**Global Education  
Monitoring Report 2020 -  
UNESCO 2020-07-07**  
This publication assesses  
progress towards Sustainable  
Development Goal 4 (SDG 4)  
on education and its ten  
targets, as well as other related

education targets in the SDG  
agenda. It addresses inclusion  
in education, drawing attention  
to all those excluded from  
education, because of  
background or ability. The  
report is motivated by the  
explicit reference to inclusion

in the 2015 Incheon Declaration, and the call to ensure an inclusive and equitable quality education in the formulation of SDG 4, the global goal for education. It reminds us that, no matter what argument may be built to the contrary, we have a moral imperative to ensure every child has a right to an appropriate education of high quality.

**Jacques Ellul and the Technological Society in the 21st Century** - Helena M.

Jerónimo 2013-07-08

This volume rethinks the work of Jacques Ellul (1912-1994) on the centenary of his birth, by presenting an overview of the current debates based on Ellul's insights. As one of the most significant twentieth-century thinkers about technology, Ellul was among the first thinkers to realize the importance of topics such as globalization, terrorism, communication technologies and ecology, and study them from a technological perspective. The book is divided into three sections. The first discusses Ellul's diagnosis of modern society, and addresses the reception of his work on the technological society, the notion of efficiency, the process of symbolization/de-symbolization, and ecology.

The second analyzes communicational and cultural problems, as well as threats and trends in early twenty-first century societies. Many of the issues Ellul saw as crucial – such as energy, propaganda, applied life sciences and communication – continue to be so. In fact they have grown exponentially, on a global scale, producing new forms of risk. Essays in the final section examine the duality of reason and revelation. They pursue an understanding of Ellul in terms of the depth of experience and the traditions of human knowledge, which is to say, on the one hand, the experience of the human being as contained in the rationalist, sociological and philosophical traditions. On the other hand there are the transcendent roots of human existence, as well as “revealed knowledge,” in the mystical and religious traditions. The meeting of these two traditions enables us to look at Ellul’s work as a whole, but above all it opens up a space for examining religious life in the technological society.

## **From Head to Toe Board**

**Book** - Eric Carle 1999-03-27

What does an elephant do? It stomps its foot. Can you? From the creator of such beloved classics as *The Grouchy Ladybug* and *The Mixed-Up Chameleon* comes this interactive story that invites kids to imitate animal movements. Watching giraffes bend their necks or monkeys wave their arms is fun, but nothing could be better than joining in. From their heads down to their toes, kids will be wriggling, jiggling, and giggling as they try to keep up with these animals! Alligators wiggle, elephants stomp, gorillas thump, and giraffes bend. Can you do it? ‘I can do it!’ is the confidence-building message of this fun-filled interactive picture book. A variety of familiar animals invite young children to copy their antics, and as they play, they will learn such important skills as careful listening, focusing attention, and following instructions. Just as alphabet books introduce the very young child to letters and simple

words, *From Head to Toe* introduces the basic body parts and simple body movements. And in the same way that children progress from understanding simple words to reading and writing sentences and stories, so they will progress from simple body movements to dancing, gymnastics, and other sports and activities, with confidence and pleasure. Eric Carle's colorful collages have delighted children for more than a generation. Each book provides hours of fun while encouraging them to stretch their imaginations. His matchless words and illustrations now send out a new challenge: Are you ready? Here we go! Move yourself *From Head to Toe*. A Main Selection of the Children's Book-of-the-Month Club

**Kim Jiyoung, Born 1982: A Novel** - Cho Nam-Joo  
2020-04-14  
A New York Times Editors

Choice Selection A global sensation, Kim Jiyoung, Born 1982 “has become...a touchstone for a conversation around feminism and gender” (Sarah Shin, *Guardian*). One of the most notable novels of the year, hailed by both critics and K-pop stars alike, Kim Jiyoung, Born 1982 follows one woman's psychic deterioration in the face of rampant misogyny. In a tidy apartment on the outskirts of Seoul, millennial “everywoman” Kim Jiyoung spends her days caring for her infant daughter. But strange symptoms appear: Jiyoung begins to impersonate the voices of other women, dead and alive. As she plunges deeper into this psychosis, her concerned husband sends her to a psychiatrist. Jiyoung narrates her story to this doctor—from her birth to elementary school teachers who policed girls' outfits to male coworkers who installed hidden cameras in women's restrooms. But can her psychiatrist cure her, or even discover what truly ails her? “A

social treatise as well as a work of art” (Alexandra Alter, New York Times), Kim Jiyoun, Born 1982 heralds the arrival of international powerhouse Cho Nam-Joo.

### **Spaces, Worlds, and**

**Grammar** - Gilles Fauconnier  
1996-12

In the highly influential mental-spaces framework developed by Gilles Fauconnier in the mid-1980s, the mind creates multiple cognitive "spaces" to mediate its understanding of relations and activities in the world, and to engage in creative thought. These twelve original papers extend the mental-spaces framework and demonstrate its utility in solving deep problems in linguistics and discourse theory. Investigating the ties between mental constructs, they analyze a wide range of phenomena, including analogical counterfactuals; the metaphor system for conceptualizing the self; abstract change expressions in Japanese; mood in Spanish; deictic expressions; copular sentences in Japanese;

conditional constructions; and reference in American Sign Language. The groundbreaking research presented in this volume will be of interest to linguists and cognitive scientists. The contributors are Claudia Brugman, Gilles Fauconnier, George Lakoff, Yo Matsumoto, Errapel Mejias-Bikandi, Laura A. Michaelis, Gisela Redeker, Jo Rubba, Shigeru Sakahara, Jose Sanders, Eve Sweetser, and Karen van Hoek.

### **Learning Docker** - Pethuru

Raj 2015-06-29

Docker is a next-generation platform for simplifying application containerization life-cycle. Docker allows you to create a robust and resilient environment in which you can generate portable, composable, scalable, and stable application containers. This book is a step-by-step guide that will walk you through the various features of Docker from Docker software installation to the impenetrable security of containers. The book starts off by elucidating the installation procedure for Docker and a few

troubleshooting techniques. You will be introduced to the process of downloading Docker images and running them as containers. You'll learn how to run containers as a service (CaaS) and also discover how to share data among containers. Later on, you'll explore how to establish the link between containers and orchestrate containers using Docker Compose. You will also come across relevant details about application testing inside a container. You will discover how to debug a container using the docker exec command and the nsenter tool. Finally, you will learn how to secure your containers with SELinux and other proven methods.

**Global Catastrophic Biological Risks** - Thomas V. Inglesby 2020-12-12

This volume focuses on Global Catastrophic Biological Risks (GCBRs), a special class of infectious disease outbreaks or pandemics in which the combined capacity of the world's private and government resources becomes severely strained. These events, of which the 1918 influenza pandemic is emblematic, cause severe disruptions in the normal functioning of the world, exact heavy tolls in terms of morbidity and mortality, and

lead to major economic losses. GCBRs can be caused by any type of microorganism, and myriad contextual factors can influence their impact. Additionally, there are cascading questions that arise in connection with GCBR prediction, preparation, and response. This book gathers contributions from thought leaders who discuss the multi-faceted approaches needed in order to address this problem. From understanding the special characteristics of various microbes to financing challenges, the volume provides an essential primer on a neglected but highly relevant topic. Physicians, scientists, policymakers, public health practitioners and anyone with an interest in the field of pandemics, emerging infectious disease, biosecurity, and global health security will find it a valuable and insightful resource.

**Écritures Digitales** - Claire Clivaz 2019-06-13

Écritures digitales aims to demonstrate how digital writing, as new technology, contributes to the emergence of a reconfigured relationship between the human body and the machines, and how this transition influences the Jewish-Christian textual corpus referred to as "the Scriptures". Écritures digitales souhaite démontrer de quelle manière l'écriture digitale, en tant que nouvelle technologie, contribue à l'émergence d'une relation innovante entre le corps humain et les machines, et influence le corpus textuel judéo-chrétien désigné comme «les Écritures».
