Pre-Incident Indicators of
Terrorist Incidents - Brent L.
Smith 2011-01

This is a print on demand
edition of a hard to find
publication. Explores whether
sufficient data exists to
examine the temporal and
spatial relationships that
existed in terrorist group
planning, and if so, could
patterns of preparatory

conduct be identified? About
one-half of the terrorists
resided, planned, and prepared
for terrorism relatively close to
their eventual target. The
terrorist groups existed for
1,205 days from the first
planning meeting to the date of
the actual/planned terrorist
incident. The planning process
for specific acts began 2-3
months prior to the terrorist
incident. This study examined
selected terrorist
groups/incidents in the U.S.
from 1980-2002. It provides for
the potential to identify
patterns of conduct that might
lead to intervention prior to the
commission of the actual
terrorist incidents.
