Local Lives in a Global Pandemic: - Pat Caren 2021-10-14

Local Lives in a Global Pandemic: Stories from North Central Florida covers the COVID-19 pandemic at its peak in 2020. It is a snapshot designed to give readers insights into the thoughts and feelings of their neighbors, and for future generations, a window into the real-time experiences of those who lived through the ordeal. The book includes a preface from Lauren Poe, mayor of Gainesville, and entries from a long list of contributors. The essays were collected by the Matheson History Museum and the Writers Alliance of Gainesville. Contributions come

from writers and non-writers alike. Victims describe their suffering.

Medical personnel highlight their struggles. Young people decry being denied rites of passage such as prom and graduation. Teachers, parents, grandparents, public figures, and even a prison inmate give their perspective. While the stories are drawn from north central Florida, they will resonate with anyone who wants to get a deeper sense of how the world was blindsided by the COVID-19 pandemic.

Grape Man of Texas is the first biography of Thomas Volney Munson (1843-1913), the internationally recognized horticulturist who developed over 300 new varieties of grapes, some of which are still grown today on almost every continent. He is perhaps best known for his work in fighting the phylloxera epidemic of the late nineteenth century, which nearly destroyed the world's vineyards. His solution—grafting vinifera onto certain resistant native rootstocks from Texas—earned him the Chevalier du Merite Agricole in the French Legion of Honor and numerous accolades. This second edition introduces new insights into the phylloxera period, Munson's many papers and publications, and his far-sighted grasp of the needs of twentieth century agriculture and transportation. It details the continuing influence of both his research and his hybrid grapes on modern viticulture and new varieties of vitis that have been bred from them around the world.
