Small Enterprises and Entrepreneurship Development - Enyinna Chuta 2012-04-01

The increasing numbers of college and university graduates from Africa's tertiary institutions and the declining prospects for jobs in the public and private sector have reinforced the importance of creating avenues for self-employment. But job creation exposes a serious gap in education policies, for basic skills in entrepreneurship are not taught in most tertiary curricula across the continent. This nineteen-chapter volume provides essential course text material for developing the field of entrepreneurship in tertiary institutions, thus addressing the issue of appropriate pedagogy critical for the emerging field of entrepreneurship development in higher education institutions in Africa. Drawing from Nigeria, West Africa and other parts of the developing world, the volume furnishes much needed empirical information to fashion out appropriate policies and projects within macroeconomic framework to nurture small and medium enterprises as a development tool.

Entrepreneurship - Michael Laverty 2020-01-16

Entrepreneurship Policy: Theory and Practice - Anders Lundstrom 2006-03-30

Entrepreneurship Policy: Theory and Practice is the first book to fully analyze the construction of entrepreneurship policy, a rapidly-evolving area of policy about which little is known. From a study and assessment of the practices of governments in thirteen countries in Europe, North America and the Asia-Pacific, this book fully describes the policy area and shares new tools and methods for better understanding and explaining the why and how of an entrepreneurship policy approach. Unlike other research in the field of entrepreneurship where implications from research findings are used to suggest what policy actions should be taken to increase the level of entrepreneurship in an economy, this study is based on what entrepreneurship policy actions are being taken. This is a unique book in the field which points to the way forward both for policymakers and for the research community in terms of thinking about entrepreneurship policy and the complex issues surrounding its development.

[A Call for Judgment](#) - Amar Bhide 2010-10-01

Our prosperity requires the enterprise of innumerable individuals and businesses who exercise their imagination and judgment and bear responsibility for outcomes. And widespread enterprise is fostered through dialogue and relationships, not merely prices in anonymous markets. Yet modern finance blatantly neglects these necessary elements for enterprise. In the last several decades finance has become increasingly centralized, distanced, and mechanistic. Instead of many lending officers making judgments about borrowers they know, credit decisions are the output of the models of a few Wall Street wizards and credit agencies. This robotic centralized finance stifles the dynamism of the real economy and leads to recurring collapses. *A Call for Judgment* clearly explains how bad theories and mis-regulation have caused a dangerous divergence between the real economy and finance. In simple language Bhid? takes apart the so-called advances in modern finance, showing how backward-looking, top-down models were used to mass-produce toxic products. Thanks to excessively tight securities laws and loose banking laws, anonymous transactions have displaced relationship-based finance. And Bhid? offers, tough simple rules for restoring relationships and case-by-case judgment: limit banks--and all deposit taking institutions--to basic lending and nothing else. *A Call for Judgment*

is both a primer on the role of finance in a dynamic modern economy, and a cautionary tale about the pitfalls of banks functioning as highly centralized, mechanistic entities. It is essential reading for anyone interested in bringing the economy back to a point at which decisions can be made that foster organic economic growth without the potentially disastrous risks currently accepted by modern finance.

Entrepreneurship Education - Mathew J. Manimala 2017-06-13

The book provides an overview of developments in the field of entrepreneurship education, with special reference to global perspectives on innovations and best practices, as well as research in the emerging economy context. It focuses on various experiments in curriculum design, review and reform in addition to the innovative processes adopted for developing new content for entrepreneurship courses, in many cases with an assessment of their impact on students' entrepreneurial performance. Further, it discusses the pedagogical methods introduced by teachers and trainers to enhance the effectiveness of students' learning and their development as future entrepreneurs. It explains the various initiatives generally undertaken to broaden the scope of entrepreneurship education by extending it beyond regular students and offering it to other groups such as professionals, technicians, artisans, war veterans, and the unemployed. The book is a valuable resource for researchers and academics working in the field of entrepreneurship education as well as for trainers, consultants, mentors and policy makers.

[ENTREPRENEURSHIP DEVELOPMENT, SECOND EDITION](#) - SHARMA, SANGEETA 2021-07-01

This book is a modest attempt to acquaint students with the basics of entrepreneurship and the prevailing entrepreneurial climate in India. Motivating young brains to explore and follow entrepreneurial pursuits by educating them about its challenges, opportunities, risks and rewards is the prime objective of this introductory text. In the course of writing the present book, special care has been taken to elaborate on a number of ideas, theories and concepts so as to help readers explore and understand various aspects and dimensions of entrepreneurship. Wherever needed, the contents are supplemented with suitable examples, cases and caselets in order to make reading more interesting and relevant. The book also presents a comprehensive coverage of few niche areas of study, namely 'Creativity, Innovation and Value Creation', 'Family-owned Businesses' and 'Rural Entrepreneurship'. Introduction of

three new chapters, in addition to a complete overhaul of the existing text enhances academic credentials of the book, apart from bringing about required freshness and materiality. The book conforms to the syllabi of B.A. and BBA of many universities and hence it is suitable for their course study. Besides, the EDP trainers and motivators associated with government institutes (NISEBUD, MSME, NIMSME, SIDO, TCOS, CEDs and ITIs) may also find this book of immense value to them. 52 Sales Questions Answered - Scott Sambucci 2013-08

For the past few years, I've been answering questions about sales by clients in workshops, advisory engagements, sales coaching calls, and email. On Quora, users and followers ask me to answer sales and business development questions all the time. This book is a compilation of these questions and answers. The answers extracted from my Quora activity have been updated and expanded in many cases. I've organized the book so that each question is answered independently. That is, the book does not build on itself like many books with chapters. You should use the book frequently as a reference guide to difficult questions that arise during the workday. This also means from time to time, I may refer to a concept more than once or you may notice parts of one answer to be very similar to parts of other answers. Even with these occasional duplications, most of the content is original and does not overlap. I've also organized the book as best I can into sections, so that groups of questions about the same major topic are together. Many times answering one question leads to more questions and this organization attempts to provide the reader with some flow, given the otherwise modular nature of the book. Any references to outside resources, companies, blog posts, and books were done completely on my own and without request or provocation by these sources. I receive no financial

gain for referring to these companies, except a reference or two to my other book I strongly urge you to buy and read, of course... Check it out on Amazon: "Startup Sales: How to Sell if You REALLY, REALLY Have to and Don't Know How." You might be asking, "Why 52 questions? Is this supposed to be one question per week?" I first thought about stopping at a nice round 50 questions. That number seemed too boring and unoriginal, so I added two more questions. Then, I was concerned that readers would relate "52" to weeks in the year, even though that was unintentional. Like a smart man, I ask my wife what I should do. She described this best: "When you're starting a company or a career in sales, questions arise all the time. If you can learn the answer to one of these questions every week for a year, your sales knowledge and abilities will increase so dramatically that you'll never need to worry about sales again." So there you have it - "52 Sales Questions Answered."

Entrepreneurship and Small Business - R. C. Agarwal 2020-08-30

Entrepreneurship is the most important instrument of social and economic development. It is because of this reason it is remarked that developing countries are not underdeveloped but undermanaged. It is true of Japan. About a century ago Japan was considered as an underdeveloped country. Thanks to the rapid progress made by Management science, now Japan is regarded as one of the most advanced countries of the world. Increasing production and productivity is the need of the hour. These are dependent upon physical factors or natural resources of a country and its human resource. However, the resources capable of enlargement can only be human resource. All other resources stand under the laws of mechanics. They can be better utilised or worse utilised but they can never have an output greater than the sum of the inputs. Man alone of all the resources available to man, can grow and develop if properly directed and motivated. In line with this thinking, there has been a revolutionary change in management philosophy. He (man) is potentially creative, trustworthy and co-operative. He is also considered to possess the potential for growth, achievement and constructive action with others. It is the job of the management to nurture and tap employee's productive drives. Entrepreneurship, therefore, holds the key to the economic development of a nation. It is because of this reason the U.G.C.'s Unified Syllabus has included the study of business management subject in almost every course in business and management disciplines, be it B. Com., M. Com., B.B.A. or M.B.A., C.A.C.S., C.W.A. and so on. The author has tried to explain the subject in the most simple language. Extensive use of charts, pictures and diagrams has been made to explain and illustrate the difficult concepts and Fundamentals of Entrepreneurship. Important questions asked in the examinations conducted by various universities and professional institutes have been given at the end of each chapter. The authors sincerely believe that the book will be of immense use and help the students preparing for these examinations.

Developmental State and the Dalit Question in Madhya Pradesh: Congress Response - Sudha Pai 2013-05-13

Dalit assertion has been a central feature of the states in the Hindi heartland since the mid-1980s, leading to the rise of political consciousness and identity-based lower-caste parties. The present study focuses on the different political response of the Congress party to identity assertion in Madhya Pradesh under the leadership of Digvijay Singh. In Uttar Pradesh and Bihar, in response to the strong wave of Dalit assertion that swept the region, parties such as the Bahujan Samaj Party (BSP) and the Rashtriya Janata Dal (RJD) used strategies of political mobilisation to consolidate Dalit/backward votes and capture state power. In Madhya Pradesh, in contrast, the Congress party and Digvijay Singh at the historic Bhopal Conference held in January 2002 adopted a new model of development that attempted to mobilise Dalits and tribals and raise their standard of living by providing them economic empowerment. This new Dalit Agenda constitutes an alternative strategy at gaining Dalit/tribal support through of state-sponsored economic upliftment as opposed to the political mobilisation strategy employed by the BSP in Uttar Pradesh. The present study puts to test the limits of the model of state-led development, of the use of political power by an enlightened political elite to introduce change from above to address the weaker sections of society. The working of the state is thus analysed in the context of the society in which it is embedded and the former's ability to insulate itself from powerful vested interests. In interrogating this state-led redistributive paradigm, the study has generated empirical data based on extensive fieldwork and brought to the fore both the potentials and the limitations of using the model of 'development from above' in a democracy. It suggests that the absence of an upsurge from below limits the ability of an enlightened political elite that mans the developmental

state to introduce social change and help the weaker sections of society.

Microfinance for Entrepreneurial Development - Douglas Cumming

2017-09-28

This edited collection presents recent developments, practical

innovations, and policy reforms in the realm of microfinance in emerging

markets. Microfinance has been hotly debated by ever-colliding camps of

ardent supporters, who believe that microfinance addresses credit

market failures and provides a durable answer to the problem of the

poverty, and staunch critics, who argue that lending by microfinance

institutions is wasteful, and the interest rates are too high. To bring

further insight into this important debate, this book presents

comprehensive historical, political, and economic perspectives on the

latest issues in microfinance. An impressive array of scholars and practitioners build a framework for thinking about regulation to drive sustainable, inclusive development. With case studies of programs in India, Ghana, and Bangladesh, and examinations of the effects of gender and religion on financial decision-making, this comprehensive collection offers something valuable to scholars, policymakers, and practitioners—anyone with a vested interest in promoting innovation in microfinance.

Business Development For Dummies - Anna Kennedy 2015-04-20

Growing a small business requires more than just sales Business

Development For Dummies helps maximise the growth of small- or

medium-sized businesses, with a step-by-step model for business development designed specifically for B2B or B2C service firms. By mapping business development to customer life cycle, this book helps owners and managers ensure a focus on growth through effective customer nurturing and management. It's not just sales! In-depth coverage also includes strategy, marketing, client management, and partnerships/alliances, helping you develop robust business practices that can be used every day. You'll learn how to structure, organise, and execute an effective development plan, with step-by-step expert guidance. Realising that you can't just "hire a sales guy" and expect immediate results is one of the toughest lessons small business CEOs have to learn. Developing a business is about more than just gaining customers - it's about integrating every facet of your business in an overarching strategy that continually works toward growth. Business Development For Dummies provides a model, and teaches you what you need to know to make it work for your business. Learn the core concepts of business development, and how it differs from sales Build a practical, step-by-step business development strategy Incorporate marketing, sales, and customer management in general planning Develop and implement a growth-enhancing partnership strategy Recognising that business development is much more than just sales is the first important step to sustained growth. Development should be daily - not just when business starts to tail off, or you fall into a cycle of growth and regression. Plan for growth, and make it stick - Business Development For Dummies shows you how.

An Empirical Study of Problems and Prospects of Entrepreneurship Development through Management Education - Dr Rajesh NarayanraoPahurkar

Financial Technology (FinTech), Entrepreneurship, and Business Development - Bahaaeddin Alareeni 2022

This book constitutes the refereed proceedings of the International Conference on Business and Technology (ICBT2021) organized by EuroMid Academy of Business & Technology (EMABT), held in Istanbul, between 06-07 November 2021. In response to the call for papers for ICBT2021, 485 papers were submitted for presentation and inclusion in the proceedings of the conference. After a careful blind refereeing process, 292 papers were selected for inclusion in the conference proceedings from forty countries. Each of these chapters was evaluated through an editorial board, and each chapter was passed through a double-blind peer-review process. The book highlights a range of topics in the fields of technology, entrepreneurship, business administration, accounting, and economics that can contribute to business development in countries, such as learning machines, artificial intelligence, big data, deep learning, game-based learning, management information system, accounting information system, knowledge management, entrepreneurship, and social enterprise, corporate social responsibility and sustainability, business policy and strategic management, international management and organizations, organizational behavior and HRM, operations management and logistics research, controversial issues in management and organizations, turnaround, corporate entrepreneurship, innovation, legal issues, business ethics, and firm governance, managerial accounting and firm financial affairs, non-traditional research, and creative methodologies. These proceedings are reflecting quality research contributing theoretical and practical implications, for those who are wise to apply the technology within any business sector. It is our hope that the contribution of this book proceedings will be of the academic level which even decision-makers in the various economic and executive-level will get to appreciate.
