Huawei - Tian Tao 2016-10-11

The inspirational business story of Huawei: how to grow from start up to world leader in two decades... With over 170,000 employees in more than 170 countries and regions, serving more than one-third of the world's population, how does entrepreneur Ren Zhengfei manage a telcoms giant called Huawei? What is the secret to Huawei's global success? In 1987, a 44-year-old man founded a telecom equipment-trading firm in Shenzhen, China, with start-up capital of \$5,000. In 29 years, it grew to become the largest telecoms company in the world. This book goes behind the scenes to explore the story of what Ren Zhengfei did

differently, how the company he started reached the top spot, and why Huawei is known as a "collective" and not a private company: Learn how this Chinese start up business became an international success Understand the business strategy, leadership skills and management philosophy of Huawei's entrepreneurial founder Get tips, inspiration and motivation for your own business start-up. 14 years of meticulous research and 136 senior management and employee interviews reveal how Huawei's international business success lies in its ability to transform the intellectual elite into a band of soldiers with the same set of values and resolve, while at the same time preventing a culture of subservience. This fascinating story provides a unique glimpse into the machinations of one of the world's most powerful companies. "The company serves as an example for many Chinese entrepreneurs striving to go global, and also presents valuable lessons for Western companies striving to integrate Eastern and Western values and ways of looking at business." - Co-author David De Cremer, KPMG Professor of Management Studies at Cambridge Judge Business School

Indonesia's Secret War - Robin Osborne 1985

This book describes the historical development of the Irian Jaya guerrilla struggle for independence from Indonesia. The OPM, Organisasi Papua Merdeka, has been fighting Indonesian rule in West New Guinea since 1969; the military presence there was established in 1962. The author believes that the great majority of West Papuans support the OPM. The Indonesian Transmigration programme has forcible alienated clan land and sponsored settlers from Java. As a result of this policy 10,000 Papuans fled Irian Jaya in mid-1984 to seek safety in Papua New Guinea. The exodus was more than 1 per cent of the indigenous population. The OPM has almost no foreign allies. Both Papua New Guinea and Australia emphasize that Irian Jaya is part of Indonesia and thus an internal matter. The author predicts that greater autonomy for Irian Jaya would be more likely to result from political pressure on Jakarta than from a military victory by OPM.

How to Lead Others - John Adair 2018-09-20

In any job, there will come a time when you are asked to lead other people. But while people are often well trained in the skill set of their particular profession, few people are ever taught how to lead. As such, those first steps into leadership can seem daunting - what do you actually do? How do you really lead? How do you build an effective team? And how do you lead colleagues who used to be your peers? How to Lead Others aims to convey the basics of leadership in a way that is concise, relevant and practical by breaking down leadership into eight simple lessons: · Defining the task; · Effective planning; · Briefing; · Controlling; · Motivating; · Organizing; · Evaluating; and · Leading by example. Aimed at those who, regardless of industry or business sector, are about to take their first steps on the leadership path, or who are at an early stage in their career and realise that leadership responsibilities lie ahead of them, How to Lead Others is the essential handbook to one of the most important and challenging aspects of professional life.

Probability and Random Processes for Electrical and Computer Engineers - John A. Gubner 2006-06-01

The theory of probability is a powerful tool that helps electrical and computer engineers to explain, model, analyze, and design the technology they develop. The text begins at the advanced undergraduate level, assuming only a modest knowledge of probability, and progresses through more complex topics mastered at graduate level. The first five chapters cover the basics of probability and both discrete and continuous random variables. The later chapters have a more specialized coverage, including random vectors, Gaussian random vectors, random processes, Markov Chains, and convergence. Describing tools and results that are used extensively in the field, this is more than a textbook; it is also a reference for researchers working in communications, signal processing, and computer network traffic analysis. With over 300 worked examples, some 800 homework problems, and sections for exam preparation, this is an essential companion for advanced undergraduate and graduate students. Further resources for this title, including solutions (for Instructors only), are available online at www.cambridge.org/9780521864701.

Exploring Christian Heritage - C. Douglas Weaver 2017

Exploring Christian Heritage provides students and teachers with a rich and substantial introduction to the texts that have shaped the Christian faith. Including works by Augustine, Aquinas, Martin Luther, John Wesley, John Calvin, and Karl Barth, among others, this collection also highlights essential movements--from the second to the twenty-first centuries--often glossed over in primary source readers. From Pentecostalism and Baptists to feminism and religious liberty movements, Exploring Christian Heritage succinctly joins together the most influential voices of Christian history and theology with those that have been forgotten and sometimes ignored. Now in its second edition, voices ancient and modern have been added to deepen and widen the story of Christianity in varied forms. Exploring Christian Heritage, second edition also contains additional classroom resources, including new textual introductions and over ninety new quizzes.

The Biogas Handbook - Arthur Wellinger 2013-02-19

With pressure increasing to utilise wastes and residues effectively and sustainably, the production of biogas represents one of the most important routes towards reaching national and international renewable energy targets. The biogas handbook: Science, production and applications provides a comprehensive and systematic guide to the development and deployment of biogas supply chains and technology. Following a concise overview of biogas as an energy option, part one explores biomass resources and fundamental science and engineering of biogas production, including feedstock characterisation, storage and pre-treatment, and yield optimisation. Plant design, engineering, process optimisation and digestate utilisation are the focus of part two. Topics considered include the engineering and process control of biogas plants, methane emissions in biogas production, and biogas digestate quality, utilisation and land application. Finally, part three discusses international experience and best practice in biogas utilisation. Biogas cleaning and upgrading to biomethane, biomethane use as transport fuel and the generation of heat and power from biogas for stationary applications are all discussed. The book concludes with a review of market development and biomethane certification schemes. With its distinguished editors and international team of expert contributors, The biogas handbook: Science, production and applications is a practical reference to biogas technology for process engineers, manufacturers, industrial chemists and biochemists, scientists, researchers and academics working in this field. Provides a concise overview of biogas as an energy option Explores biomass resources for production Examines plant design and engineering and process optimisation

Constructing Papuan Nationalism - Richard Chauvel 2005

Papuan nationalism is young, evolving, and flexible. It has adapted to and reflected the political circumstances in which it has emerged. Its evolution as a political force is one of the crucial factors in any analysis of political and cultural change in Papua, and the development of relations between the Indonesian government and Papuan society. This study examines the development of Papuan nationalism from the Pacific War through the movement's revival after the fall of President Suharto in 1998. The author argues that the first step in understanding Papuan nationalism is understanding Papuan history and historical consciousness. The history that so preoccupies Papuan nationalists is the history of the decolonization of the Netherlands Indies, the struggle between Indonesia and the Netherlands over the sovereignty of Papua, and Papua's subsequent integration into Indonesia. Papuan nationalism is also about ethnicity. Many Papuan nationalists make strong distinctions between Papuans and other peoples, especially Indonesians. However, Papuan society itself is a mosaic of over three hundred small, local, and often isolated ethno-linguistic groups. Yet over the years a pan-Papuan identity has been forged from this mosaic of tribal groups. This study explores the nationalists' argument about history and the sources of their sense of common ethnicity. It also explores the possibility that the Special Autonomy Law of 2001, if implemented fully, might provide a framework in which Papuan national aspirations might be realized. This is the fourteenth publication in Policy Studies, a peer-reviewed East-West Center Washington series that presents scholarly analysis of key contemporary domestic and international political, economic, and strategic issues

affecting Asia in a policy relevant manner.

New to the 2011 edition are articles including first-time Article 399 on Outdoor, Overhead Conductors with over 600 volts, first-time Article 694 on Small Wind Electric Systems, first-time Article 840 on Premises Powered Broadband Communications Systems, and more. This spiralbound version allows users to open the code to a certain page and easily keep the book open while referencing that page. The National Electrical Code is adopted in all 50 states, and is an essential reference for those in or entering careers in electrical design, installation, inspection, and safety.

Bonding Before Birth - Miriam Stoppard 2008-04-21

Bonding Before Birth combines up-to-the-minute research with enlightened and compassionate wisdom. This book explores what science knows about babies in the womb and explains why mother-baby bonding is so vital for the future well-being of mother, father, and baby. Dr. Miriam Stoppard writes about the feelings that expectant parents experience during the first, second and third trimesters and promotes the significance of rites of passage through pregnancy, from adjusting to the changes that parenthood brings to celebrating your future as a family. The emotional and psychological elements of pregnancy are often overlooked in favor of hard facts and scientific evidence. This book redresses the balance and turns its attention to the conflicting feelings of exhilaration and anxiety, dreams and fears that so often characterize the nine months of pregnancy and gives parents-to-be inspiring guidance through these uncharted waters.

Food Security, Farming, and Climate Change to 2050 - Gerald C. Nelson, Mark W. Rosegrant, Amanda Palazzo, Ian Gray, Christina Ingersoll, Richard Robertson, Simla Tokgoz, Tingju Zhu, Timothy B. Sulser, Claudia Ringler, Siwa Msangi, and Liangzhi You 2010-01-01

As the global population grows and incomes in poor countries rise, so too, will the demand for food, placing additional pressure on sustainable food production. Climate change adds a further challenge, as changes in temperature and precipitation threaten agricultural productivity and the capacity to feed the world's population. This study assesses how serious the danger to food security might be and suggests some steps policymakers can take to remedy the situation. Using various modeling techniques, the authors project 15 different future scenarios for food security through 2050. Each scenario involves an alternative combination of potential population and income growth and climate change. The authors also examine the specific test case of a hypothetical extended drought in South Asia, to demonstrate the possible effects of increased climate variability on a particular world region. They conclude that the negative effects of climate change on food security can be counteracted by broad-based economic growth particularly improved agricultural

productivity and robust international trade in agricultural products to offset regional shortages. In pursuit of these goals, policymakers should increase public investment in land, water, and nutrient use and maintain relatively free international trade. This inquiry into the future of food security should be of use to policymakers and others concerned with the impact of climate change on international development.

I Moved Your Cheese - Deepak Malhotra 2013-09-02

The author of *Negotiating the Impossible* "tackles our assumptions about business and life with humor, zest, and wisdom in this delightful fable" (Daniel H. Pink, New York Times best-selling author). If you were a mouse trapped in a maze and someone kept moving the cheese, what would you do? In a world where most mice dutifully accept their circumstances, ask no questions, and keep chasing the cheese, Deepak Malhotra tells an inspiring story about three unique and adventurous mice—Max, Big, and Zed—who refuse to accept their reality as given. *I Moved Your Cheese* reveals what is possible when we finally discard long-held and widely accepted assumptions about how we should live our lives. After all, achieving extraordinary success, personal or professional, has always depended on the ability to challenge assumptions, reshape the environment, and play by a different set of rules—our own. But rejecting deeply ingrained beliefs is not easy. As Zed explains, "You see, Max, the problem is not that the mouse is in the maze, but that the maze is in the mouse." "Deepak Malhotra allows you to glimpse a world of your own making without the limits and barriers that others create." —Stephen R. Covey, New York Times best-selling author of *The 7 Habits of Highly Effective People* "A magnificent story with a powerful message. As someone who has encouraged scores of professionals into breaking through the maze and defining their own pursuits, I find this to be a gem of a book." —Vinod Khosla, cofounder, former CEO and Chairman, Sun Microsystems, and founder, Khosla Ventures "This book's message is both profound and durable. Malhotra has left the maze, and so can we." —Foreword Reviews

Anthology of Classical Myth - Stephen M. Trzaskoma 2016-09-06
