Legal Education as a Subversive Activity - Mark Duffy 2022-12-23

In an age when everyone aspires to teach critical thinking skills in the classroom, what does it mean to be a subversive law teacher? Who or what might a subversive law teacher seek to subvert - the authority of the law, the university, their own authority as teachers, perhaps? Are law students ripe for subversion, agents of, or impediments to, subversion? Do they learn to ask critical questions? Responding to the provocation in the classic book *Teaching as a Subversive Activity*, by Postman and Weingartner, the idea that teaching could, or even should, be subversive still holds true today, and its premise is particularly relevant in the context of legal education. We therefore draw on this classic book to discuss, in the present volume, the consideration of research into legal education as lifetime learning, as creating meaning, as transformative and as developing world-changing thinking within the legal context. The volume offers research into classroom experiences and theoretical and historical interrogations of what it means to teach law subversively. Primarily aimed at legal educators and doctoral students in law planning careers as academics, its insights speak directly to tensions in higher education more broadly.

Performance Management in Nonprofit Organizations - Zahirul Hoque 2014-10-10

With increased competition for external funding, technological advancement, and public expectations for transparency, not-for-profit and non-governmental organizations are facing new challenges and pressures. While research has explored the roles of accounting, accountability, and performance management in nonprofit organizations, we still lack evidence on the best practices these organizations implement in the areas of accountability and performance management.

This book collects and presents that evidence for the first time, offering insights to help nonprofits face these new challenges head-on.

Performance Management in Nonprofit Organizations focuses on both conventional and contemporary issues facing nonprofits, presenting evidence-based insights from leading scholars in the field. Chapters examine the design, implementation, and working of accounting, accountability, governance, and performance management measures, providing both retrospective and contemporary views, as well as critical commentaries on accounting and performance related issues in nonprofit organizations. The book's contributors also offer critical commentaries on the changing role of accounting and performance management in this sector. This research-based collection is an interesting and useful read for academics, practitioners, students, and consultants in nonprofit organizations, and is highly accessible to accounting and non-accounting audiences alike.
