This book is an in-depth analysis of three of the most crucial years in twentieth-century Italian history, the years 1943-46. After more than two decades of a Fascist regime and a disastrous war experience during which Italy changed sides, these years saw the laying of the political and cultural foundations for what has since become known as Italy's First Republic. Drawing on texts from the literature, film, journalism, and political debate of the period, Antifascisms offers a thorough survey of the personalities and positions that informed the decisions taken in this crucial phase of modern Italian history.

Every page is exciting. It's a rollicking international adventure thriller that's packed densely with science, superscience, science fiction, pop culture, humor and more twists and turns than I expected. It was ever so much fun to get inside the mind of a very intelligent protagonist who makes no apologies for a high I.Q. And you'll meet great villains you will love to hate!" —Amazon reviewer □□□□ "This is probably the best superhero novel I've read in years and I've read a LOT of graphic novels and comic books. It's non-

stop action almost from page one with a heroine whose snarky sense of humor at her situation kept me on the edge of laughter." —Amazon reviewer [REDACTED] "Delightful, totally delightful is all I can say about J.R. Rain & Kris Carey's newly released novel, THE ACCIDENTAL SUPERHEROINE! This warp-speed super-spy spoof is based on the premiss an "accident" in a giant Swiss underground cyclotron that causes three physicists to be transformed. Their change pulls the reader along into an international crisis fuel by incredible feats of human metamorphosis. Can a super-villain be stopped? Can a lone female physicist prevail? Will her fellow physicist and crush be rescued? This is a story well worth reading." —Amazon reviewer [REDACTED] "J. R. Rain and Kris Carey have channeled Mira's voice into a hilarious blend of nerd, geek, and lovelorn scientist. I'd give it all five stars, and urge them to hurry up with the sequel." —Amazon reviewer [REDACTED] "This book was written by J.R. Rain and Kris Carey whom both did a great job with characterization and excellent storyline. This was a fast-paced book that kept me so interested, I could not put the book down." —Amazon reviewer

African Rifles and Cartridges - John Taylor 2014-07-07
2014 Reprint of 1948 Edition. Full facsimile of the original edition, not reproduced with Optical Recognition Software. John Howard 'Pondoro' Taylor (1904 - 1969) was a big-game hunter of Irish descent. In Africa he experimented extensively using different types of rifles and calibers, which made him an expert in big game rifles. He is credited with

developing the 'Taylor KO Factor' and wrote several now classic books. As a professional ivory hunter with some thirty years of continuous living in the African bush, John Taylor used and tested all the various calibers of British, American and German rifles, and with them killed many species of big game found on the continent of Africa. Taylor's discussion on the practical application of ballistics includes doubles, magazines, and single-shots; the practical value of steel-jacketed bullets versus those covered with cupronickel; the faults of copper-tubed bullets; the actual effects of softpoint bullets with varying degrees of lead exposure; the necessity of modern bullets that will really stand up to the requirements when fired into heavy animals; and many other valuable tips and explanations about cartridges and rifles. Remains a classic work.

Handbook for Shooters and Reloaders - Parker O. Ackley 2021-10-07
Illustrated Edition of 1959 in Facsimile. This is the first edition of one of the classic descriptions of wildcat cartridges, first published in 1949. Though revised and updated in 1962, this is Ackley's first effort at tackling the loading data, theory, and practice of wildcat cartridges. A wildcat cartridge, often shortened to wildcat, is a custom cartridge for which ammunition and/or firearms are not mass-produced. These cartridges are often created in order to optimize a certain performance characteristic (such as the power, size, or efficiency) of an existing commercial cartridge. Developing and using wildcat cartridges does not generally serve a purpose in military or law enforcement; it is more a hobby for serious shooting, hunting, gunsmithing and handloading enthusiasts, particularly in the United States.

Buyology - Martin Lindstrom 2010-02-02

NEW YORK TIMES BESTSELLER • “A fascinating look at how consumers perceive logos, ads, commercials, brands, and products.”—Time How much do we know about why we buy? What truly influences our decisions in today’s message-cluttered world? In *Buyology*, Martin Lindstrom presents the astonishing findings from his groundbreaking three-year, seven-million-dollar neuromarketing study—a cutting-edge experiment that peered inside the brains of 2,000 volunteers from all around the world as they encountered various ads, logos, commercials, brands, and products. His startling results shatter much of what we have long believed about what captures our interest—and drives us to buy. Among the questions he explores: • Does sex actually sell? • Does subliminal advertising still surround us? • Can “cool” brands trigger our mating instincts? • Can our other senses—smell, touch, and sound—be aroused when we see a product? *Buyology* is a fascinating and shocking journey into the mind of today’s consumer that will captivate anyone who’s been seduced—or turned off—by marketers’ relentless attempts to win our loyalty, our money, and our minds.
