The archaeological study of standing buildings is experiencing a welcome renaissance. This book outlines recent developments in the field and shows how they have contributed to our understanding of medieval domestic dwellings. Evidence from the buildings themselves, from excavation and from documentary sources is combined to provide an outline of the development of building techniques in the Middle Ages, and current knowledge about the housing of the rich, the middling sort and the poor is reviewed. The specific adaptations demanded of domestic dwellings in the growing context of towns are also discussed.

Arts of Possession - D. Vance Smith 2003

An innovative work of both economic anthropology and literary history, Arts of Possession draws on philosophical, theoretical, literary, historical, and archival sources and insights to situate the household at the center of the social and cultural imagination of fourteenth-century England. D. Vance Smith argues that in a period commonly represented as precapitalist there actually existed a sophisticated economic discourse -- and that discourse underlies common forms of representation and the writing of literary texts. His work provides a new historiography of capital and of the development of the relation between economic sophistication and cultural practices. Smith reads well-known and less-appreciated works -- such as Winner and Waster, Sir Launfal, The Canterbury Tales, and Piers Plowman -- for what they can tell us about the surpluses and economies that drew the medieval imagination, and about the complex ethics of possession at the heart of the

fourteenth-century household. In bringing this to light, Smith's book itself becomes an eloquent meditation on the poetics and ethics of possession.

Space in the Medieval West - Fanny Madeline 2016-04-01

In the last two decades, research on spatial paradigms and practices has gained momentum across disciplines and vastly different periods, including the field of medieval studies.

Responding to this 'spatial turn' in the humanities, the essays collected here generate new ideas about how medieval space was defined, constructed, and practiced in Europe, particularly in France. Essays are grouped thematically and in three parts, from specific sites, through the broader shaping of territory by means of socially constructed networks, to the larger geographical realm. The resulting collection builds on existing scholarship but brings new insight, situating medieval constructions of space in relation to contemporary conceptions of the subject.

The Great Household in Late Medieval England - C. M. Woolgar 1999-01-01

In the later medieval centuries, a whole range of important social, political and artistic activities took place against the backdrop of the great English households. In this vividly illuminating book, C. M. Woolgar explores the details of life in these great houses. Based on an extensive investigation of household accounts and related primary documents, he examines the daily routines, the weekly and annual patterns, and the life-cycle observances of birth, childhood, marriage, death and burial. He also delineates the major changes that transformed the economy and geography of both lay and clerical households between 1200 and 1500.

Medieval Women - Jocelyn Wogan-Browne 2000

In this themed collection of 24 articles by literary, historical and archaeological scholars, the study of medieval women is confidently and freshly mainstream. Profiting from the development of newly flexible models of gender, literacy, the political, the social, and the domestic, the volume is non-separatist, exploratory both of new source materials and new readings of established sources, and able to consider the broadest implications for the study of medieval culture without simply re-absorbing medieval women into invisibility. Grouped under the headings of matters of reading, of conduct and place, the essays move from legal cases to actual buildings and conceptions of the household to conduct books and chronicles to romances and saints' lives to the medieval unconscious and back again, exemplifying the mature interdisciplinarity of current work on medieval women.

Incest and the Medieval Imagination -

Elizabeth Archibald 2001-05-24

Incest is a remarkably frequent theme in medieval literature; it occurs in a wide range of genres, including romances, saints's lives, and exempla. Historically, the Church in the later Middle Ages was very concerned about breaches of the complex laws against incest, which was defined very broadly at the time to cover family relationships outside the nuclear family and also spiritual relationships through baptism. Medieval writers accepted that incestuous desire was a widespread phenomenon among women as well as men. They are surprisingly open about incest, though of course they disapprove of it; in many exemplary stories incest is identified with original sin, but the moral emphasizes the importance of contrition and the availability of grace even to such heinous sinners. This study begins with a brief account of the development of medieval incest laws, and the extent to which they were obeyed. Next comes a survey of classical incest stories and their legacy; many were retold in the Middle Ages, but they were frequently adapted to the purposes of Christian moralizers. In the three chapters that follow, homegrown medieval incest stories are grouped by relationship: mother-son

(focusing on the Gregorius legend), father-daughter (focusing on La Manekine and its analogues), and sibling (focusing on the Arthurian legend). The final chapter considers the very common medieval trope of the Virgin Mary as mother, daughter, sister and bride of Christ, the one exception to the incest taboo. In western society today, incest has recently been recognized as a serious social problem, and has also become a frequent theme in both fiction and non-fiction, just as it was in the Middle Ages. This interdisciplinary study is the first broad survey of medieval incest stories in Latin and the vernaculars (mainly French, English and German). It situates the incest theme in both literary and cultural contexts, and offers many thought-provoking comparisons and contrasts to our own society in terms of gender relations, the power of patriarchy, the role of religious institutions in regulating morality, and the relationship between life and literature.

Saracens and the Making of English

Identity - Siobhain Bly Calkin 2013-11-05

This book explores the ways in which discourses of religious, racial, and national identity blur and engage each other in the medieval West.

Specifically, the book studies depictions of Muslims in England during the 1330s and argues that these depictions, although

historically inaccurate, served to enhance and advance assertions of English national identity at this time. The book examines Saracen characters in a manuscript renowned for the variety of its texts, and discusses hagiographic legends, elaborations of chronicle entries, and popular romances about Charlemagne, Arthur, and various English knights. In these texts, Saracens engage issues such as the demarcation of communal borders, the place of gender norms and religion in communities' self-definitions, and the roles of violence and history in assertions of group identity. Texts involving Saracens thus serve both to assert an English identity, and to explore the challenges involved in making such an assertion in the early fourteenth century when the English language was regaining its cultural prestige, when the English people were increasingly at odds with their French cousins, and when English, Welsh, and Scottish sovereignty were pressing matters.

England the Nation - Thorlac Turville-Petre 1996

The first book to pay detailed attention to the earlier fourteenth century in England as a literary period in its own right, England the

Nation surveys the wide range of writings by the generation before Chaucer, and explores how these writers expressed their concepts of England as a nation, and how they exploited the association between nation, people, and language. The study forms a significant contribution to current debates about nationalism.

Medieval Yorkshire Towns - George Sheeran 1998

This beautifully illustrated book takes the reader on a tour through the medieval towns of Yorkshire. The author explores the ways in which architecture and the use of space in the medieval town were the expression of an urban culture which was evolving between the tenth and fourteenth centuries and was given pronounced expression by the fifteenth century. He goes on to show that this was also the expression of authority and conflict and that this process created a separate and markedly urban architectural development which took shape in the medieval period. The reader is introduced to Yorkshire's medieval urban heritage through encounters with the nature of urban society, the symbolic and dominating presence of the church in the medieval townscape, and housing, trade

and public health. In conclusion the author looks at what significance the Yorkshire medieval town holds for us today.

The Mind and Its Place in Nature (Classic Reprint) - C. D. Broad 2017-11-21

Excerpt from The Mind and Its Place in Nature I shall no doubt be blamed by certain scientists, and, I am afraid, by some philosophers, for having taken serious account of the alleged facts which are investigated by Psychological Researchers. I am wholly impenitent about this. The scientists in question seem to me to confuse the Author of Nature with the Editor of Nature; or at any rate to suppose that there can be no productions of the former which would not be accepted for publication by the latter. And I see no reason to believe this. I am only too well aware how inadequate the book is to its rather ambitious title. Many subjects which ought to have been discussed are not touched upon; and those subjects which are discussed are not exhausted, even if the reader be so. But it is the best that I can do at present; and I hope that some parts of it, at any rate, may form starting-points for fruitful controversies among philosophers, psychologists, biologists and psychical researchers.
