The 'Made in Germany' Champion Brands - Ugesh A. Joseph 2016-03-09

Germany's economic miracle is a widely-known phenomenon, and the world-leading, innovative products and services associated with German companies are something that others seek to imitate. In The 'Made in Germany' Champion Brands, Ugesh A. Joseph provides an extensively researched, insightful look at over 200 of Germany's best brands to see what they stand for, what has made them what they are today, and what might be transferable. The way Germany is branded as a nation carries across into the branding of its companies and services, particularly the global superstar brands - truly world-class in size, performance and reputation. Just as important are the medium-sized and small enterprises, known as the 'Mittelstand'. These innovative and successful enterprises from a wide range of industries and product / service categories are amongst the World market leaders in their own niche and play a huge part in making Germany what it is today. The book also focuses on German industrial entrepreneurship and a selection of innovative and emergent stars. All these companies are supported and encouraged by a sophisticated infrastructure of facilitators, influencers and enhancers - the research, industry, trade and standards organizations, the fairs and exhibitions and all the social and cultural factors that influence, enhance and add positive value to the country's image. Professionals or academics interested in business; entrepreneurship; branding and marketing; product or service development; international trade and business development policy, will find fascinating insights in this book; while those with an interest in Germany from emerging industrial economies will learn something of the secrets of German success.

Fundamentals of Tractor Design - Karl Theodor Renius 2019-10-28

This textbook offers a comprehensive review of tractor design fundamentals. Discussing more than hundred problems and including about six hundred international references, it offers a unique resource to advanced undergraduate and graduate students, researchers and also practical engineers, managers, test engineers, consultants and even old-timer fans. Tractors are the most important pieces of agricultural mechanization, hence a key factor of feeding the world. In order to address the educational needs of both less and more developed countries, the author included fundamentals of simple but proved designs for tractors with moderate technical levels, along with extensive information concerning modern, premium tractors. The broad technical content has been structured according to five technology levels, addressing all components. Relevant ISO standards are considered in all chapters. The book covers historical highlights, tractor project management (including cost management), traction mechanics, tires (including inflation control), belt ground drives, and ride dynamics. Further topics are: chassis design, diesel engines (with emission limits and installation instructions), all important types of transmissions, topics in machine element design, and human factors (health, safety, comfort). Moreover, the content covers tractor-implement management systems, in particular ISOBUS automation and hydraulic systems. Cumulative damage fundamentals and tractor load spectra are described and implemented for dimensioning and design verification. Fundamentals of energy efficiency are discussed for single tractor components and solutions to reduce the tractor CO2 footprint are suggested.

Advances in Ergonomics in Design - Francisco Rebelo 2020-07-01

This book provides readers with a timely snapshot of ergonomics research and methods applied to the

design, development and prototyping—as well as the evaluation, training and manufacturing—of products, systems and services. Combining theoretical contributions, case studies and reports on technical interventions, it covers a wide range of topics in ergonomic design including ecological design; cultural and ethical aspects in design; interface design, user involvement and human-computer interaction in design; as well as design for accessibility and many others. The book particularly focuses on new technologies such as virtual reality, state-of-the-art methodologies in information design, and human-computer interfaces. Based on the AHFE 2020 Virtual Conference on Ergonomics in Design, held on July 10-16, 2020, the book offers a timely guide for both researchers and design practitioners, including industrial designers, human-computer interaction and user experience researchers, production engineers and applied psychologists.

Pathway of digital transformation in logistics - Junge, Anna Lisa 2019-12-17

The research study "Pathway of Digital Transformation in Logistics" deals with today's logistics challenges, which are increasing speed and the integration of real-time information for data-driven services, implementing new organizational and leadership structures as well as the need for finding approaches for cooperation with new actors such as start-ups or tech companies. Therefore, the study examines four thematic building blocks central to current developments in logistics: technologies, including platforms, and data-driven services as tools and leadership and organization, as well as open innovation as enablers. The research approach is twofold. First, we investigate the four topics by means of an online questionnaire answered by 120 international participants. Second, a Delphi workshop with 32 logistics experts from industry and LSP reveals further evaluations of success factors and barriers for future developments in logistics. The study describes findings how companies move forward on the path of digital transformation towards smart logistics by presenting and discussing best practice concepts and future developments in logistics. Die Forschungsstudie "Pathway of Digital Transformation in Logistics" beschäftigt sich mit aktuellen Herausforderungen in der Logistik: zunehmende Geschwindigkeit und die Integration von Echtzeitdaten für datengetriebene Services, Implementierung neuer Organisations- und Führungsstrukturen sowie die Notwendigkeit, Ansätze für die Zusammenarbeit mit neuen Akteuren wie Start-ups oder Technologieunternehmen zu finden. Daher untersucht die Studie vier thematische Bausteine, die für aktuelle Entwicklungen in der Logistik zentral sind: Technologien, einschließlich Plattformen, und datengesteuerte Services als Werkzeuge und Führung und Organisation sowie Open Innovation als Enabler. Der Forschungsansatz ist zweigeteilt. Zunächst untersuchen wir die vier Themen anhand eines Online-Fragebogens, der von 120 internationalen Teilnehmenden beantwortet wurde. Zweitens ergibt ein Delphi-Workshop mit 32 Logistikexpert/innen aus Industrie und Logistikdienstleistung weitere Erkenntnisse über Barrieren und Erfolgsfaktoren für zukünftige Entwicklungen in der Logistik. Die Studie präsentiert Ergebnisse, wie Unternehmen auf dem Weg der digitalen Transformation zur intelligenten Logistik voranschreiten, indem sie Best-Practice-Konzepte und zukünftige Entwicklungen in der Logistik vorstellt und diskutiert.

Sensors for IOT Applications - E Control Devices 2021-12-21

In this book, we have discussed IoT technology and how it has changed the entire technological advancements in the future as well. The Internet of Things means billions of devices and gadgets throughout the world that is interconnected with the internet, all collecting and distributing information. Because of the appearance of small and modest CPUs and the universality of wireless networks, it's

possible to turn anything, from something as little as a pill to something as big as a fighter plane or submarine, into a piece of the IoT. The IoT is making the essence of our everyday surroundings more intelligent and more responsive, interconnecting the automated and physical worlds. Any actual item can be changed into an IoT gadget if it tends to be associated with the web to be controlled or convey data. As even more up-to-date advancements and availability procedures hit the market, IoT development will keep on developing, assisting the change of detached items into brilliant associated gadgets. This pattern will affect enterprises, all things considered, just as our own lives. Be that as it may, similarly to any other innovation, IoT issues do exist. Concerns incorporate acknowledgment, cost, network, security, and that's just the beginning. As numerous new players enter the field, guidelines are being set. In any case, even with these difficulties, the ultimate objectives of IoT have a lot of guarantees.

Fundamentals of Financial Accounting - Fred Phillips 2021

"Fundamentals of Financial Accounting responds by using carefully chosen focus companies that students recognize and engage with in their everyday lives. From tech start-ups to some of the world's most familiar trademark brands, each chapter opens with an engaging scenario or story using a familiar company. The same focus company, such as Walmart, Cedar Fair, American Eagle, National Beverage, Under Armour, or General Mills, is used throughout the entire chapter so that students can see how the concepts and calculations apply to a real-world company they are already familiar with"--

Intensive and Critical Care Medicine - José Besso 2009-11-21

The World Federation of Societies of Intensive and Critical Care Medicine (WFSIC- CM) has reached the age of maturity. Physicians, nurses, and many others associated with the field of Intensive and Critical Care Medicine will be coming from all corners of the world to Florence, Italy in August, 2009 to celebrate the 10th quadrennial congress. Every 4 years for the last 36 years, congresses in the magnificent venues of London (1973), Paris (1977), Washington (1981), Jerusalem (1985), Kyoto (1989), Madrid (1993), Ottawa (1997), Sydney (2001), and Buenos Aires (2005) have signified an ever-developing process which has resulted in the four pillars of the field of Intensive and Critical Care Medicine, namely partnership, ethics, professionalism, and competence. The first pillar is based on a stronger interdisciplinary collaboration and a multi-professional partnership in the field of Intensive and Critical Care Medicine. In recent decades, professional activity in medicine has been regulated by well-defined, universal principles, such as the welfare of the patient, autonomy, social justice, and the patient-physician relationship. The second pillar, ethics, has offered welcomed assistance to all these principles in establishing an ethics curriculum.

Extreme Economies - Richard Davies 2020-07-20

To predict our future, we must look to the extremes. So argues the economist Richard Davies, who takes readers to the margins of the modern economy and beyond. These extreme economies illustrate the forces that test human resilience, drive societies to failure, and promise to shape our collective future. Reviving a foundational idea from the medical sciences, Extreme Economies turns the logic of modern economics on its head by arguing that these outlier societies can teach us more about our own than we might imagine. By adapting to circumstances unimaginable to most of us, the people in these societies are pioneering the economic infrastructure of the future.

International Classification of Financial Reporting - Christopher Nobes 2014

Financial reporting practices differ widely between countries and this has far-reaching implications for multinational businesses. Over more than a century, there have been attempts to classify countries into groups by similarities of practices. With the recent spread of International Financial Reporting Standards, it might appear that classification is largely of historical interest, but this is not the case, for several reasons explained in this book. Christopher Nobes offers a critical analysis of the many previous accounting classifications, having drawn lessons from other fields of science and social science. Revised and updated to reflect the IFRS era, the book discusses how old classifications are reflected in today's international differences in practice under IFRS. It concludes with a discussion on the most useful classifications, and how classifications can still be relevant in the era of international standards. This book will be essential for academics, postgraduates and undergraduates in international accounting, accounting theory and to international accounting professionals.

The Loser - Thomas Bernhard 2010-11-10

Thomas Bernhard was one of the most original writers of the twentieth century. His formal innovation ranks with Beckett and Kafka, his outrageously cantankerous voice recalls Dostoevsky, but his gift for lacerating, lyrical, provocative prose is incomparably his own. One of Bernhard's most acclaimed novels, *The Loser* centers on a fictional relationship between piano virtuoso Glenn Gould and two of his fellow students who feel compelled to renounce their musical ambitions in the face of Gould's incomparable genius. One commits suicide, while the other-- the obsessive, witty, and self-mocking narrator-- has retreated into obscurity. Written as a monologue in one remarkable unbroken paragraph, *The Loser* is a brilliant meditation on success, failure, genius, and fame.

Quaker Writings - Thomas D. Hamm 2011-01-25

An illuminating collection of work by members of the Religious Society of Friends. Covering nearly three centuries of religious development, this comprehensive anthology brings together writings from prominent Friends that illustrate the development of Quakerism, show the nature of Quaker spiritual life, discuss Quaker contributions to European and American civilization, and introduce the diverse community of Friends, some of whom are little remembered even among Quakers today. It gives a balanced overview of Quaker history, spanning the globe from its origins to missionary work, and explores daily life, beliefs, perspectives, movements within the community, and activism throughout the world. It is an exceptional contribution to contemporary understanding of religious thought.
