Implementing Cisco IP Routing (ROUTE) Foundation Learning Guide - Diane Teare 2015

Implementing Cisco IP Routing (ROUTE) Foundation Learning Guide is a Cisco authorized, self-paced learning tool for CCNP preparation. This book teaches readers how to design, configure, maintain, and scale routed networks that are growing in size and complexity. The book covers all routing principles covered in the CCNP Implementing Cisco IP Routing course. As part of the Cisco Press Self-Study series, Implementing Cisco IP Routing (ROUTE) Foundation Learning Guide provides comprehensive foundation learning for the CCNP ROUTE exam. This revision to the popular Foundation Learning Guide format for Advanced Routing at the Professional level is fully updated to include complete coverage of all routing topics covered in the new Implementing Cisco IP Routing (ROUTE) course. The proposed book is an intermediate-level text, which assumes that readers have been exposed to beginner-level networking concepts contained in the CCNA (ICND1 and ICND2) certification curriculum. No previous exposure to the CCNP level subject matter is required, so the book provides a great deal of detail on the topics covered. Each chapter opens with a list of objectives to help focus the reader's study. Configuration exercises at the end of each chapter and a master lab exercise that ties all the topics together in the last chapter help illuminate theoretical concepts. Key terms will be highlighted and defined throughout. Each chapter will conclude with a summary to help review key concepts, as well as review questions to reinforce the reader's understanding of what was covered.

*IP Routing Protocols All-in-one* - Redouane MEDDANE 2022-10-18

OSPF, IS-IS, EIGRP and BGP routing protocols are the heart of IP routing and the internet itself. This practical guide offers a series of labs to cover the features of each routing protocol and how to optimize it for scalability and performance improvement in term of processing. By going step by step, the scenarios are enriched with concise explanations for each step. Goals and Methods: Focusing on Cisco Routers, the book shows how to implement and optimize OSPF, IS-IS, EIGRP and BGP by exploring: · OSPF: Area Types with optimization, LSA Types, the logic of Intra-area, inter-area and external routes, Virtual-link and route filtering, Loop Prevention mechanisms and MPLS with the concepts of sham link and Down bit. · EIGRP: concept of stub and maximum prefix limit for optimization, route filtering using different methods, route leaking, in-depth exploration of successor and feasible successor, EIGRP Named Mode and redistribution between two autonomous systems. · IS-IS:

concept of Level 1 and Level 2 routes, IS-IS adjacencies and DIS in broadcast network, the logic of intra-area and inter-area routes, route leaking and ATT bit. • BGP: attributes and path selection, exploration of MED, Local Preference, weight, AS-path and community attributes, route filtering and ORF (Outbound Route Filtering), Attribute-map and Unsuppress-map, confederation, peer group and route reflector features. Through all these scenarios covering all the stuff covered above, the book is good resource to cement the theory you learned. It transforms what you have learned in your study guides into valuable skills you will be using from day one on your job as a network engineer. Knowing the theory alone is no longer enough to master routing protocols. Mastering the practice part is very important to be able to configure, troubleshoot routing protocols where you must quickly and accurately diagnose and repair network faults on routers. How to read this book? This book is a series of hands of labs, and there is no relationship between them, you can start at any lab, from the last, the first or the middle, the purpose is to provide you a granularity to freely switch between topics and go to the one you need in depth lecture and understanding. It is very important that you should have a strong skills theory for each routing protocol because the book goes straight forward to lab.
