The Legendary Sources of Flaubert's Saint Julien - Benjamin F. Bart 1977-12-15

The sources for La Légende de Saint Julien l'Hospitalier, one of Flaubert's finest literary works, have long been the subject of numerous conflicting theories. The implications of the controversy are broad and important, not only for Flaubert's work but also for our understanding of how writers generally use traditional material. Superficial resemblances have led critics to conclude that Flaubert relied heavily on a medieval tale of Saint Julian and that he borrowed details and specific phrases from his medieval predecessor. This book, by a world renowned specialist in Flaubert studies and a medieval philologist, demonstrates that the Légende is not medieval in structure or in spirit, and that its conception is distinctly modern; where Flaubert borrowed at all he used contemporary sources to recast the Julian legend in Romantic style. Bart and Cook establish definitely what legendary sources were and show how Flaubert came into contact with them. Their extensive commentary compares the sources and the Légende in detail, explains the circumstances under which Flaubert used his materials, and analyses how they were woven into the texture of his own tale. The book makes available source material scattered throughout obscure periodicals, reproduces accurately and dates correctly important segments of Flaubert's drafts and scenarios, and provides the first modern printed edition of the Alençon life of Saint Julian which Lecointre-Dupont adapted in 1838, thereby giving Flaubert indirect access to the old tale. An introductory chapter explores the broader question of the development of legends and how a particular legendary sequence, embodying powerful themes, was amplified and made explicit from the twelfth century to Flaubert's time.

Zoo - Eric Baratay 2004

Wild animals have fascinated human observers since time immemorial. The story of our interest in collecting, classifying and dominating Nature so that its inner workings could be understood also looms large in the history of science, and thus it is surprising that the history of menageries, zoological gardens and the zoo as we know it today has been so poorly documented. This gap is addressed by Zoo, a comprehensive history of the zoo in the Western world.

The Shock of the Anthropocene - Christophe Bonneuil 2016-02-09
Dissecting the new theoretical buzzword of the "Anthropocene" The Earth has entered a new epoch: the Anthropocene. What we are facing is not only an environmental crisis, but a geological revolution of human origin. In two centuries, our planet has tipped into a state unknown for millions of years. How did we get to this point? Refuting the convenient view of a "human species" that upset the Earth system, unaware of what it was doing, this book proposes the first critical history of the Anthropocene, shaking up many accepted ideas: about our supposedly recent "environmental awareness," about previous challenges to industrialism, about the manufacture of ignorance and consumerism,

about so-called energy transitions, as well as about the role of the military in environmental destruction. In a dialogue between science and history, *The Shock of the Anthropocene* dissects a new theoretical buzzword and explores paths for living and acting politically in this rapidly developing geological epoch.

Residue Reviews / Rückstands-Berichte - Francis A. Gunther 2012-12-06
That residues of pesticide and other "foreign" chemicals in foodstuffs are of concern to everyone everywhere is amply attested by the reception accorded previous volumes of "Residue Reviews" and by the gratifying enthusiasm, sincerity, and efforts shown by all the individuals from whom manuscripts have been solicited. Despite much propaganda to the contrary, there can never be any serious question that pest-control chemicals and food additive chemicals are essential to adequate food production, manufacture, marketing, and storage, yet without continuing surveillance and intelligent control some of those that persist in our foodstuffs could at times conceivably endanger the public health. Ensuring safety-in-use of these many chemicals is a dynamic challenge, for established ones are continually being displaced by newly developed ones more acceptable to food technologists, pharmacologists, toxicologists, and changing pest-control requirements in progressive food-producing economies. These matters are also of genuine concern to increasing numbers of governmental agencies and legislative bodies around the world, for some of these chemicals have resulted in a few mishaps from improper use. Adequate safety-in-use evaluations of any of these chemicals persisting into our food stuffs are not simple matters, and they incorporate the considered judgments of many individuals highly trained in a variety of complex biological, chemical, food technological, medical, pharmacological, and toxicological disciplines. **Nouveau Guide des mères de famille, ou éducation physique, morale et intellectuelle de l'enfance, etc** - Isidore Hyacinthe MAIRE 1843
