For the municipal stormwater management agency, guidance is given for developing a water quality management plan that takes into account receiving water use objectives, local climatology, regulation, financing and cost, and procedures for comparing various types of controls for suitability and cost effectiveness in a particular area. This guidance will also assist owners of large-scale urban development projects in cost-effectively and aesthetically integrating water

*One L* - Scott Turow 2010-08-03

One L, Scott Turow's journal of his first year at law school and a best-seller when it was first published in 1977, has gone on to become a virtual bible for prospective law students. Not only does it introduce with remarkable clarity the ideas and issues that are the stuff of legal education; it brings alive the anxiety and competitiveness--with others and, even more, with oneself--that set the tone in this crucible of character building. Each September, a new crop of students enter Harvard Law School to begin an intense, often grueling, sometimes harrowing year of introduction to the law. Turow's group of One Ls are fresh, bright, ambitious, and more than a little daunting. Even more impressive are the faculty. Will the One Ls survive? Will they excel? Will they make the Law Review, the outward and visible sign of success in this ultra-conservative microcosm? With remarkable insight into both his fellows and himself, Turow leads us through the ups and downs, the small triumphs and tragedies of the year, in an absorbing and thought-provoking narrative that teaches the reader not only about law school and the law but about the human beings who make them what they are. In the new afterword for this edition of One L, the author looks back on law school from the perspective of ten years' work as a lawyer and offers some suggestions for reforming legal education.

**Fukushima** - David Lochbaum 2015-02-10

"A gripping, suspenseful page-turner" (Kirkus Reviews) with a "fast-paced, detailed narrative that moves like a thriller" (International Business Times), Fukushima teams two leading experts from the Union of Concerned Scientists, David Lochbaum and Edwin Lyman, with award-winning journalist Susan Q. Stranahan to give us the first definitive account of the 2011 disaster that led to the worst nuclear catastrophe since Chernobyl. Four years have passed since the day the world watched in horror as an earthquake large enough to shift the Earth's axis by several inches sent a massive tsunami toward the Japanese coast and Fukushima Daiichi nuclear power plant, causing the reactors' safety systems to fail and explosions to reduce concrete and steel buildings to rubble. Even as the consequences of the 2011 disaster continue to exact their terrible price on the people of Japan and on the world, Fukushima addresses the grim questions at the heart of the nuclear debate: could a similar catastrophe happen again, and—most important of all—how can such a crisis be averted?
