DIY Kids' Dress Up - Jessica Near 2018-05-25

Help your little ones to enjoy hours of imaginary play with this wonderful collection of sewing patterns for DIY kids' dress up accessories. Author Jessica Near has designed a range of masks, paws and tails for days of dressing up fun. Your little ones can choose from magical creatures to wild animals, birds of paradise and superheroes--whatever takes their mood. Jessica explains how to make the basic shapes for each of the

accessories and how to vary them depending on the character and creature. There are step-by-step illustrations for all the projects and the general sewing techniques, and, although the designs are distinctive, the instructions are easy enough for absolute beginners. They are all made from felt which makes them quick and easy to sew--no need to worry about tricky hems or seams splitting.

The School Garden Curriculum - Kaci Rae Christopher 2019-04-23

Sow the seeds of science and wonder and inspire the next generation of Earth stewards The School Garden Curriculum offers a unique and comprehensive framework, enabling students to grow their knowledge throughout the school year and build on it from kindergarten to eighth grade. From seasonal garden activities to inquiry projects and science-skill building, children will develop organic gardening solutions, a positive land ethic, systems thinking, and instincts for ecological stewardship. The world needs young people to grow into strong, scientifically literate environmental stewards. Learning gardens are great places to build this knowledge, yet until now there has been a lack of a multi-grade curriculum for school-wide teaching aimed at fostering a connection with the Earth. The book offers: A complete K-8 school-wide framework Over 200 engaging, weekly lesson plans - ready to share Place-based activities, immersive learning, and hands-on activities Integration of science, critical thinking, permaculture, and life skills

Links to Next Generation Science Standards Further resources and information sources. A model and guide for all educators, The School Garden Curriculum is the complete package for any school wishing to use ecosystem perspectives, science, and permaculture to connect children to positive land ethics, personal responsibility, and wonder, while building vital lifelong skills. Silicon Carbide and Related Materials 1995, Proceedings of the Sixth INT Conference, Kyoto, Japan, 18-21 September 1995 - Shin-ichi Nakashima 1996

The special advantages of silicon carbide and related materials such as III-V nitrides in applications in hostile environments and for blue-light-emitting diodes continue to stimulate research and development activity. The International Conference on Silicon Carbide and related Materials is now the established forum for exchanging information on advances in this subject. This volume includes both invited and contributed papers covering the whole field of silicon carbide and related materials research, from the fundamental physics of these materials, through their growth, control of properties, characterization, surface and interface modification, device processing and fabrication, to simulation and modelling. Materials scientists, electronic engineers and solid state

physicists who work with these materials, as well as those who are contemplating research in this expanding field, will find this a unique single source of information.
