Brucellosis in Humans and Animals - Michael J. Corbel 2006

Brucellosis, also known as undulant fever, Mediterranean fever, or Malta fever, is an important human disease in many parts of the world. It is a zoonosis and the infection is almost invariably transmitted to people by direct or indirect contact with infected animals or their products. These Guidelines are designed as a concise, yet comprehensive, statement on brucellosis for

public health, veterinary and laboratory personnel without access to specialized services. They are also to be a source of accessible and updated information for such others as nurses, midwives and medical assistants who may have to be involved with brucellosis in humans. Emphasis is placed on fundamental measures of environmental and occupational hygiene in the community and in the household as well as on the sequence of actions required to

detect and treat patients.

Milk and Dairy Products in

Human Nutrition - Ellen

Muehlhoff 2014-01-16

Milk and dairy products are a vital source of nutrition for many people. They also present livelihood opportunities for farm families, processors and other stakeholders in dairy value chains. Consumers, industry and governments need up-to-date information on how milk and dairy products can contribute to human nutrition and how dairy-industry development can best contribute to increasing food security and alleviating poverty. This publication is unique in drawing together information on nutrition, and dairy-industry development, providing a rich source of useful material on the role of dairy products in human nutrition and the way that investment in dairy-industry development has changed.

Closing the Feedback Loop -

Björn-Sören Gigler 2014-05-22

Enhanced transparency, accountability, and government or donor responsiveness to

people needs are imperative to achieve better and more sustainable development results on the ground. The rapid spread of new technologies is transforming the daily lives of millions of poor people around the world and has the potential to be a real game changer for development. Improved accountability and responsiveness are critical for reaching the goals of eliminating extreme poverty and promoting shared prosperity with a focus on improving the well-being of the most vulnerable and marginalized groups in society. Within the broader political economy context, many questions remain unanswered about the role that new technologies can play to act as an accelerator for closing the accountability gap. Within this context, this report brings together new evidence from leading academics and practitioners on the effects of technology-enabled citizen engagement. The report aims to address the following four

main questions: how do new technologies empower communities through participation, transparency, and accountability?; are technologies an accelerator for closing the accountability gap - the space between supply (governments, service providers) and demand (citizens, communities, civil society organizations) that must be bridged for open and collaborative governance?; under what conditions does this occur?; and what are the experiences and lessons learned from existing grassroots innovators and donor-supported citizen engagement and crowdsourcing programs, and how can these programs be replicated or scaled up?. The report presents a theoretical framework about the linkages between new technologies, participation, empowerment, and the improvement of poor people's human well-being based on Amartya Sen's capability approach. The book provides rich case studies about the different factors that

influence whether or not information and communication technology (ICT)-enabled citizen engagement programs can improve the delivery and quality of public services to poor communities. The report analyzes in depth both the factors and process of using new technologies to enhance the delivery of primary health services to pregnant women in Karnataka, India, and of several community mapping and crowdsourcing programs in Guinea, Haiti, Kenya, Libya, Sudan, and other countries.

Language Variation in South Asia - William Bright 1990

South Asia presents the linguist with a bewildering variety of regional dialects, social dialects, formal and informal registers, literary standards, languages, writing systems, and language families. Written over a period of more than twenty years, these essays by a leading authority on South Asian language cover a broad range of topics in South Asian linguistics. The essays address social dialect, structural

borrowing, areal linguistics, the relation between literary and colloquial standards, and the role of written language in South Asian culture from the times of the ancient Indus Valley civilization. Offering a sociolinguistic approach, and encompassing both descriptive and historical studies, this collection of twelve of Bright's most important essays reflects his extensive research on the linguistics of South Asia.

Amusing Ourselves to Death

- Neil Postman 2005-12-27

What happens when media and politics become forms of

entertainment? As our world begins to look more and more like Orwell's 1984, Neil's Postman's essential guide to the modern media is more relevant than ever. "It's unlikely that Trump has ever read *Amusing Ourselves to Death*, but his ascent would not have surprised Postman." - CNN Originally published in 1985, Neil Postman's groundbreaking polemic about the corrosive effects of television on our politics and public discourse has been hailed as a twenty-first-century book published in the twentieth century. Now, with television joined by more sophisticated electronic media—from the Internet to cell phones to DVDs—it has taken on even greater significance. *Amusing Ourselves to Death* is a prophetic look at what happens when politics, journalism, education, and even religion become subject to the demands of entertainment. It is also a blueprint for regaining control of our media, so that they can serve our highest goals. “A brilliant, powerful, and

average and in the reduction in socially determined health inequalities. It provides an overview and introduction into how economists would approach the assessment of the economic motivation to invest in the social determinants of health and socially determined health inequities, including what the major challenges are in this assessment. It illustrates the extent to which an economic argument can be made in favour of investment in 3 major social determinants of health areas: education, social protection, and urban development and infrastructure. It describes whether education policy, social protection, and urban development, housing and transport policy can act as health policy"--

The Global City - Saskia Sassen 2013-04-04

This classic work chronicles how New York, London, and Tokyo became command centers for the global economy and in the process underwent a series of massive and parallel changes. What distinguishes Sassen's theoretical framework is the emphasis on the formation of cross-border dynamics through which these cities and the growing number of other global cities begin to form strategic transnational networks. All the core data in this new edition have been updated, while the preface and epilogue discuss the relevant trends in globalization since the book originally came out in 1991.

educate their girls. Gene Sperling, author of the seminal 2004 report published by the Council on Foreign Relations, and Rebecca Winthrop, director of the Center for Universal Education, have written this definitive book on the importance of girls' education. As Malala Yousafzai expresses in her foreword, the idea that any child could be denied an education due to poverty, custom, the law, or terrorist threats is just wrong and unimaginable. More than 1,000 studies have provided evidence that high-quality girls' education around the world leads to wide-ranging returns: Better outcomes in economic areas of growth and incomes Reduced rates of infant and maternal mortality Reduced rates of child marriage Reduced rates of the incidence of HIV/AIDS and malaria Increased agricultural productivity Increased resilience to natural disasters Women's empowerment What Works in Girls' Education is a compelling work for both concerned global citizens, and

any academic, expert, nongovernmental organization (NGO) staff member, policymaker, or journalist seeking to dive into the evidence and policies on girls' education.

BESTSELLER • Experience the book that started the Quiet Movement and revolutionized how the world sees

introverts—and how introverts see themselves—by offering validation, inclusion, and inspiration “Superbly

researched, deeply insightful, and a fascinating read, Quiet is an indispensable resource for anyone who wants to

understand the gifts of the introverted half of the population.”—Gretchen Rubin,

author of The Happiness Project NAMED ONE OF THE BEST BOOKS OF THE YEAR

BY People • O: The Oprah Magazine • Christian Science Monitor • Inc. • Library

Journal • Kirkus Reviews At least one-third of the people we know are introverts. They are the ones who prefer listening to speaking; who innovate and create but dislike self-

promotion; who favor working on their own over working in teams. It is to introverts—Rosa Parks, Chopin, Dr. Seuss, Steve Wozniak—that we owe many of the great contributions to society. In Quiet, Susan Cain argues that we dramatically undervalue introverts and shows how much we lose in doing so. She charts the rise of the Extrovert Ideal throughout the twentieth century and explores how deeply it has come to permeate our culture. She also introduces us to successful introverts—from a witty, high-octane public speaker who recharges in solitude after his talks, to a record-breaking salesman who quietly taps into the power of questions. Passionately argued, impeccably researched, and filled with indelible stories of real people, Quiet has the power to permanently change how we see introverts and, equally important, how they see themselves. Everyday Ethnicity in Sri Lanka

- Daniel Bass 2013

Focusing on notions of diaspora, identity and agency, this book examines ethnicity in war-torn Sri Lanka. It highlights the historical development and negotiation of a new identification of Up-country Tamil amidst Sri Lanka's violent ethnic politics. Over the past thirty years, Up-country (Indian) Tamils generally have tried to secure their vision of living within a multi-ethnic Sri Lanka, not within Tamil Eelam, the separatist dream that ended with the civil war in 2009.

Exploring Sri Lanka within the deep history of colonial-era South Asian plantation diasporas, the book argues Up-country Tamils form a "diaspora next-door" to their ancestral homeland. It moves beyond simplistic Sinhala-Tamil binaries and shows how Sri Lanka's ethnic troubles actually have more in common with similar battles that

diasporic Indians have faced in Fiji and Trinidad than with Hindu-Muslim communalism in neighbouring India, Pakistan and Bangladesh. Shedding new light on issues of agency, citizenship, displacement and re-placement within the formation of diasporic communities and identities, this book demonstrates the ways that culture workers, including politicians, trade union leaders, academics and NGO workers, have facilitated the development of a new identity as Up-country Tamil. It is of interest to academics working in the fields of modern South Asia, diaspora, violence, post-conflict nations, religion and ethnicity.

A Brief History of Citizenship - Derek Heater
2004-07-07

modern era. Heater effectively argues that we cannot begin to understand our current conditions until we have an understanding of the initial idea of "the citizen" and how that idea has evolved over the centuries. Important topics covered include how citizenship differs from other forms of sociopolitical identity, the differences between nationality and citizenship, and how multiculturalism has changed our ideas of citizenship in the twenty-first century. This concise and readable book is an ideal introduction to the history of citizenship.

The Voting Rights Act of 1965 - United States 1965

Pakistan Or the Partition of India - B. R. Ambedkar
2017-10-09

This is one of the epics from Dr. Ambedkar. Written in 1945 the book really explains the dynamics of Hindu Mahasabha and Muslim League and how Congress and British Government played a role in partition. Although this book takes you to the unheard side of partition, it is interesting on how linguistic approach was chosen for a division of something that is unsure if it existed. Dr. Ambedkar takes a fine approach of giving a clarity of situation instead of been judgmental on the partition. No wonder the man was chosen to write our constitution. Of course if the war of majority and minority is kept away, the partition and its

Handbook on the Crime Prevention Guidelines -

Margaret Shaw 2010

All countries strive to ensure safety and security for their citizens and to increase the quality of their lives. The Handbook offers a concise overview of the main considerations to be taken into account in planning and implementing crime prevention strategies and interventions. It also recognises that there are some major differences between regions and countries in terms of the challenges posed by crime and victimization and the importance of adapting programmes to local contexts. The main emphasis is on how crime prevention strategies based on the guidelines developed by the United Nations can be entrenched and sustained over time. It includes information on the kinds of methods and tools that can be utilised and are becoming increasingly available.

How Tobacco Smoke Causes

Disease - 2010

This report considers the biological and behavioral mechanisms that may underlie the pathogenicity of tobacco smoke. Many Surgeon General's reports have considered research findings on mechanisms in assessing the biological plausibility of associations observed in epidemiologic studies. Mechanisms of disease are important because they may provide plausibility, which is one of the guideline criteria for assessing evidence on causation. This report specifically reviews the evidence on the potential mechanisms by which smoking causes diseases and considers whether a mechanism is likely to be operative in the production of human disease by tobacco smoke. This evidence is relevant to understanding how smoking causes disease, to identifying those who may be particularly susceptible, and to assessing the potential risks of tobacco products.

Environmental Journalism

- D. S. Poornananda 2022-01-31

Environmental Journalism: Reporting on Environmental Concerns and Climate Change in India examines the increase of environmental concerns and its reflection in Indian media, exploring the possibilities of and constraints in covering environmental news. The book discusses major challenges in environmental reportage, such as political and corporate pressures on media houses and threats to journalists. It discusses why environmental reporting is not considered an important 'beat' and reports covering these issues are

usually assigned to junior reporters. This book analyses why journalists lack the proper training to report on environmental issues, focusing on the many obstacles to scientific knowledge and specialized training. It draws critical insights from interviews with environmental journalists, activists and specialists, and will be an important read for scholars of not only media studies and environmental studies but also sociology, politics and development studies. Looking at the media's role in framing environmental degradation as a human rights issue, the book argues that the growth of environmental journalism can contribute significantly to global initiatives for saving the planet.

Voice and Agency - Jeni Klugman 2014-09-29

Despite recent advances in important aspects of the lives of girls and women, pervasive challenges remain. These challenges reflect widespread deprivations and constraints and include epidemic levels of gender-based violence and discriminatory laws and norms that prevent women from owning property, being educated, and making meaningful decisions about their own lives--such as whether and when to marry or have children. These often violate their most basic rights and are magnified and multiplied by poverty and lack of education. This groundbreaking book distills vast data and hundreds of studies to shed new light on deprivations and constraints facing the voice and agency of women and girls worldwide,

and on the associated costs for individuals, families, communities, and global development. The volume presents major new findings about the patterns of constraints and overlapping deprivations and focuses on several areas key to women's empowerment: freedom from violence, sexual and reproductive health and rights, ownership of land and housing, and voice and collective action. It highlights promising reforms and interventions from around the world and lays out an urgent agenda for governments, civil society, development agencies, and other stakeholders, including a call for greater investment in data and knowledge to benchmark progress.

The Philosophy of Psychology -

George Botterill 1999-08-19

What is the relationship between common-sense, or 'folk', psychology and contemporary scientific psychology? Are they in conflict with one another? Or do they perform quite different, though perhaps

complementary, roles? George Botterill and Peter Carruthers discuss these questions, defending a robust form of realism about the commitments of folk psychology and about the prospects for integrating those commitments into natural science. Their focus throughout the book is on the ways in which cognitive science presents a challenge to our common-sense self-image - arguing that our native conception of the mind will be enriched, but not overturned, by science. *The Philosophy of Psychology* is designed as a textbook for upper-level undergraduate and beginning graduate students in philosophy and cognitive science, but as a text that not only surveys but advances the debates on the topics discussed, it will also be of interest to researchers working in these areas.

Handbook of Intercultural

Training - Dan Landis

2013-09-17

Handbook of Intercultural Training, Volume I: Issues in Theory and Design is a compilation of nine essays dealing with a problem central to today's complex world: "How can people best live and work with others who come from very different cultural backgrounds?" The major focus of the nine essays in this book is the experience of living and working for long periods in other cultures. The book also focuses on other types of cross-cultural experiences, such as majority-minority group

relations, training and preparation, and integration. There are analyses of possible experiences people may have, such as stress during adjustments. Other authors in this book address the benefits of intercultural action and integration into a country's educational system.

International education is seen to benefit through a greater attention to face-to-face cross-cultural experience. The first seven essays are good descriptions of intercultural behavior and training, while Chapter 8 is an evaluation of cross-cultural training. The last chapter describes the atlas of affective meanings containing 620 concepts from 30 languages/culture communities for use in intercultural training and education. Behavioral and social scientists, trainers and cross-cultural scientists, overseas businessmen, foreign students, diplomats, immigrants, and other people who work in different cultures will find this handbook very helpful.

Sexual Harassment of Women - National Academies of

Sciences, Engineering, and Medicine 2018-09-01
Over the last few decades, research, activity, and funding has been devoted to improving the recruitment, retention, and advancement of women in the fields of science, engineering, and medicine. In recent years the diversity of those participating in these fields, particularly the participation of women, has improved and there are significantly more women entering careers and studying science, engineering, and medicine than ever before. However, as women increasingly enter these fields they face biases and barriers and it is not surprising that sexual harassment is one of these barriers. Over thirty years the incidence of sexual harassment in different industries has held steady, yet now more women are in the workforce and in academia, and in the fields of science, engineering, and medicine (as students and faculty) and so more women are experiencing sexual harassment as they work and learn. Over the last

several years, revelations of the sexual harassment experienced by women in the workplace and in academic settings have raised urgent questions about the specific impact of this discriminatory behavior on women and the extent to which it is limiting their careers. Sexual Harassment of Women explores the influence of sexual harassment in academia on the career advancement of women in the scientific, technical, and medical workforce. This report reviews the research on the extent to which women in the

fields of science, engineering, and medicine are victimized by sexual harassment and examines the existing information on the extent to which sexual harassment in academia negatively impacts the recruitment, retention, and advancement of women pursuing scientific, engineering, technical, and medical careers. It also identifies and analyzes the policies, strategies and practices that have been the most successful in preventing and addressing sexual harassment in these settings.
