Ancient Pagan Tombs and Christian Cemeteries in the Islands of Malta - A. A. Caruana 1898

The Prince and Letters - Vittorio Alfieri 1972

Alfieri's second treatise, The Prince and Letters, is as timely today as when first published in 1788. Vehemently rejecting Voltaire's contention that the greatest periods of literature and art are all associated with the name of some reigning patron, such as Augustus or Louis XIV, he maintains that only in perfect freedom can supreme poetry be born. His fundamental principles still apply, for the relation between the writer and the state has become increasingly complex. This is the first version in English. The translation keeps close to the original text, but renders it in smooth, clear English. The scholarship is of the highest quality, showing an intimate knowledge of Alfieri's life and of the political trends and culture currents of his age.

Cult in Context - Caroline Malone 2010-04-01

Gods, deities, symbolism, deposition, cosmology and intentionality are all features of the study of early ritual and cult. Archaeology has great difficulties in providing satisfactory interpretation or recognition of these elusive but important parts of ancient society, and methodologies are often poorly equipped to explore the evidence. This collection of papers explores a wide range of prehistoric and early historic archaeological contexts from Britain, Europe and beyond, where monuments, architectural structures, megaliths, art, caves, ritual activity and symbolic remains offer exciting glimpses into ancient belief systems and cult behaviour. Different theoretical and practical approaches are demonstrated, offering both new directions and considered conclusions to the many problems of studying the archaeology of cult and ritual. Central to the volume is an exploration of early Malta and its intriguing Temple Culture, set in a broad perspective by the discussion and theoretical approaches presented in different geographical and chronological contexts.
