Alcohol and Nationhood in Nineteenth-Century Mexico - Deborah Toner 2015-06-01

Drawing on an analysis of issues surrounding the consumption of alcohol in a diverse range of source materials, including novels, newspapers, medical texts, and archival records, this lively and engaging interdisciplinary study explores sociocultural nation-building processes in Mexico between 1810 and 1910. Examining the historical importance of drinking as both an important feature of Mexican social life and a persistent source of concern for Mexican intellectuals and politicians, Deborah Toner's *Alcohol and Nationhood in Nineteenth-Century Mexico* offers surprising insights into how the nation was constructed and deconstructed in the nineteenth century. Although Mexican intellectuals did indeed condemn the physically and morally debilitating aspects of excessive alcohol consumption and worried that particularly Mexican drinks and drinking places were preventing Mexico's progress as a nation, they also identified more culturally valuable aspects of Mexican drinking cultures that ought to be celebrated as part of an "authentic" Mexican national culture. The intertwined literary and historical analysis in this study illustrates how wide-ranging the connections were between ideas about drinking, poverty, crime, insanity, citizenship, patriotism, gender, sexuality, race, and ethnicity in the nineteenth century, and the book makes timely and important contributions to the fields of Latin American literature, alcohol studies, and the social and cultural history of nation-building.

The Penetrometer and Soil Exploration - G. Sanglerat 2012-12-02

The Penetrometer and Soil Exploration: Interpretation of Penetration Diagrams—Theory presents the many uses of the penetrometer for investigating soil conditions. Testing methods include the following: (1) in situ load tests on full-scale foundations; (2) laboratory testing of undisturbed samples, and (3) in situ testing of soils. The book regards the advantages of using the penetrometer as a handy tool in drilling and sampling. The text emphasizes that the investigator should never rely entirely on the analogy or the extrapolation of information pertaining to a nearby site. The text describes the different shapes of the penetrometer diagrams obtained from tests in homogeneous cohesionless soil, as well as the significance of the embedment of a pile into the bearing stratum for deep foundation designs. The paper discusses the De Beer theory, Kerisel's theory, and the theory developed at the Delft Laboratory of Soil Mechanics. The laboratory determines the maximum soil pressure and the corresponding embedment of the pile. According to Professor L'Herminier, "the bearing capacity of a pile may be determined...from laboratory tests on soil samples, the other by extrapolating penetrometer data." The book is suitable for structural engineers, civil engineers, geologists, architects, and students of soil mechanics.

Handbook of Research on Retailer-Consumer Relationship

Development - Musso, Fabio 2014-05-31

Though based on an economic transition, retailer-consumer relationship is also influenced by non-economic factors and is a context of social interaction. With the emergence of modern merchandising techniques and a rise in large retail companies, consumers have become increasingly vigilant of practice within the retail industry. *Handbook of Research on Retailer-Consumer Relationship Development* offers a complete and updated overview of various perspectives relating to customer relationship management within the retail industry and stimulates the search for greater integration of these views in further research. Offering different angles to analyze the exchange between the retailer and the consumer, this handbook is a valuable tool for professionals and scholars seeking to upgrade their knowledge, as well as for upper-level students.

Simultaneous Systems of Differential Equations and Multi-Dimensional Vibrations - Luis Manuel Braga da Costa Campos 2019-11-05

Simultaneous Differential Equations and Multi-Dimensional Vibrations is the fourth book within *Ordinary Differential Equations with Applications to Trajectories and Vibrations, Six-volume Set*. As a set, they are the fourth volume in the series *Mathematics and Physics Applied to Science and Technology*. This fourth book consists of two chapters (chapters 7 and 8 of the set). The first chapter concerns simultaneous systems of ordinary differential equations and focuses mostly on the cases that have a matrix of characteristic polynomials, namely linear systems with constant or homogeneous power coefficients. The method of the matrix of characteristic polynomials also applies to simultaneous systems of linear finite difference equations with constant coefficients. The second chapter considers linear multi-dimensional oscillators with any number of degrees of freedom including damping, forcing, and multiple resonance. The discrete oscillators may be extended from a finite number of degrees-of-freedom to infinite chains. The continuous oscillators correspond to waves in homogeneous or inhomogeneous media, including elastic, acoustic, electromagnetic, and water surface waves. The combination of propagation and dissipation leads to the equations of mathematical physics. Presents simultaneous systems of ordinary differential equations and their elimination for a single ordinary differential equation Includes cases with a matrix of characteristic polynomials, including simultaneous systems of linear differential and finite difference equations with constant coefficients Covers multi-dimensional oscillators with damping and forcing, including modal decomposition, natural frequencies and coordinates, and multiple resonance Discusses waves in inhomogeneous media, such as elastic, electromagnetic, acoustic, and water waves Includes solutions of partial differential equations of mathematical physics by separation of variables leading to ordinary differential equations

Argentine Workers - Peter Ranis 1992-06-15

Argentine Workers provides an insightful analysis of the complex combination of values and attitudes exhibited by workers in a heavily unionized, industrially developing country, while also ascertaining their political beliefs. By analyzing empirical data, Ranis describes what workers think about their unions, employers, private and foreign enterprise, the economy, the state, privatization, landowners, politics, the military, the "dirty war" and the "disappeared," the Montonero guerillas, the church, popular culture and leisure pursuits, and their personal lives and ambitions.

Protest and Participation - John R. Low-Beer 1978-05-31

This 1978 study examines the new working class of scientists, white collar professionals, and technicians that has emerged in advanced industrial societies and considers its role in the political process. Professor Low-Beer examines the lives of a sample group of Italian electronics technicians, as theirs had been the most militant profession in Italy. Although Low-Beer warns against quick conclusions regarding the broader political significance of such desires, vivid quotations from interviews illustrate the principal longing indicated by his statistical analyses: for more control over work situation. Whilst describing the lifestyles and class imagery among the technicians, the author compares them to other groups, and concludes that strike participation is to be explained by the political backgrounds of workers, and only secondarily by organizational factors. Professor Low-Beer also analyses the significance of the increase that had occurred in the number of professionals in technical professions for the future of politics and industrial conflict.

Social Dynamics in a Systems Perspective - Sergio Barile 2017-10-04

Dante - John Took 2021-12-14

"For all that has been written about the author of the Divine Comedy, Dante Alighieri (1265-1321) remains the best guide to his own life and work. Dante's writings are therefore never far away in this authoritative and comprehensive intellectual biography, which offers a fresh account of the medieval Florentine poet's life and thought before and after his exile in 1302. Beginning with the often violent circumstances of Dante's life, the book examines his successive works as testimony to the course of his passionate humanity: his lyric poetry through to the Vita nova as the great work of his first period; the Convivio, De vulgari eloquentia and the poems of his early years in exile; and the Monarchia and the Commedia as the product of his maturity. Describing as it does a journey of the mind, the book confirms the nature of Dante's undertaking as an exploration of what he himself speaks of as "maturity in the flame of love." The result is an original synthesis of Dante's life and work." -- Amazon.com.

Skin Biopsy - Uday Khopkar 2011-11-02

Skin Biopsy - Perspectives is a comprehensive compilation of articles that relate to the technique and applications of skin biopsy in diagnosing skin diseases. While there have been numerous treatises to date on the interpretation or description of skin biopsy findings in various skin diseases, books dedicated entirely to perfecting the technique of skin biopsy have been few and far between. This book is an attempt to bridge this gap. Though the emphasis of this book is on use of this technique in skin diseases in humans, a few articles on skin biopsy in animals have been included to acquaint the reader to the interrelationship of various scientific disciplines. All aspects of the procedure of skin biopsy have been adequately dealt with so as to improve biopsy outcomes for patients, which is the ultimate goal of this work.

Structura si dinamica sistemelor online de networking social de succes - R.M. Meza 2015-04-01

Această carte se configurează în raport cu tradiția abordărilor structurale în sociologie și are ca obiect de studiu site-urile de networking social de succes conceptualizate ca un punct de convergență a mai multor tehnologii de comunicare mediată de computer. Primele capitole trec în revistă studiul rețelelor sociale, comunicarea mediată de computer, paradigma Web 2.0 și site-urile de tip rețea socială. Demersul investigativ se concentrează pe studiul construcției profilurilor utilizatorilor din aceste sisteme. Într-un prim studiu este analizată structura unei porțiuni din rețeaua Facebook în relație cu preferințele de consum media configurate în informațiile profil și prin utilizarea butonului "Îmi place"/"Like", arătând o determinare evenimentială, experiențială a acestora. În al doilea studiu este analizată construcția discursului satiric în raport cu tacticile de auto-prezentare în imaginile profil asociate unei subculturi a tinerilor denumite "cocalari" și "pițipoance" pe site-urile cocalari.com și pitzipoance.org, arătând efectele prăbușirii contextelor sociale în mediul online.
