The Image of the City - Kevin Lynch 1964-06-15

The classic work on the evaluation of city form. What does the city's form actually mean to the people who live there? What can the city planner do to make the city's image more vivid and memorable to the city dweller? To answer these

questions, Mr. Lynch, supported by studies of Los Angeles, Boston, and Jersey City, formulates a new criterion—imageability—and shows its potential value as a guide for the building and rebuilding of cities. The wide scope of this study leads to an original and vital method for the evaluation of city form. The architect, the planner, and certainly the city dweller will all want to read this book.

**Dopamine Nation** - Dr. Anna Lembke 2021-08-24

INSTANT NEW YORK TIMES and LOS ANGELES TIMES BESTSELLER “Brilliant . . . riveting, scary, cogent, and cleverly argued.”—Beth Macy, author of Dopesick, as heard on Fresh Air This book is about pleasure. It’s also about pain. Most important, it’s about how to find the delicate balance between the two, and why now more than ever finding balance is essential. We’re living in a time of unprecedented access to high-reward, high-dopamine stimuli: drugs, food, news, gambling,

shopping, gaming, texting, sexting, Facebooking, Instagramming, YouTubing, tweeting . . . The increased numbers, variety, and potency is staggering. The smartphone is the modern-day hypodermic needle, delivering digital dopamine 24/7 for a wired generation. As such we've all become vulnerable to compulsive overconsumption. In *Dopamine Nation*, Dr. Anna Lembke, psychiatrist and author, explores the exciting new scientific discoveries that explain why the relentless pursuit of pleasure leads to pain . . . and what to do about it. Condensing complex neuroscience into easy-to-understand metaphors, Lembke illustrates how finding contentment and connectedness means keeping dopamine in check. The lived experiences of her patients are the gripping fabric of her narrative. Their riveting stories of suffering and redemption give us all hope for managing our consumption and transforming our lives. In essence, *Dopamine Nation* shows that the secret to finding balance is combining the science of

desire with the wisdom of recovery.

**Evidence-based Child Forensic Interviewing**  
- Karen J. Saywitz 2013-08-09

Interviewers face a dilemma when questioning children in a forensic context--an inherent mismatch between the needs of the legal system and the capabilities of young children. This is especially problematic when legal decisions with potentially serious consequences depend on the results of the interview, such as in cases involving eyewitness memory, divorce, and allegations of abuse and neglect. Without accommodations to a child's developmental level, interviews can result in false reports, miscommunication, and misinterpretation,

despite an interviewer's best intentions. Evidence-based Child Forensic Interviewing addresses this discrepancy and presents an innovative approach to close the gap by providing the scaffolding, structure, and guidance children need to perform optimally. Created by Drs. Karen J. Saywitz and Lorinda B. Camparo and outlined in this guide, the Developmental Narrative Elaboration (DNE) Interview is an evidence-based step-by-step process and set of techniques for forensic contexts designed to help children ages 3-12 accurately tell as much as they can about their experiences and perceptions. The DNE is comprised of a developmentally sensitive core template and optional techniques that can be embedded at the interviewer's discretion as cases unfold. This book reviews the relevant research and then, with sample language, transcripts, and suggested activities, details a three-phased interview with examples. This empirically supported guide is designed to meet

the needs of both novice and seasoned professionals in mental health, social service, law enforcement, and the legal system when children's input is needed for legal and social-service decision making.

Laura spends her days looking at other people's potential calamities. She works in the radiography unit of a small hospital on the Maine coast, bearing constant witness to the fears of patient after frightened patient. In a job where finding nothing is always the best possible outcome, she is well versed in the random injustices of life, a truism that has lately been playing out in her marriage as well. Since being downsized, her husband, Dan, has become withdrawn, his emotional distance gradually corroding their relationship. With a son in college and a daughter soon due to leave home,

Laura has begun to fear that the marital sounds of silence will only deepen once the nest is truly empty. When an opportunity arises to attend a weekend medical conference in Boston, Laura jumps at this respite from home. While checking in, she meets a man as gray and uninspired as her drab hotel room. Richard is an outwardly dull, fiftysomething insurance salesman. But during a chance second encounter, Laura discovers him to be surprisingly complex and thoughtful, someone who, like herself, is grappling with the same big questions about decisions made and the human capacity for self-entrapment. As their conversation deepens and begins to veer into shared confessions, the overwhelming sense of personal and intimate connection arises. A transformative love affair begins. But can this potential, much-longed-for happiness be married to their own difficult personal circumstances? Can they upend their lives and embrace that most loaded of words: change? A love story as clear-sighted and

ruminative as it is affecting, Five Days will have you reflecting about the choices we all make that shape our destinies. Crafted with Kennedy's trademark evocative prose and pitch-perfect in its depiction of the complex realities of modern life, it is a novel that speaks directly to the many contradictions of the human heart.

**From Accidents to Zero** - Andrew Sharman  
2016-05-20

As leaders increasingly understand the importance of good safety practice to support their business objectives, safety and health practitioners develop better tools and solutions. However, there is still a gulf between these two groups where engagement, communication and shared understanding can be found lacking. From Accidents to Zero opens up the field of safety culture and breaks it down into bite-sized pieces to facilitate new, critical thought and inspire practical action. Based on the concept of creating safety, as opposed to just preventing accidents, each of the 26 chapters in this user-

friendly book includes explanation, commentary, reflections and practical activities designed to systematically and sustainably improve workplace safety culture. Core topics range from behaviour to values, daily rituals to unsafe acts, felt leadership to trust. Andrew Sharman's practical guide blends current academic thinking with authoritative guidance and sets up the opportunity for all parts of the organization to close the gap by providing very clear steps to thinking and acting differently. It sparks insight into how both traditional methods and novel approaches can be brought to life in real world situations. From Accidents to Zero offers a clear route to culture change through over one hundred pragmatic ideas to motivate and lead people, influence behaviour and drive a positive evolution in workplace safety.

*Research Methods for Student Radiographers* - Christopher M. Hayre 2021-09-27

This book provides an holistic picture of the application of research in radiography and focuses on multivariant methodological approaches and practices. It will provide readers insight into both contemporary and innovative methods within radiography research, backed up with evidence-based literature. This book may also be translated into other health disciplines as it introduces research to the reader by detailing

terms that can often be confusing for students. These remain central in understanding the importance of research in radiography and how the generation of new knowledge is obtained. This will be supported with subsequent chapters concerning the literature, formation of research questions and detail the early beginnings of a research proposal. Chapters will include a wide range of topics, such as quantitative and qualitative methodologies and data collection tools pertinent to radiographic research, whilst discussing data analysis and need for rigor. The authors draw from our experiences, published outputs and clinical work, supported with alternate philosophies and methods used in diagnostic radiography. Each chapter will examine the multifaceted use and application of each 'sub-theme' pertinent to research in radiography, which is presented in a single text for students and, perhaps, practitioners. The targeted audience for this book is interdisciplinary but clearly focuses on those

studying undergraduate radiography in response to the limited texts available. We also anticipate it to provide a useful tool for academics delivering undergraduate radiography programmes and those supporting postgraduate research. The key features will: • explore important research approaches and concepts within diagnostic radiography • provide contemporary evidence-based practice regarding mixed method approaches • provide a 'how to guide' for understanding key research principles in a wide range of radiographic settings • evaluate the impact of research on patients and the radiographer-patient relationship

War of Independence. The second, Babe Cronin, is set in 1924, shortly after the Irish Civil War. Kitty is a dressmaker with a taste for laudanum. Babe is a stenographer who has fallen in love with a young revolutionary. Through their separate, overlapping stories, Evans colours an era and a culture seldom voiced in verse. Set back some years from their stories, both women find a strand of humour in what took place, even as they recall the passion, vertigo and terror of those times. A dream-like compulsion in their voices adds a sense of retrospective inevitability. The use of intense, almost psychedelic colour in the first half of the book opposes the flattened, monochrome language of the second half. This is a work of vivid contrasts, of age and youth, women and men, the Irish and the English: complementary stories of balance, imbalance, and transition.

as currently practiced. The book begins with a theoretically informed introduction to qualitative interviewing by presenting a variegated landscape of how conversations have been used for knowledge-producing purposes. Particular attention is paid to the complementary positions of experience-focused interviewing (phenomenological positions) and language-focused interviewing (discourse-oriented positions), which focus on interview talk as reports (of the experiences of interviewees) and accounts (occasioned by the situation of interviewing), respectively. The following chapters address various ways of designing qualitative interview studies and a guide to writing up the methodological procedures and results of an interview study. The book concludes with a presentation of the most common errors in interview reports, offering a range of solutions and strategies for evaluating research findings based on qualitative interviews.

Cold Cereal - Adam Rex 2012-02-07

From author Adam Rex comes the first book in the Cold Cereal Saga—a hilarious, clever, and action-packed adventure series with an educational hook. Scottish Play Doe—aka Scott—is used to being a little different. Sometimes he hallucinates things no one else can see. But then one of these hallucinations tries to steal Scott's backpack, and he comes face-to-face with an honest-to-goodness leprechaun named Mick who's on the run from, of all things, the Goodco Cereal Company. With the help of his friends Erno and Emily, Scott and Mick uncover Goodco's sinister plans—and take the first steps in saving the world from the evil cereal company. Like the Artemis Fowl Series and the Percy Jackson and the Olympians Series, the Cold Cereal Saga takes elements of familiar mythology—in this case, Arthurian legend and Irish folklore—and reimagines it in the modern world with a cast of relatable characters and myriad magical beings. The story is told from

multiple points of view, and there are dozens of illustrations—including "commercial breaks"—and stories within the story. Supports the Common Core State Standards

*The Oxford Handbook of Hoarding and Acquiring* - Randy O. Frost 2014

Hoarding involves the acquisition of and inability to discard large numbers of possessions that clutter the living area of the person collecting them. It becomes a disorder when the behavior causes significant distress or interferes with functioning. Hoarding can interfere with activities of daily living (such as being able to sit in chairs or sleep in a bed), work efficiency, family relationships, as well as health and safety. Hoarding behavior can range from mild to life-threatening. Epidemiological findings suggest that hoarding occurs in 2-6% of the adult population, making it two to three times more common than obsessive-compulsive disorder. The fifth edition of the Diagnostic and Statistical Manual of Mental Disorders (DSM-5) now includes Hoarding Disorder as a distinct disorder within the OCD and Related Anxiety Disorders section, creating a demand for

information about it. The Oxford Handbook of Hoarding and Acquiring is the first volume to detail the empirical research on hoarding. Including contributions from all of the leading researchers in the field, this comprehensive volume is divided into four sections in addition to introductory and concluding chapters by the editors: Phenomenology, Epidemiology, and Diagnosis; Etiology; Assessment and Intervention; and Hoarding in Special Populations. The summaries of research and clinical interventions contained here clarify the emotional and behavioral features, diagnostic challenges, and nature of the treatment interventions for this new disorder. This handbook will be a critical resource for both practitioners and researchers, including psychiatrists, psychologists, neurologists, epidemiologists, social workers, occupational therapists, and other health and mental health professionals who encounter clients with hoarding problems in their practice and
