**Survivor Kid** - Denise Long 2011-05-01

Anyone can get lost while camping or on a hike and Survivor Kid teaches young adventurers the survival skills they need if they ever find themselves lost or in a dangerous situation in the wild. Written by a search and rescue professional and lifelong camper, it's filled with safe and practical advice on building shelters and fires, signaling for help, finding water and food, dealing with dangerous animals, learning how to navigate, and avoiding injuries in the wilderness. Ten projects include building a simple brush shelter, using a reflective surface to start a fire, testing your navigation skills with a treasure hunt, and casting animal tracks to improve your observation skills.

**Conscripts and Deserters** - Alan I. Forrest 1989

Between the outbreak of war with Austria in 1792 and Napoleon's final debacle in 1814, France remained almost continuously at war, recruiting in the process some two to three million frenchmen--a level of recruitment unknown to previous generations and widely resented as an attack on the liberties of rural communities. Forrest challenges the notion of a nation heroically rushing to arms by examining the massive rates of desertion and avoidance of service as well as their consequences on French society--on military campaigns and the morale of armies, on political opinion at home, on the social fabric of local villages, and on the Napoleonic dream of bringing about a coherent and centralized state.

**Wonder Art Workshop** - Sally Haughey 2019-11-12

In Wonder Art Workshop, educator and educational development expert Sally Haughey shares her approach to hands-on, play-based learning with parents, teachers, and other facilitators, offering 25 activities that let your child take the lead in developing their own sense of intrinsic motivation to imagine, experiment, and discover. The author's wonder-based approach reflects and synthesizes several child-centered educational movements, including Reggio Emilia, Waldorf, and Montessori. Become a catalyst for cultivating your child's curious mind through these steps and activities, which start with art and apply to other subjects, including science and literacy: Take stock for your wonder journey with helpful guidance on

collecting materials, preparing a space, and nurturing the process while allowing children to make independent choices. Harness curiosity through a collection of sensory-based activities that use a variety of loose parts and other creative materials for open-ended play.

Encourage experimentation by unleashing your child's inner alchemist with "potion trays" they can use to mix color, create fizzing concoctions, make play dough, and more. Unlock literacy play with activities that inspire children to imagine and create their own characters, structures, and landscapes. Give your children the precious gifts of wonder and curiosity and help them become the best they can be with Wonder Art Workshop.

[The Marketing of Children's Toys](#) - Rebecca C. Hains 2021-04-13

This book offers rich critical perspectives on the marketing of a variety of toys, brands, and product categories. Topics include marketing undertaken by specific children's toy brands such as American Girl, Barbie, Disney, GoldieBlox, Fisher-Price, and LEGO, and marketing trends characterizing broader toy categories such as on-trend grotesque toys; toy firearms; minimalist toys; toyetics; toys meant to offer diverse representation; STEM toys; and unboxing videos. Toy marketing warrants a sustained scholarly critique because of toys' cultural significance and their roles in children's lives, as well as the industry's economic importance. Discourses surrounding toys—including who certain toys are meant for and what various toys and brands can signify about their owners' identities—have implications for our understandings of adults' expectations of children and of broader societal norms into which children are being socialized.

**The Social Media Reader** - Michael Mandiberg 2012-03

The first collection to address the collective transformation happening in response to the rise of social media. With the rise of web 2.0 and social media platforms taking over vast tracts of territory on the internet, the media landscape has shifted drastically in the past 20 years, transforming previously stable relationships between media creators and consumers. The Social Media Reader is the first collection to address the collective transformation with pieces on social media, peer production, copyright politics, and other aspects of contemporary internet culture from all the major thinkers in the field. Culling a broad range and incorporating different styles of scholarship from foundational pieces and published articles to unpublished pieces, journalistic accounts, personal narratives from blogs, and whitepapers, The Social Media Reader promises to be an essential text, with contributions from Lawrence Lessig, Henry Jenkins, Clay Shirky, Tim O'Reilly, Chris Anderson, Yochai Benkler, danah boyd, and Fred von Loehmann, to name a few. It covers a wide-ranging topical terrain, much like the internet itself, with particular emphasis on collaboration and sharing, the politics of social media and social networking, Free Culture and copyright politics, and labor and ownership. Theorizing new models of collaboration, identity, commerce, copyright, ownership, and labor, these essays outline possibilities for cultural democracy that arise when the formerly passive audience becomes active cultural creators, while warning of the dystopian potential of new forms of surveillance and control.

**Le Tumulte Noir** - Jody Blake 1999-01-01  
Jody Blake demonstrates in this book that although the impact of African-American music and dance in France was constant from 1900 to 1930, it was not unchanging. This was due in part to the stylistic development and diversity of African-American music and dance, from the prewar cakewalk and ragtime to the postwar Charleston and jazz. Successive groups of modernists, beginning with the Matisse and Picasso circle in the 1900s and concluding with the Surrealists and Purists in the 1920s, constructed different versions of la musique and la danse negre. Manifested in creative and critical works, these responses to African-American music and dance reflected the

*Learning Cities* - Sue Nichols 2018-03-29

This book is an interdisciplinary text exploring the learning and educative potentials of cities and their spaces, including urban and suburban contexts, at all stages of life. Drawing on the insights of researchers from diverse fields, such as education, architecture, history, visual sociology, applied linguistics and sensory studies, this collection of papers develops and demonstrates the connection between experience, in all its dimensions, and informal learning in the city. The chapters discuss various sensory domains of experience, considering visual, embodied, and even sexual dimensions in relation to what and how learning operates, and the contributors reflect on their learning and inquiring experiences in the city, with special reference to topics such as narrativity, 'race' and ethnicity, equity, urban literacy, re-generation, participation, representation and oral histories.

**The Organic Artist for Kids** - Nick Neddo 2020-02-11

Immersed in the natural world, The Organic Artist for Kids inspires creativity by connecting kids and their adults to our wilderness roots. In addition to offering a wide variety of fun, collaborative projects using nature as a source for art supplies and inspiration, this book also introduces the concepts of awareness and perception that are fundamental to the creative process. Children will be encouraged to learn new skills, build resilience, and be resourceful as part of an urgent struggle to prevent and undo Nature Deficit Disorder. Rooted in experimentation and an understanding that fun is fundamental to learning, kids will refine their drawing skills, as well as increase their appreciation for the visual arts and the natural landscape. Just some of the projects and skills covered include: Making pens and wild inks Making paint from stones and rocks Crafting your own paintbrushes Making simple stencils and rubbings The Organic Artist for Kids encourages you to return to the days when art was made with all-natural materials like charcoal and birch bark.

With the modifications detailed in this guide, your Nerf Blaster will not only perform better, but look cooler, too. The guide includes sci-fi, history-, and steampunk-inspired paint jobs. Every project comes with easy-to-follow instructions, which are completely illustrated with step-by-step studio photography; so you'll never get confused. So what are you waiting for? Transform your off-the-rack Nerf Blaster into something awesome!

**Tears of Rage** - John Walsh 2009-12-01

As the host of the immensely popular America's Most Wanted, John Walsh has been instrumental in the capture of nearly four hundred and fifty of this country's most dangerous fugitives. However, few know the full story of the personal tragedy behind his public crusade: the 1981 abduction and murder of his six-year-old son, Adam. Here, for the first time, Walsh, his wife Revé, and their closest friends tell the wrenching tale of Adam's death -- and the infuriating conspiracy of events that have kept America's No. 1 crime fighter from obtaining justice and closure for himself and his family.

"I've never really spoken about these things to anyone before, but I want to talk about Adam before he died. I want people to know just exactly how horrible it is to lose your child, how painful it is. But I also want to talk about how people can help you, and how you can help yourself. About how to come to terms with life when you think you're dying of a broken heart." - John Walsh "I remember thinking, 'our son's been murdered, and now we've got to be the ones to do something about it' It was a sad thing for this country that the fight had to be led by two broken-down parents of a murdered child. But we had to, because no one else was going to do it." -- Revé Walsh

**Paratextualizing Games** - Benjamin Beil 2021-11-30

Gaming no longer only takes place as a >closed interactive experience< in front of TV screens, but also as broadcast on streaming platforms or as cultural events in exhibition centers and e-sport arenas. The popularization of new technologies, forms of expression, and online services has had a considerable influence on the academic and journalistic discourse about games. This anthology examines which paratexts gaming cultures have produced - i.e., in which forms and formats and through which channels we talk (and write) about games - as well as the way in which paratexts influence the development of games. How is knowledge about games generated and shaped today and how do boundaries between (popular) criticism, journalism, and scholarship have started to blur? In short: How does the paratext change the text? *How to Rebuild Your Small-Block Chevy* - David Vizard 1991-06-18

**We Are Data** - John Cheney-Lippold 2017-05-02 What identity means in an algorithmic age: how it works, how our lives are controlled by it, and how we can resist it Algorithms are everywhere, organizing the near limitless data that exists in our world. Derived from our every search, like,

click, and purchase, algorithms determine the news we get, the ads we see, the information accessible to us and even who our friends are. These complex configurations not only form knowledge and social relationships in the digital and physical world, but also determine who we are and who we can be, both on and offline. Algorithms create and recreate us, using our data to assign and reassign our gender, race, sexuality, and citizenship status. They can recognize us as celebrities or mark us as terrorists. In this era of ubiquitous surveillance, contemporary data collection entails more than gathering information about us. Entities like Google, Facebook, and the NSA also decide what that information means, constructing our worlds and the identities we inhabit in the process. We have little control over who we algorithmically are. Our identities are made useful not for us—but for someone else. Through a series of entertaining and engaging examples, John Cheney-Lippold draws on the social constructions of identity to advance a new understanding of our algorithmic identities. *We Are Data* will educate and inspire readers who want to wrest back some freedom in our increasingly surveilled and algorithmically-constructed world.

*Collage Workshop for Kids* - Shannon Merenstein 2018-10-30

Be inspired and delighted by *Collage Workshop for Kids*, a colorful art instruction book on collage techniques for children—made in cooperation with The Eric Carle Museum of Picture Book Art. *Collage Workshop for Kids* pairs essays by educators from The Eric Carle Museum of Picture Book Art with instructions on collage technique.
