Social Work Practice with Fathers - Jennifer L. Bellamy 2022-12-02

Social workers need to work with fathers across many service systems, but lack guidance on how to do so, and most engagement, assessment, and intervention work for family-serving systems is mother- and child-focused. Father-inclusive readings and resources are also limited.

Drawing on the expertise of well-regarded research and practice experts in the field, this comprehensive book provides guidance to social work practitioners and researchers on how to engage, assess, and serve fathers. Instructors can use the text to include fathers in courses on the human behavior and social environment, family systems, clinical practice, diversity, or service systems. Social service systems, unfortunately, have often struggled to positively engage men as parents. Recent demographic trends indicate that fathers are providing more direct care to children and single-father households are one of the most rapidly growing demographic groups in the United States. Barriers to their successful engagement include biases and assumptions about men and fathers, a lack of father-friendly policies and practices in the field, limited training on how to work with fathers, and relatively limited father-inclusive social work research until recently. This book addresses these barriers. It is a guide to social

workers in their efforts to better serve men as parents, and does so from an ecological and systems perspective. Multiple case examples and practical tools are provided, as well as specific content on major social service systems. Topics explored include: Father Engagement Organizational “Father Friendly” Assessments Interventions with Fathers Setting the Course for Future Theory, Research, and Practice with Fathers Social Work Practice with Fathers: Engagement, Assessment, and Intervention is a book that could be folded into foundation courses in social work or used by practitioners in the field. It is an essential text for graduate students in social work, psychology, sociology, child development, allied health, and similar disciplines and professions, and a go-to resource for helping professionals/practitioners such as social workers, psychologists, and licensed professional counselors. Advanced undergraduate students in these disciplines and professions also will find the text useful in their

Personality Assessment in Police Psychology

- Peter A. Weiss 2010

In recent years, personality assessment by professional psychologists has taken on an increasingly important role in the field of police work. Most importantly, personality assessment instruments have been utilized in the pre-employment psychological screening of police officer candidates. This psychological screening

takes place at the end of the hiring process to ensure that candidates do not have personality characteristics or existing psychopathology that would interfere with their job performance. Personality assessment is also used for other applications in police psychology. These applications include fitness-for-duty evaluations (FFDEs) and second opinion evaluations of officers who challenge hiring decisions. Moreover, police psychologists are involved in a considerable amount of research in order to determine which tests and scales are most appropriate for evaluations. The present volume is divided into four parts to cover the relevant issues in personality assessment for police work. Part I provides an introduction and the basic principles of personality assessment in police psychology. Part II focuses on the major assessment instruments used in police psychology. These include the MMPI-2, the Personality Assessment Inventory (PAI), the Inwald Personality Inventory (IPI) and Hilson

Tests, the M-PULSE Inventory, pre-offer integrity instruments, and the Rorschach Comprehensive System. Part III examines multiple issues in personality assessment research in the field of police psychology. Part IV covers applications of personality assessment in police psychology. These applications include pre-employment evaluations, fitness for duty evaluations, conditional second opinion psychological evaluations of candidates, using multiple sources of information when conducting mandatory or required evaluations, and the politics of personality assessment in police agencies. This unique and comprehensive text is designed for psychologists who are actively working in the field of law enforcement, including psychologists in both applied and research/academic settings.

Parenting Matters - National Academies of

Sciences, Engineering, and Medicine 2016-11-21
Decades of research have demonstrated that the parent-child dyad and the environment of the family—“which includes all primary caregivers”—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and

anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of

stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Child Support - N Wikeley 2006-10-10

Written by one of the UK's leading scholars of welfare law, this book analyses the current child support legislation in its broader historical and social context, synthesising both doctrinal and socio-legal approaches to legal research and scholarship. The book draws on the historical and legal literature on the Poor Law and the development of both the public and private law obligation of child maintenance. Modern child support law must also be considered in the context of both social and demographic changes and in the light of popular norms about child

maintenance liabilities. The main part of the book is devoted to an analysis of the modern child support scheme, and the key issues are addressed: the distinction between applications in 'private' and 'benefit' cases and the extent to which the courts retain a role in child maintenance matters; the basis for, and the justification for, the exception from the obligation for parents with care on benefit to cooperate with the Child Support Agency where they fear 'undue harm or distress'; the assessment of income for the purposes of the formula and the evidential difficulties this entails; the tension between the formula, which ignores the parent with care's income, and the demands of distributive justice; the further conflict between the formula, under which liability is capped only for the very wealthy, and the traditional approach of private law, which is premised on children being entitled to maintenance rather than a share in family wealth; the treatment of special cases under the

formula by way of 'variations' (formerly 'departures'); the nature of decision-making and the scope for appeals; and the efficacy of the provisions relating to collection and enforcement. This book has been shortlisted for the 2007 SLSA Book Prize.

Child Protective Services - Diane DePanfilis 2003

From the Preface: This manual, Child Protective Services: A Guide for Caseworkers, examines the roles and responsibilities of child protective

services (CPS) workers, who are at the forefront of every community's child protection efforts. The manual describes the basic stages of the CPS process and the steps necessary to accomplish each stage: intake, initial assessment or investigation, family assessment, case planning, service provision, evaluation of family progress, and case closure. Best practices and critical issues in casework practice are underscored throughout. The primary audience for this manual includes CPS caseworkers, supervisors, and administrators. State and local CPS agency trainers may use the manual for preservice or inservice training of CPS caseworkers, while schools of social work may add it to class reading lists to orient students to the field of child protection. In addition, other professionals and concerned community

members may consult the manual for a greater understanding of the child protection process. This manual builds on the information presented in *A Coordinated Response to Child Abuse and Neglect: The Foundation for Practice*. Readers are encouraged to begin with that manual as it addresses important information on which CPS practice is based—including definitions of child maltreatment, risk factors, consequences, and the Federal and State basis for intervention. Some manuals in the series also may be of interest in understanding the roles of other professional groups in responding to child abuse and neglect, including: Substance abuse treatment providers; Domestic violence victim advocates; Educators; Law enforcement personnel. Other manuals address special issues, such as building partnerships and working with the courts on CPS cases.
