Against Their Will - P. M. Poli?an 2004-01-01  
"During his reign, Joseph Stalin oversaw the forced resettlement of people by the millions - a maniacal passion that he used for social engineering. Six million people were resettled before Stalin's death. This volume is the first attempt to comprehensively examine the history of forced and semi-voluntary population movements within or organized by the Soviet Union. Contents range from the early 1920s to the rehabilitation of repressed nationalities in the 1990s, dealing with internal (kulaks, ethnic and political deportations) and international forced migrations (German internees and occupied territories)."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. *The Synchronized Production System* - Hitoshi Takeda 2006  
A broad production paradigm which incorporates an array of manufacturing principles, such as Just-in-Time (JIT) inventory systems, teamwork, multi-tasking, employee involvement schemes and policies for ensuring product quality throughout the production process. Now in its first English edition, ""The Synchronic Production System"" focuses on he Japanese concept of ""kaizen,"" or ""continuous improvement,"" to demonstrate how smaller, easily adopted improvements can increase performance and reduce production costs. Hitoshi Takeda covers the six elements of Kaizen, flow processes, production, leveled schedules, minimizing inventory, reducing lot

sizes, reducing lead times, quality and quantity management, standards, controls, maintenance and the ""kanban"" production control system. A number of Japanese expressions are introduced throughout this book; most are explained as they arise and a short glossary is included for reference purposes.

Anthropology - Carol R. Ember 2006-04  
[In this book, the authors] are interested not only in what humans are and were like; [but they are] also interested in why they got to be that way, in all their variety. When there are alternative explanations, [the authors] try to communicate the necessity to evaluate them logically as well as on the basis of the available evidence. Throughout the book, [they] try to communicate that no idea, including ideas put forward in textbooks, should be accepted even tentatively without supporting tests that could have gone the other way. -Pref.

The Romance of Individualism in Emerson and Nietzsche - David Mikics 2003

"The Romance of Individualism in Emerson and Nietzsche examines the argument, as well as the affinity, between these two philosophers. Nietzsche was an enthusiastic reader of Emerson and inherited from him an interest in provocation as a means of instruction, an understanding of the permanent importance of moods and transitory moments in our lives, and

Totalitarianism and Literary Discourse - Irma Ratiani 2011-10-18

The collection Totalitarianism and Literary Discourse represents selected proceedings from the conference, Totalitarianism and Literary Discourse: 20th Century Experience, held in Tbilisi, Georgia, in October 2009. The Tbilisi

conference pioneered scholarly inquiry into post-Soviet space, which evaluated political and cultural realia, emphasizing the challenges facing literature and culture in totalitarian strangleholds, various kinds of ideological diktat, their possible forms and consequences. The Soviet type of totalitarianism was especially accentuated. Decades after the collapse of the Soviet Union, full comprehension of the process of Sovietization has become possible, and in the field of literary studies scholars have worked on a number of issues: assessing conceptual and motivational models of Soviet-period texts; demonstrating the reaction of literary discourse to intellectual terror and systematizing alternative models offered by anti-Soviet discourse; exhibiting the myths and stereotypes of the totalitarian epoch; and classifying literary genres. The collection Soviet Totalitarianism and Literary Discourse has gathered papers by scholars from almost all of the post-Soviet states, as well as of some other countries. It is a first attempt to solve the above-mentioned issues and offers a wide array of questions.

Etymologisches Wörterbuch der Kartwel-Sprachen - Heinz Fähnrich 1995

The dictionary offers a complete compilation and a historical-comparative reflection of the hereditary lexis of the Kartvelian (South Caucasian) language family. It represents the latest stage of etymological research, contains a wealth of new lexical entries, corrections of earlier attempts and new reconstructions. The introduction provides a survey of general data of the four Kartvelian languages (Georgian, Mingrelian, Laz, Svan), characterizes the historical-comparative research in short and provides a detailed description of the system of regular phoneme correspondences. The main chapter presents the Kartvelian lexis in separate entries. The reconstructed forms of the root- and affix morphemes are listed in alphabetical order.

**Malraux** - Olivier Todd 2007-12-18

Writer, publisher, war hero, French government minister, André Malraux was renowned as a Renaissance man of the twentieth century. Now, Olivier Todd—author of the acclaimed biography Albert Camus—gives us this life, in which fact

competes dramatically with his subject's previously little-known mythomania. We see the adventurous young Malraux move from 1920s literary Paris to colonial Cambodia, Cochin China, and Spain in its civil war. Todd charts the thrilling exploits that would inspire such novels as *Man's Fate*, but, just as fascinating, he also traces Malraux's lifelong pattern of lies: claiming friendship with Mao, he was called to tutor Nixon, despite having met the Great Helmsman only once; a minor injury becomes in recollections a near-mortal battlefield wound; stories of heroism in the French Resistance omit to mention that Malraux joined up just a few weeks before the Allied landings. With meticulous research, Todd separates myth from reality to throw light on a brilliant con man who would become a national hero, but he also lets us see Malraux's genuine achievements as both writer and man of action. His real life and the one he embroidered come together in this superb biography to reveal how Malraux, the protean genius, became his own greatest character.

**Human Diversity in Education** - Kenneth Cushner 2006

This research-based, comprehensive introduction to multicultural education and diversity prepares future teachers for the wide diversity of students they will meet in their classrooms, schools, and communities. Moving beyond the purely cultural approach of many comparable texts, *Human Diversity in Education* addresses the full range of human diversity found in today's schools—including nationality, ethnicity, race, religion, gender, class, language, sexual orientation, and ability levels. Based on the assumption that change begins with the individual teacher, the text argues that prospective teachers must learn to incorporate issues of diversity in all of their work—including in their interactions with children, parents, colleagues, and the community.

**Shorter Oxford Textbook of Psychiatry** - Philip Cowen 2012-08-09

Widely recognised as the standard text for trainee psychiatrists, the *Shorter Oxford Textbook of Psychiatry* stands head and shoulders above the competition. The text has been honed over five editions and displays a fluency, authority and insight which is not only

rarely found but makes the process of assimilating information as smooth and enjoyable as possible. The book provides an introduction to all the clinical topics required by the trainee psychiatrist, including all the sub-specialties and major psychiatric conditions. Throughout, the authors emphasize the basic clinical skills required for the full assessment and understanding of the patient. Discussion of treatment includes not only scientific evidence, but also practical problems in the management of patients their family and social context. The text emphasizes an evidence-based approach to practice and gives full attention to ethical and legal issues. Introductory chapters focus on recognition of signs and symptoms, classification and diagnosis, psychiatric assessment, and aetiology. Further chapters deal with all the the major psychiatric syndromes as well as providing detailed coverage of pharmacological and psychological treatments. The book gives equal prominence to ICD and DSM classification - often with direct comparisons - giving the book a universal appeal. The Shorter Oxford Textbook of Psychiatry remains the most up-to-date secondary level textbook of psychiatry available, with the new edition boasting a new modern design and greater use of summary boxes, tables, and lists than ever before. The extensive bibliography has been brought up-to-date and there are targeted reading lists for each chapter. The Shorter Oxford Textbook of Psychiatry fulfils all the study and revision needs of psychiatric trainees, but will also prove useful to medical students, GPs, qualified psychiatrists, and those in related fields who need to be kept informed with current psychiatric practice.

**Space and Time in Language** - Mario Brdar 2011

All human activity takes place in space and time in one way or another, which is consequently reflected in our language. We not only talk about space and time but also cannot but ground our linguistic activity in space and time.

Furthermore, space and time are closely, although asymmetrically, related in our experience and we often think and talk about one in terms of the other. Specifically, time is conceived in terms of space far more frequently than vice versa. The volume contains a selection of essays that are revised versions of papers presented at the 23rd annual conference of the Croatian Applied Linguistics Society (CALs), entitled *-Space and Time in Language: Language in Space and Time-*, which took place from 21 to 23 May 2009 in Osijek (Croatia)."

*Teach English* - Adrian Doff 1996

**Valley of the Sorcerers** - Kamal Abdulla 2014

Kamal Abdulla is a well-known Azerbaijani writer and scholar. He has written works on linguistics, culturology and mythology, and is the author of poetry, essays, plays, stories, and novels. His prose has been published and translated into French, Turkish, Russian, English, Portuguese, German, Polish, Bulgarian, Georgian, Arabic, Lithuanian, Japanese, and other languages. His plays have been performed in Azerbaijan, Georgia, and Estonia. His work is not without its detractors. Many articles and books have been written about his work, some positive, some negative. He has won literary awards in his own country, and been subject to unfair criticism. In the early years of Azerbaijan's independence, liking his novels was considered a sign of good literary taste. In later years, not liking these works is considered a sign of good literary taste. Original language, world view, philosophical foundation, and mythological sense characterize his work. His writing features mountains invisible to the eye, and valleys of sorcerers where it is forever spring. Here ancient manuscripts come to life and history is re-read in a completely different way. Centaurs roam his favourite city, Baku, while in ancient Egypt, people turn into flowers, and flowers into people. The idolized heroes of his mythological texts are fleshed out as ordinary, everyday people. Sometimes dead people emerge from their images, restore justice, and then return to their images. Not satisfied with living in their own worlds, characters lead very different lives in parallel worlds. The story of Theseus and the Minotaur enters our own time, and finally the phantasmagoria reaches such a point that Paris

gives the apple to Hera, not Aphrodite...

Young People, Creativity and New Technologies

- Dr Julian Sefton-Green 2002-02-07

What is the creative potential of the new technologies? How can computers create new possibilities for artistic and creative work in education? Young People, Creativity and New Technologies describes ways in which ICTs (Information Communication Technologies) can produce new possibilities for creative work both within the formal curriculum and in complementary educational arenas. It provides a series of case studies which show how 'digital arts' are currently being used across school and community arts curricula and demonstrates how ICTs can be used in a genuinely inter-disciplinary way. It is aimed at those who are interested in practical ways to develop the creative uses of new technologies at school and in community arts settings.

**On Criminalization** - J. Schonsheck 2013-06-29

I begin by introducing the main issues of the work, and inviting their consideration; as enticement, I offer a sketch of their practical importance, and of the philosophical challenge they present. And I provide a preview of the work's organization and central argument. There is something so obvious that it is easily-and often-overlooked: the enforcing of criminal statutes is the most intrusive and coercive exercise of domestic power by a state. Forcibly preventing people from doing that which they wish to do, forcibly compelling people to do that which they do not wish to do-and wielding force merely attempting to compel or prevent-these state activities have extraordinarily serious ramifications. Indeed, no state institutions are likely to have more profound an impact on the lives of individual citizens than those of the criminal justice system. I endorse Herbert Packer's assessment: The criminal sanction is the law's ultimate threat. Being punished for a crime is different from being regulated in the public interest, or being forced to compensate another who has been injured by one's conduct, or being treated for a disease. The sanction is at once uniquely coercive and, in the broadest sense, uniquely expensive. As a consequence, these state activities are in special need of moral warrant. Given the great potential for doing grave injustice, the power of the state embodied

in the criminal justice system ought not be exercised in the absence of a complete and compelling moral justification.
