals, were more than episodic—more than ways for societies to protect themselves against government abuses and even state terrorism—her book envisions a creative political sphere, a fifth estate in which ordinary citizens can reorient the political practices of democracy in our time.

Dieciocho expertos en el campo de la intimidación y el acoso cibernético y el SRSG sobre Violencia contra los Niños, han escrito una contribución única de su área específica de experiencia, abordando el acoso y el acoso cibernético. Comenzando con una fundación de derechos humanos y la participación de los niños, se siguen ejemplos que muestran diferentes experiencias en el desarrollo de políticas y legislación, incluyendo dimensiones específicas y grupos vulnerables que deben

tenerse en cuenta. Esta publicación brinda diferentes ejemplos de las pocas intervenciones basadas en la evidencia que han demostrado su eficacia en la prevención y respuesta a la intimidación y el acoso cibernético en la escuela y sus alrededores, disminuyendo su prevalencia. La publicación finaliza con información sobre datos globales y la necesidad de mejores metodologías de recolección y análisis; una sección que aborda algunos de los aspectos específicos presentados por el acoso cibernético y el uso de las tecnologías de la información y la comunicación, y finaliza con una descripción general de la prevalencia de la intimidación y el acoso cibernético en diferentes regiones del mundo.

*Missing* - Jenny Edkins 2011-09-06

Stories of the missing offer profound insights into the tension between how political systems see us and how we see each other. The search

for people who go missing as a result of war, political violence, genocide, or natural disaster reveals how forms of governance that objectify the person are challenged. Contemporary political systems treat persons instrumentally, as objects to be administered rather than as singular beings: the apparatus of government recognizes categories, not people. In contrast, relatives of the missing demand that authorities focus on a particular person: families and friends are looking for someone who to them is unique and irreplaceable. In *Missing*, Jenny Edkins highlights stories from a range of circumstances that shed light on this critical tension: the aftermath of World War II, when millions in Europe were displaced; the period following the fall of the World Trade Center towers in Manhattan in 2001 and the bombings in London in 2005; searches for military personnel missing in action; the thousands of political "disappearances" in Latin America; and in more quotidian circumstances where people walk out

on their families and disappear of their own volition. When someone goes missing we often find that we didn't know them as well as we thought: there is a sense in which we are "missing" even to our nearest and dearest and even when we are present, not absent. In this thought-provoking book, Edkins investigates what this more profound "missingness" might mean in political terms.

**A Lexicon of Terror** - Marguerite Feitlowitz  
1998

During the Dirty War in Argentina, nearly 30,000 citizens were kidnapped, tortured and killed by the government in a massive program of state terrorism. Labelled subversives, they were held without trial and were brutally tortured in secret jails, or drugged and thrown alive, naked and unconscious, from airplanes into the ocean. Based on interviews and exhaustive research, Feitlowitz examines the aftermath of Argentina's Dirty War, which has left survivors, living and working next to their torturers, and which has left its marks on the language, culture and memories of the Argentine

people.

**Children of Fate** - Nara B. Milanich 2010-07-01

In modern Latin America, profound social inequalities have persisted despite the promise of equality. Nara B. Milanich argues that social and legal practices surrounding family and kinship have helped produce and sustain these inequalities. Tracing families both elite and plebeian in late-nineteenth- and early-twentieth-century Chile, she focuses on a group largely invisible in Latin American historiography: children. The concept of family constituted a crucial dimension of an individual's identity and status, but also denoted a privileged set of gendered and generational dependencies that not all people could claim. *Children of Fate* explores such themes as paternity, illegitimacy, kinship, and child circulation over the course of

eighty years of Chile's modern history to illuminate the ways family practices and ideologies powerfully shaped the lives of individuals as well as broader social structures. Milanich pays particular attention to family law, arguing that liberal legal reforms wrought in the 1850s, which left the paternity of illegitimate children purposely unrecorded, reinforced not only patriarchal power but also hierarchies of class. Through vivid stories culled from judicial and notarial sources and from a cache of documents found in the closet of a Santiago orphanage, she reveals how law and bureaucracy helped create an anonymous underclass bereft of kin entitlements, dependent on the charity of others, and marginalized from public bureaucracies. Milanich also challenges the recent scholarly emphasis on state formation by highlighting the enduring importance of private, informal, and extralegal relations of power within and across households. *Children of Fate* demonstrates how the study of children can

The Formation of the Child in Early Modern Spain - Grace E. Coolidge 2016-03-16

Drawing on history, literature, and art to explore childhood in early modern Spain, the contributors to this collection argue that early modern Spaniards conceptualized childhood as a distinct and discrete stage in life which necessitated special care and concern. The volume contrasts the didactic use of art and literature with historical accounts of actual children, and analyzes children in a wide range of contexts including the royal court, the noble family, and orphanages. The volume explores several interrelated questions that challenge both scholars of Spain and scholars specializing in childhood. How did early modern Spaniards

[omahafoodtruckassociation.org](http://omahafoodtruckassociation.org) on by

perceive childhood? In what framework (literary, artistic) did they think about their children, and how did they visualize those children's roles within the family and society? How do gender and literary genres intersect with this concept of childhood? How did ideas about childhood shape parenting, parents, and adult life in early modern Spain? How did theories about children and childhood interact with the actual experiences of children and their parents? The group of international scholars contributing to this book have developed a variety of creative, interdisciplinary approaches to uncover children's lives, the role of children within the larger family, adult perceptions of childhood, images of children and childhood in art and literature, and the ways in which children and childhood were vulnerable and in need of protection. Studying children uncovers previously hidden aspects of Spanish history and allows the contributors to analyze the ideals and goals of Spanish culture, the inner dynamics of

the Habsburg court, and the vulnerabilities and weaknesses that Spanish society fought to overcome.

essays that analyze questions of reproductive justice throughout its cultural representation in global literature and film. Each chapter analyzes texts from within the framework of reproductive justice in an interdisciplinary way, including English, Japanese, Italian, Spanish, and German language, literature and culture, comparative literature, film, South Asian fiction, Canadian theatre, writing, gender studies, Deaf studies, disability studies, global health and medical humanities, and sociology. Academics, graduate

students and advanced undergraduate students in Literature, Gender, Sexuality and Women's Studies, Cultural Studies, Motherhood Studies, Comparative Literature, History, Sociology, the Medical Humanities, Reproductive Justice, and Human Rights are the main audience of the volume.

*Toward a World Free from Violence* - United Nations Office of the Special Representative of the Secretary-General on Violence against Children 2016-03-28

This Global Survey conducted by the Special Representative of the Secretary-General on Violence against Children confirms that

recommendations made in the 2006 UN Study on Violence against Children (VAC) are as urgent as they were at the time of the Study's release and continue to serve as a fundamental reference for child protection initiatives the world over. It highlights some progress including awareness raising laws and policies to prevent and address VAC. However, progress has been slow, uneven and too fragmented to bring violence to an end. Most children exposed to violence live in isolation, loneliness, and fear and do not know where to turn for help, especially when the perpetrator is someone close and on whom they depend for their protection and well-being. Governments must increase efforts to practice these recommendations identified in the 2006 UN Study to make them a reality for every child in every country. This comprehensive survey provides important examples of initiatives that successfully shield children from violence and address the attitudes that allow it to flourish. It

*Children of the Father King* - Bianca Premo  
2006-05-18

In a pioneering study of childhood in colonial Spanish America, Bianca Premo examines the lives of youths in the homes, schools, and institutions of the capital city of Lima, Peru. Situating these young lives within the framework of law and intellectual history from 1650 to 1820, Premo brings to light the colonial politics of childhood and challenges readers to view patriarchy as a system of power based on age, caste, and social class as much as gender. Although Spanish laws endowed elite men with an authority over children that mirrored and reinforced the monarch's legitimacy as a colonial "Father King," Premo finds that, in practice, Lima's young often grew up in the care of adults--such as women and slaves--who were subject to the patriarchal authority of others. During the Bourbon Reforms, city inhabitants of all castes and classes began to practice a "new politics of

the child," challenging men and masters by employing Enlightenment principles of childhood. Thus the social transformations and political dislocations of the late eighteenth century occurred not only in elite circles and royal palaces, Premo concludes, but also in the humble households of a colonial city.

Their essays consider what techniques and technologies are used to govern the child, what role the family plays, what is global and what is culturally specific in the changes, and how the subject is constructed and construed.
