

Nsfas Bursary Application Forms For 2015

Right here, we have countless book **Nsfas Bursary Application Forms For 2015** and collections to check out. We additionally present variant types and plus type of the books to browse. The agreeable book, fiction, history, novel, scientific research, as skillfully as various other sorts of books are readily easy to use here.

As this Nsfas Bursary Application Forms For 2015 , it ends going on being one of the favored books Nsfas Bursary Application Forms For 2015 collections that we have. This is why you remain in the best website to look the incredible books to have.

Staying the course - Great Britain: National Audit Office 2007-07-26

This report finds that, when compared internationally, England achieves a high rate of student retention. However the variation between retention rates of different institutions and the worsening of some institution's continuation rates shows that there is scope for further improvement. This will be increasingly important as access to further education is broadened, bringing in students who are likely to need more support. Amongst the recommendations are: the monitoring of retention at student, faculty and course level; the use of early-leaver surveys when problems are identified; more positive student support that emphasises ways to improve grades; identification of students eligible for Disabled Students' Allowances; the adoption of good practice from other institutions.

Funding Your Education -

Whither Opportunity? - Greg J. Duncan 2011-09-01

As the incomes of affluent and poor families have diverged over the past three decades, so too has the educational performance of their children. But how exactly do the forces of rising inequality affect the educational attainment and life chances of low-income children? In *Whither Opportunity?* a distinguished team of economists, sociologists, and experts in social and education policy examines the corrosive effects of unequal family resources, disadvantaged neighborhoods, insecure labor markets, and worsening school conditions on K-12 education. This groundbreaking book illuminates the ways rising inequality is undermining one of the most important goals of public education—the ability of schools to provide children with an equal chance at academic and economic success. The most ambitious study of educational inequality to date, *Whither Opportunity?* analyzes how social and economic conditions surrounding schools affect school performance and children's educational achievement. The book shows that from earliest childhood, parental investments in children's learning affect reading, math, and other attainments later in life. Contributor Meredith Phillip finds that between birth and age six, wealthier children will have spent as many as 1,300 more hours than poor children on child enrichment activities such as music lessons, travel, and summer camp. Greg Duncan, George Farkas, and Katherine Magnuson demonstrate that a child from a poor family is two to four times as likely as a child from an affluent family to have classmates with low skills and behavior problems – attributes which have a negative effect on the learning of their fellow students. As a result of such disparities, contributor Sean Reardon finds that the gap between rich and poor children's math and reading achievement scores is now much larger than it was fifty years ago. And such income-based gaps persist across the school years, as Martha Bailey and Sue Dynarski document in their chapter on the growing income-based gap in college completion. *Whither Opportunity?* also reveals the profound impact of environmental factors on children's educational progress and schools' functioning. Elizabeth Ananat, Anna Gassman-Pines, and Christina Gibson-Davis show that local job losses such as those caused by plant closings can lower the test scores of students with low socioeconomic status, even students whose parents have not lost their jobs. They find that community-wide stress is most likely the culprit. Analyzing the math achievement of elementary school children, Stephen Raudenbush, Marshall Jean, and Emily Art find that students learn less if they attend schools with high student turnover during the school year – a common occurrence in poor schools. And David Kirk and Robert Sampson show that teacher commitment, parental involvement, and student achievement in schools in high-crime neighborhoods all tend to be low.

For generations of Americans, public education provided the springboard to upward mobility. This pioneering volume casts a stark light on the ways rising inequality may now be compromising schools' functioning, and with it the promise of equal opportunity in America.

Reflections of South Africa Student Leaders 1994-2017 - Thierry M Luescher 2020-10-09

Reflections of South African Student Leaders 1994-2017 brings together the reflections of twelve former SRC leaders from across the landscape of South African universities. Each student leader's reflections are presented in a dedicated chapter that draws closely on an interview conducted in the course of 2018/19 which was followed by an interactive process of co-editing, correcting, and approving the chapter between the researchers and the student leaders. This work was published by Saint Philip Street Press pursuant to a Creative Commons license permitting commercial use. All rights not granted by the work's license are retained by the author or authors.

Responding to the Educational Needs of Post-school Youth - Nico Cloete 2009

The research reflected in this volume indicates that in South Africa there are almost three million youth between the ages of 18 and 24 who are not in education, training or employment—a situation which points not only to a grave wastage of talent, but also to the possibility of serious social disruption. The authors in this work paint a picture of the enormous reservoir of human talent which exists in the country, but is not provided with the means to develop. *Responding to the Educational Needs of Post-School Youth* attempts not only to sketch the scope and extent of the current post-school educational crisis, but also to explore possible solutions through collaboration in the higher education sector. The findings reported here are a result of three distinctive but linked research components conducted by the Further Education and Training Institute (University of Western Cape), the Centre for Higher Education Transformation, and the Southern Africa Labour and Development Research Unit (university of Cape Town). The research was funded by the Ford Foundation and the project conducted in consultation with the Department of Education.

Higher Education Pathways - Ashwin, Paul 2018-12-14

In what ways does access to undergraduate education have a transformative impact on people and societies? What conditions are required for this impact to occur? What are the pathways from an undergraduate education to the public good, including inclusive economic development? These questions have particular resonance in the South African higher education context, which is attempting to tackle the challenges of widening access and improving completion rates in a system in which the segregations of the apartheid years are still apparent. Higher education is recognised in core legislation as having a distinctive and crucial role in building post-apartheid society. Undergraduate education is seen as central to addressing skills shortages in South Africa. It is also seen to yield significant social returns, including a consistent positive impact on societal institutions and the development of a range of capabilities that have public, as well as private, benefits. This book offers comprehensive contemporary evidence that allows for a fresh engagement with these pressing issues.

Student Retention & Graduate Destination - Moeketsi Letseka 2010

Student attrition has been a perennial theme in South African higher education throughout the decade. In its National Plan for Higher Education (2001), the Department of Education attributed high dropout rates primarily to financial and/or academic exclusions. Four years later, it reported that 30% of students

dropped out in their first year of study and a further 20% during their second and third years. Against this backdrop, the erstwhile research programme on Human Resources Development initiated a research project to investigate more thoroughly why students dropped out, what led them to persist in higher education to graduation, and what made for a successful transition to the labour market. The chapters in this volume address these issues in relation to one or more of seven institutional case studies conducted in 2005.

Wellbeing, Freedom and Social Justice - Ingrid Robeyns 2017-12-11

How do we evaluate ambiguous concepts such as wellbeing, freedom, and social justice? How do we develop policies that offer everyone the best chance to achieve what they want from life? The capability approach, a theoretical framework pioneered by the philosopher and economist Amartya Sen in the 1980s, has become an increasingly influential way to think about these issues. Wellbeing, Freedom and Social Justice: The Capability Approach Re-Examined is both an introduction to the capability approach and a thorough evaluation of the challenges and disputes that have engrossed the scholars who have developed it. Ingrid Robeyns offers her own illuminating and rigorously interdisciplinary interpretation, arguing that by appreciating the distinction between the general capability approach and more specific capability theories or applications we can create a powerful and flexible tool for use in a variety of academic disciplines and fields of policymaking. This book provides an original and comprehensive account that will appeal to scholars of the capability approach, new readers looking for an interdisciplinary introduction, and those interested in theories of justice, human rights, basic needs, and the human development approach.

Low-Income Students, Human Development and Higher Education in South Africa - Melanie Walker 2022-07-15

This book explores learning outcomes for low-income rural and township youth at five South African universities. The book is framed as a contribution to southern and Africa-centred scholarship, adapting Amartya Sen's capability approach and a framework of key concepts: capabilities, functionings, context, conversion factors, poverty and agency to investigate opportunities and obstacles to achieved student outcomes. This approach allows a reimagining of 'inclusive learning outcomes' to encompass the multi-dimensional value of a university education and a plurality of valued cognitive and non-cognitive outcomes for students from low-income backgrounds whose experiences are strongly shaped by hardship. Based on capability theorising and student voices, the book proposes for policy and practice a set of contextual higher education capability domains and corresponding functionings orientated to more justice and more equality for each person to have the opportunities to be and to do what they have reason to value. The book concludes that sufficient material resources are necessary to get into university and flourish while there; the benefits of a university education should be rich and multi-dimensional so that they can result in functionings in all areas of life as well as work and future study; the inequalities and exclusion of the labour market and pathways to further study must be addressed by wider economic and social policies for 'inclusive learning outcomes' to be meaningful; and that universities ought to be doing more to enable black working-class students to participate and succeed. *Low-Income Students, Human Development and Higher Education in South Africa* makes an original contribution to capability scholarship: conceptually in theorising a South-based multi-dimensional student well-being higher education matrix and a rich reconceptualisation of learning outcomes, as well as empirically by conducting rigorous, longitudinal in-depth mixed-methods research on students' lives and experiences in higher education in South Africa. The audience for the book includes higher education researchers, international capability scholars, practitioners and policy-makers.

Public Audit (Wales) Act 2004 - H. M. Government 2021-06-07

Public Audit (Wales) Act 2004, written by HM Government describes about an Act to confer further functions on the Auditor General for Wales; to make provision about the audit of accounts of public bodies in Wales and related matters.

How to Speak How to Listen - Mortimer J. Adler 1997-04-01

Practical information for learning how to speak and listen more effectively. With over half a million copies in print of his "living classic" *How to Read a Book* in print, intellectual, philosopher, and academic Mortimer J. Adler set out to write an accompanying volume on speaking and listening, offering the

impressive depth of knowledge and accessible panache that distinguished his first book. In *How to Speak How to Listen*, Adler explains the fundamental principles of communicating through speech, with sections on such specialized presentations as the sales talk, the lecture, and question-and-answer sessions and advice on effective listening and learning by discussion.

Secrets of a Financial Aid Pro - Jodi Okun 2016-05-24

How to successfully navigate each step of the financial aid process, including charts, smart tips, worksheets, and talking points to guide important conversations with their student. The book is written from the perspective of an insider passionate about opening educational opportunities for children, regardless of cost.

The Toxic Mix - Graeme Bloch 2009

"Shocking findings show that South African learners are consistently underachieving, counting not only amongst the worst in the world, but often amongst the worst in Africa. Education policy expert Graeme Bloch states that 60-80% of our schools are dysfunctional. They produce barely literate and numerate learners and Bloch believes the country is headed for a national education crisis. He identifies the toxic mix of factors that are causing this crisis, taking government and teachers to task for not performing as they should and highlighting the socio-economic challenges that many learners face. But Bloch doesn't leave it at that - he offers solutions to turn the situation around. He gives anecdotal evidence of several schools and individual teachers who are getting it right, leaving the reader with hope for the future. This book will speak to parents, teachers and anyone concerned about the future of the country. It is a powerful call to action"--Publisher's website.

Parental Involvement in Higher Education - Katherine Lynk Wartman 2008-05-02

Helicopter parents have become a recent phenomenon in higher education. Who are these parents and why have they landed on our college campuses? This monograph examines parental involvement in higher education by looking at the history of the relationship between students and institutions and institutional responses to this phenomenon. It explores alternative theoretical frameworks that highlight the benefits of strong parental relationships for today's college students, paying particular attention to the variables of gender, race, and socioeconomic class and how they inform the student-parent relationship. This text concludes with implications for practice and suggestions for policy so that all parents are included in our institutional efforts, not just the ones making all the noise. -- Back cover.

Your Guide to Case Study Research - Peter Rule 2011

Financing Higher Education in Africa - World Bank 2010-04-21

The training and development of human capital in Sub-Saharan Africa (SSA) will help countries in the region diversify their economies, carry out economic transformation, and support sustainable growth. Higher education plays a key role in training qualified individuals who will be able to implement new technologies and use innovative methods to establish cost-efficient and effective enterprises and institutions. However, in order for SSA to reap the benefits of this investment in human capital, higher education institutions must secure financing to provide quality training and sound professional prospects to their students. Currently, tertiary education development is unsustainable resources per student are declining and the quality of education is affected. These issues are particularly pressing in times of financial global crisis, when available resources for tertiary education tend to diminish. The impact of the crisis that started in 2008 provides a clear illustration of the need to explore innovative ways to diversify and secure financing for higher education in SSA. 'Financing Higher Education in Africa' provides a comprehensive overview of higher education financing in SSA. The book begins with an explanation of the fundamental problems faced by higher education institutions and students in SSA, namely the combined pressure of a rapid growth in demand and a growing scarcity of public resources, and it presents the dramatic consequences of these trends on quality. The book then turns to analyzing and comparing the current funding policies in SSA countries and it provides recommendations for improvement. Finally, the book examines the alternatives to the status quo and the policy tools needed to both diversify resources and allocate them based on performance. It will be of great interest to governments, universities, research institutions, and international organizations throughout the region.

New South African Review 6 - Devan Pillay 2018-01-29

Wide-ranging essays demonstrate how the consequences of inequality extend throughout society and the political economy. Despite the transition from apartheid to democracy, South Africa is the most unequal country in the world. Its extremes of wealth and poverty undermine intensifying struggles for a better life for all. The wide-ranging essays in this sixth volume of the New South African Review demonstrate how the consequences of inequality extend throughout society and the political economy, crippling the quest for social justice, polarising the politics, skewing economic outcomes and bringing devastating environmental consequences in their wake. Contributors survey the extent and consequences of inequality across fields as diverse as education, disability, agrarian reform, nuclear geography and small towns, and tackle some of the most difficult social, political and economic issues. How has the quest for greater equality affected progressive political discourse? How has inequality reproduced itself, despite best intentions in social policy, to the detriment of the poor and the historically disadvantaged? How have shifts in mining and the financialisation of the economy reshaped the contours of inequality? How does inequality reach into the daily social life of South Africans, and shape the way in which they interact? How does the extent and shape of inequality in South Africa compare with that of other major countries of the global South which themselves are notorious for their extremes of wealth and poverty? South African extremes of inequality reflect increasing inequality globally, and *The Crisis of Inequality* will speak to all those general readers, policy makers, researchers and students who are demanding a more equal world.

Special Needs Education - South Africa. Department of Education 2001

The Rise and Fall of the ANC Youth League - Rebone Tau 2020-08-01

What were the origins of the ANC Youth League, where has it gone wrong and how can it once again become an organisation that represents and supports South Africa's youth? For most of its existence, the ANC Youth League has played a powerful role in the politics of the ANC, and therefore of South Africa. In this book, Youth League member Rebone Tau tells the story of the league, from its formation in Soweto in 1944 to its banning, reconstitution and current standing, highlighting key incidents that led to the organisation's rise and fall. The book explores the radicalising role played by the league's early leaders, such as Nelson Mandela, Walter Sisulu and O.R. Tambo; the formation of the ANC Youth and Students Section in exile, first led by Thabo Mbeki; the return from exile in the 1990s and the leadership of Peter Mokaba; the controversies around the presidency of Julius Malema and his subsequent sacking; and the absence of Youth League leadership in the #FeesMustFall movement and current South African politics. Finally, the book considers the role that the Youth League could play in the future. Drawing on exclusive interviews with Youth League insiders, this is a fascinating glimpse into a vital and volatile institution in South African politics.

Mergers and Alliances in Higher Education - Adrian Curaj 2015-03-31

This volume casts light on mergers and alliances in higher education by examining developments of this type in different countries. It combines the direct experiences of those at the heart of such transformations, university leaders and senior officials responsible for higher education policy, with expert analysts of the systems concerned. Higher education in Europe faces a series of major challenges. The economic crisis has accelerated expectations of an increased role in addressing economic and societal challenges while at the same time putting pressure on available finances. Broader trends such as shifting student demographics and expectations, globalisation and mobility and new ways of working with business have contributed to these increased pressures. In the light of these trends there have been moves, both from national or regional agencies and from individual institutions to respond by combining resources, either through collaborative arrangements or more fundamentally through mergers between two or more universities. After an introductory chapter by the editors which establishes the context for mergers and alliances, the book falls into two main parts. Part 1 takes a national or regional perspective to give some sense of the historical context, the wider drivers and the importance of these developments in these cases. Included are both systemic accounts (for countries as France, Sweden, Romania, Russia, Wales and England), and specific cross-cutting initiatives including a major facility at Magurele in Romania and a Spanish programme for promoting international campuses of excellence. Part 2 is built from specific cases of

universities, either in mergers or alliances, with examples from different countries (such as France, UK, Romania, Spain, Germany, Denmark, Finland, Switzerland). A concluding chapter by the editors assesses these experiences and indicates the implications and future needs for understanding in this domain.

Victims of Crime Survey - Statistics South Africa 1998

Vocational Education and Training in Times of Economic Crisis - Matthias Pilz 2016-12-20

This book brings together a broad range of approaches and methodologies relevant to international comparative vocational education and training (VET). Revealing how youth in transition is affected by economic crises, it provides essential insights into the strengths and weaknesses of the various systems and prospects of VET in contexts ranging from North America to Europe, (e.g. Spain, Germany or the UK) to Asia (such as China, Thailand and India). Though each country examined in this volume is affected by the economic crisis in a different way, the effects are especially apparent for the young generation. In many countries the youth unemployment rate is still very high and the job perspectives for young people are often limited at best. The contributions in this volume demonstrate that VET alone cannot solve these problems, but can be used to support a smooth transition from school to work. If the quality of VET is high and the status and job expectations are good, VET can help to fill the skills gap, especially at the intermediate skill level. Furthermore, VET can also offer a realistic alternative to the university track for young people in many countries.

Accounting Info Systems - Steinbart Romney 1999-09

Comparative and International Education - C. C. Wolhuter 2019-08-26

This book explores the evolution and current state of the scholarly field of comparative and international education over 200 years of development. Experts in the field explore comparative and international education in each of the major world regions.

Career Construction Theory - Mark Savickas 2019-11

Academic textbook paper back Describes a theory of vocational behavior

Foresight - P. C. Kok 1999

Global Education Digest 2009 - Scientific United Nations Educational 2009

This 2009 edition presents a wide range of educational indicators to assess progress towards Education for All Millennium Development Goals. These cross-nationally comparable indicators also provide benchmarks for the performance of national education systems. The special of this 2009 global education digest is the analysis of emerging global trends in tertiary education, highlighting the rapid growth of tertiary education systems since 1970, changing patterns in tertiary education graduates by field of study, and in particular, the changing landscape of international student mobility.

Financial Literacy in Adult Life - Sandie Schagen 1996

Media Piracy in Emerging Economies - Joe Karaganis 2011

Higher Education in South Africa - Eli Bitzer 2009-10-01

Higher Education in South Africa should be of considerable interest to higher education researchers outside of South Africa, as well as within, for the general and comparative assessments it makes. The South African higher education researchers included within its covers have clearly engaged with research and writing from many parts of the world, which they have then applied to make sense of their own condition. - Malcolm Tight Lancaster University, UK

Twenty Years of Education Transformation in Gauteng 1994 to 2014 - Felix Maringe 2015-05-05

Twenty Years of Education Transformation in Gauteng 1994 to 2014: An Independent Review presents a collection of 15 important essays on different aspects of education in Gauteng since the advent of democracy in 1994. These essays talk to what a provincial education department does and how and why it does these things whether it be about policy, resourcing or implementing projects. Each essay is written by one or more specialist in the relevant focus area. The book is written to be accessible to the general reader

as well as being informative and an essential resource for the specialist reader. It sheds light on aspects of how a provincial department operates and why and with what consequences certain decisions have been made in education over the last 20 turbulent years, both nationally and provincially. There has been no attempt to fit the books chapters into a particular ideological or educational paradigm, and as a result the reader will find differing views on various aspects of the Gauteng Department of Educations present and past. We leave the reader to decide to what extent the GDE has fulfilled its educational mandate over the last 20 years.

Higher Education Financing in East and Southern Africa - Pundy Pillay 2010

This nine-country study of higher education financing in Africa includes three East African states (Kenya, Tanzania and Uganda), five countries in southern Africa (Botswana, Lesotho, Mozambique, Namibia and South Africa), and an Indian Ocean island state (Mauritius). Higher Education Financing in East and Southern Africa explores trends in financing policies, paying particular attention to the nature and extent of public sector funding of higher education, the growth of private financing (including both household financing and the growth of private higher education institutions) and the changing mix of financing instruments that these countries are developing in response to public sector financial constraints. This unique collection of African-country case studies draws attention to the remaining challenges around the financing of higher education in Africa, but also identifies good practices, lessons and common themes.

African Universities in the Twenty-first Century: Knowledge and society - Paul Tiyambe Zeleza 2004

As the twenty-first century unfolds, African universities, and indeed universities everywhere, are undergoing unprecedented change and confronting multiple challenges brought about by the vast and complex processes of globalisation and technological change. Powerful internal and external forces - political, pecuniary and paradigmatic - are reconfiguring all aspects of university life constituted around the triple mission of teaching, research and service. The need for redefining the role and defending the importance of universities has never been greater. How are African universities trying to balance the demands of autonomy and accountability, expansion and excellence, equity and efficiency, diversification and differentiation, internationalisation and indigenisation in the face of liberalisation and privatisation, and as they address the new challenges of knowledge production and dissemination, of Africanising global scholarship and globalising African scholarship? What innovative approaches can they adopt to facilitate the sustainable development of African economies, societies and polities? The two volumes in the Codesria Book Series address these issues. They articulate new values and missions for African universities, and define effective strategies to meet the challenges. Written by some of Africa's leading educators, Volume I examines the implications of the neo-liberal reforms and the new information technologies on African higher education, while Volume II interrogates the changing social dynamics of knowledge production, university organisation, and public service and engagement.

Planning, Implementing, and Assessing Micro-credentialing for Higher Education Institutions -

Julie Ann Steuber 2020

"This book explores the current research and practices of micro-credentials in higher education institutions"--

Using Evidence in Policy and Practice - Ian Goldman 2020-06-10

This book asks how governments in Africa can use evidence to improve their policies and programmes, and ultimately, to achieve positive change for their citizens. Looking at different evidence sources across a range of contexts, the book brings policy makers and researchers together to uncover what does and doesn't work and why. Case studies are drawn from five countries and the ECOWAS (west African) region, and a range of sectors from education, wildlife, sanitation, through to government procurement processes. The book is supported by a range of policy briefs and videos intended to be both practical and critically rigorous. It uses evidence sources such as evaluations, research synthesis and citizen engagement to show

how these cases succeeded in informing policy and practice. The voices of policy makers are key to the book, ensuring that the examples deployed are useful to practitioners and researchers alike. This innovative book will be perfect for policy makers, practitioners in government and civil society, and researchers and academics with an interest in how evidence can be used to support policy making in Africa. The Open Access version of this book, available at <https://doi.org/10.4324/9781003007043>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license

Faculty Perspectives on Vocational Training in South Africa - Eunice N. Ivala 2019-03-06

The Cape Peninsula University of Technology (CPUT) is one of four Universities of Technology established by the South African government in 2005 with a focus on vocational training. This book presents faculty experiences of CPUT's innovative, work-integrated learning and teaching model, as well as findings from practice-based research being done in the institution. The purpose of this volume is to be a resource for other institutions in South Africa that wish to try similar strategies, as well as a to trigger a community of practice with vocationally oriented institutions outside of South Africa.

Social Justice and Education in the 21st Century - Willie Pearson Jr. 2021-04-10

The world is not an equal place. There are high- and low-income countries and high- and low-income households. For each group, there are differential educational opportunities, leading to differential educational outcomes and differential labor market opportunities. This pattern often reproduces the privileges and inequalities of groups in a society. This book explores this differentiation in education from a social justice lens. Comparing the United States and South Africa, this book analyzes each country's developmental thinking on education, from human capital and human rights approaches, in both primary and higher education. The enclosed contributions draw from different disciplines including legal studies, sociology, psychology, computer science and public policy.

Student Politics in Africa - Luescher, Thierry M. 2016-05-12

The second volume of the African Higher Education Dynamics Series brings together the research of an international network of higher education scholars with interest in higher education and student politics in Africa. Most authors are early career academics who teach and conduct research in universities across the continent, and who came together for a research project and related workshops and a symposium on student representation in African higher education governance. The book includes theoretical chapters on student organising, student activism and representation; chapters on historical and current developments in student politics in Anglophone and Francophone Africa; and in-depth case studies on student representation and activism in a cross-section of universities and countries. The book provides a unique resource for academics, university leaders and student affairs professionals as well as student leaders and policy-makers in Africa and elsewhere.

South Africa Can Work - Frans Rautenbach 2017-08-18

What will it take to turn South Africa around? In this insightful and provocative book, Frans Rautenbach proposes a complete overhaul of policy thinking, and provides fresh arguments that effectively address South Africa's unemployment, race problems and lack of education. Rautenbach examines the fundamental problem of rent-seeking, to which he proposes two antidotes: the free market and decentralisation of government. Along the way he tackles holy cows such as affirmative action, trade unions, labour law and welfare payments. He also addresses contentious topics such as racism, white privilege, political correctness, state funding of higher education and mounting evidence that trade unions substantially suppress employment growth. Written by a labour lawyer with a proven track record in a range of policy issues, South Africa Can Work speaks effectively to a cross-section of readers of all disciplines, and brings sorely needed good news.

Race for Education - Mark Hunter 2019-01-24

An examination of families and schools in South Africa, revealing how the marketisation of schooling works to uphold the privilege of whiteness.
