The authors combine a rigorous, calculus-based development of theory with an intuitive approach that appeals to readers' sense of reason and logic. Including more than 400 examples that help illustrate concepts and theory, the Second Edition features new material on statistical inference and a wealth of newly added topics, including: Consistency of point estimators Large sample theory Bootstrap simulation Multiple hypothesis testing Fisher's exact test and Kolmogorov-Smirnov test Martingales, renewal processes, and Brownian motion One-way analysis of variance and the general linear model Extensively class-tested to ensure an accessible presentation, Probability, Statistics, and Stochastic Processes, Second Edition is an excellent book for courses on probability and statistics at the upper-undergraduate level. The book is also an ideal resource for scientists and engineers in the fields of statistics, mathematics, industrial management, and engineering.

Financial Accounting - Richard F. Kochanek 2010

The 7th Edition of Financial Accounting focuses on analysis and interpretation while retaining the basics of relevant accounting processes. Analyzing and interpreting real-life financial statements are a key part of this text. This edition covers all recent developments in financial reporting, including International Financial Reporting Standards, FASB Accounting Standards Codification, eXtensible Business Reporting Language changes, the role of the Public Company Accounting Oversight Board, and new internal control standards. Part I develops the basic accounting model using a simplified corporate form and explains the concepts and steps in the accounting cycle. The authors introduce the statement of cash flows early in the text. Part II introduces internal controls and cash accounting issues. Chapters then cover income measurement and valuation issues relating to receivables, short-term financing, inventories, and long-term assets. Part III discusses the corporation as a unique form of business organization. The authors discuss accounting for the issuance of bonds using both the straight-line and the effective interest methods. Part IV illustrates the statement of cash flows using a unique introduction that shows interrelationships among the financial statements and discusses financial statement analysis with an emphasis on the significance and interpretation of the results. It concludes with international accounting and financial reporting issues which includes a complete discussion of IFRS.

Not an Idea We Have to Shun - Institute for National Strategic Studies 2014-12-14

China's expanding international economic interests are likely to generate increasing demands for its navy, the People's Liberation Army Navy (PLAN), to operate out of area to protect Chinese citizens, investments, and sea lines of communication. The frequency, intensity, type, and location of such operations will determine the associated logistics support requirements, with distance from China, size and duration, and combat intensity being especially important drivers. How will the PLAN employ overseas bases and facilities to support these expanding operational requirements? The assessment in this book is based on Chinese writings, comments by Chinese military officers and analysts, observations of PLAN operational patterns, analysis of the overseas military logistics models other countries have employed, and interviews with military logisticians. China's rapidly expanding international interests are likely to produce a parallel expansion of PLAN operations, which would make the current PLAN tactic, exclusive reliance on commercial port access, untenable due to cost and capacity factors. This would certainly be true if China contemplated engaging in higher intensity combat operations. This book considers six logistics models that might support expanded PLAN overseas operations: the Pit Stop Model, Lean Colonial Model, Dual Use Logistics Facility, String of Pearls Model, Warehouse Model, and Model USA. Each model is analyzed in terms of its ability to support likely future naval missions to advance China's expanding overseas economic, political, and security interests and in light of longstanding Chinese foreign policy principles. This analysis concludes that the Dual Use Logistics Facility and String of Pearls models most closely align with China's foreign policy principles and expanding global interests. To assess which alternative China is likely to pursue, the book reviews current PLAN operational patterns in its Gulf of Aden counterpiracy operations to assess whether the PLAN is currently pursuing one model over the other and to provide clues about Chinese motives and potential future trajectories. To ensure that this study does not suffer from faulty assumptions, it also explicitly examines the strategic logic that Western analysts associate with the String of Pearls Model in light of the naval forces and logistics infrastructure that would be necessary to support PLAN major combat operations in the Indian Ocean. Both the contrasting inductive and deductive analytic approaches support the conclusion that China appears to be planning for a relatively modest set of missions to support its overseas interests, not building a covert logistics infrastructure to fight the United States or India in the Indian Ocean.

Georgia - International Monetary Fund. Legal Dept. 2013-01-08

The Georgian antimoney laundering (AML) and combating the financing of terrorism (CFT) regime has significantly improved since 2007. However, technical deficiencies, poor implementation, and limited resources undermine the effectiveness of the financial intelligence unit (FIU) and AML/CFT supervision. The country has a comprehensive legal framework in place criminalizing both ML and FT as autonomous offenses and no shortcomings have been identified. It has also established a framework to implement the relevant United Nations Security Council Resolutions (UNSCRs).

Alternative Investments: A Primer for Investment Professionals - Donald R. Chambers 2018

Alternative Investments: A Primer for Investment Professionals provides an overview of alternative investments for institutional asset allocators and other overseers of portfolios containing both traditional and alternative assets. It is designed for those with substantial experience regarding traditional investments in stocks and bonds but limited familiarity regarding alternative assets, alternative strategies, and alternative portfolio management. The primer categorizes alternative assets into four groups: hedge funds, real assets, private equity, and structured products/derivatives. Real assets include vacant land, farmland, timber, infrastructure, intellectual property, commodities, and private real estate. For each group, the primer provides essential information about the characteristics, challenges, and purposes of these institutional-quality alternative assets in the context of a well-diversified institutional portfolio. Other topics addressed by this primer include tail risk, due diligence of the investment process and operations, measurement and management of risks and returns, setting return expectations, and portfolio construction. The primer concludes with a chapter on the case for investing in alternatives.

The End of Accounting and the Path Forward for Investors and Managers - Baruch Lev 2016-06-14

An innovative new valuation framework with truly useful economic indicators The End of Accounting and the Path Forward for Investors and Managers shows how the ubiquitous financial reports have become useless in capital market decisions and lays out an actionable alternative. Based on a comprehensive, large-sample empirical analysis, this book reports financial documents' continuous deterioration in relevance to investors' decisions. An enlightening discussion details the reasons why accounting is losing relevance in today's market, backed by numerous examples with real-world impact. Beyond simply identifying the problem, this report offers a solution—the Value Creation Report—and demonstrates its utility in key industries. New indicators focus on strategy and execution to identify and evaluate a company's true value-

creating resources for a more up-to-date approach to critical investment decision-making. While entire industries have come to rely on financial reports for vital information, these documents are flawed and insufficient when it comes to the way investors and lenders work in the current economic climate. This book demonstrates an alternative, giving you a new framework for more informed decision making. Discover a new, comprehensive system of economic indicators Focus on strategic, value-creating resources in company valuation Learn how traditional financial documents are quickly losing their utility Find a path forward with actionable, up-to-date information Major corporate decisions, such as restructuring and M&A, are predicated on financial indicators of profitability and asset/liabilities values. These documents move mountains, so what happens if they're based on faulty indicators that fail to show the true value of the company? The End of Accounting and the Path Forward for Investors and Managers shows you the reality and offers a new blueprint for more accurate valuation.

Pitfalls & Pipelines - Abigail Anongos 2012

Indigenous peoples have suffered disproportionately from the effects of extractive industries on their lands and livelihoods, including environmental degradation, human rights violations, and dispossession. Although the abuses have been ongoing, there has been a growing assertion of the rights of indigenous peoples to decide their own development paths, which frequently calls for the rejection of large-scale extractive projects. Based primarily on the proceedings of an International Conference on Extractive Industries and Indigenous Peoples that took place in Manila in March 2009, this book thematically explores the nature of the problem, reviews recent developments and analyses the strategies employed at local, national, and international levels.

Gambling Debt - E. Paul Durrenberger 2014-12-04

Gambling Debt is a game-changing contribution to the discussion of economic crises and neoliberal financial systems and strategies. Iceland's 2008 financial collapse was the first case in a series of meltdowns, a warning of danger in the global order. This full-scale anthropology of financialization and the economic crisis broadly discusses this momentous bubble and burst and places it in theoretical, anthropological, and global historical context through descriptions of the complex developments leading to it and the larger social and cultural implications and consequences. Chapters from anthropologists, sociologists, historians, economists, and key local participants focus on the neoliberal policies—mainly the privatization of banks and fishery resources—that concentrated wealth among a select few, skewed the

distribution of capital in a way that Iceland had never experienced before, and plunged the country into a full-scale economic crisis. Gambling Debt significantly raises the level of understanding and debate on the issues relevant to financial crises, painting a portrait of the meltdown from many points of view—from bankers to schoolchildren, from fishers in coastal villages to the urban poor and immigrants, and from artists to philosophers and other intellectuals. This book is for anyone interested in financial troubles and neoliberal politics as well as students and scholars of anthropology, sociology, economics, philosophy, political science, business, and ethics. Publication supported in part by the National Science Foundation.
