The Whipping Boy - Sid Fleischman 2003-04-15
A Prince and a Pauper Jemmy, once a poor boy living on the streets, now lives in a castle. As the whipping boy, he bears the punishment when Prince Brat misbehaves, for it is forbidden to spank, thrash, or whack the heir to the throne. The two boys have nothing in common and even less reason to like one another. But when they

find themselves taken hostage after running away, they are left with no choice but to trust each other.

Parenting Outside the Lines - Meghan Leahy
2022-02-08

No-nonsense, sanity-saving insights from the Washington Post on Parenting columnist--for anyone who's drowning in parental pressure and advice that doesn't work. Ever feel overwhelmed by the stress and perfectionism of our overparenting culture--and at the same time, still look for solutions to ease the struggles of everyday family life? Parenting coach and Washington Post columnist Meghan Leahy feels your pain. Like her clients and readers, she grew weary of the endless "shoulds" of modern parenting--along with the simplistic rules and advice that often hurt more than help. Filled with insights based on child development and hard-won lessons in the trenches, this honest guide presents a new approach, offering permission to practice imperfect parenting with a strong dose of common sense, empathy, and laughter. You'll gain perspective on trusting your

gut, picking your battles, and when to question what's "normal" (as opposed to what works best for your child). Forget impossible standards and dogma, and serving organic salmon to four-year-olds. Forget helicopters, tiger moms, and being "mindful" in the middle of a meltdown (your child's or your own). Instead, discover relatable insights for staying connected to your child and true to the parent you want to be (and already are).

Transforming the Workforce for Children Birth Through Age 8 - National Research Council 2015-07-23

Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and

competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and

learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

Uncle Dan's Report Card - Barbara C. Unell
2011-08-02

A Unique Approach to Teaching Children
Timeless Values The worth of the child cannot be measured in terms of "Per Cent" alone. The home life of the child is an important part of the whole life. The teacher's judgment will be a much better one if the home will kindly cooperate. Parents are asked to carefully consider and mark "Home Report" as indicated. -M. E. Pearson, Superintendent, Kansas City, Kansas, Public Schools, 1914 With the discovery of their Uncle Dan's school report card from 1914, in which a "Home Report" section of the card was to be completed by parents, Barbara and Robert Unell were inspired to explore the behaviors and values upon which students were "graded" in addition to the standard academic subjects. They realized that these surprising entries, ranging from acts of kindness and truthfulness to personal habits and reading for pleasure, were as timeless and relevant today as they were

almost a century ago. Uncle Dan's Report Card gives every parent and caregiver not only a reminder of the worth of these values and behaviors but also a practical means to encourage children to recognize and practice good habits. This book provides the positive, proven tools they can use with toddlers to teens to help them be successful and happy in their everyday lives, personally and academically.

Hands Free Life - Rachel Macy Stafford
2015-09-08

We all yearn to look back to find we lived a life of significance. But is it even possible anymore? Considering the amount of distraction and pressure that exists in society today, living a fulfilling life may seem like an unachievable dream. But it is not—not with the nine habits outlined in this book. New York Times bestselling author and widely known blogger, Rachel Macy Stafford, reveals nine habits that help you focus on investing in the most significant parts of your life. As your hands, heart, and eyes become open, you will experience a new sense of urgency—an urgency to live, love, dream, connect, create, forgive, and flourish despite the distractions of our culture. By following each daily Hands Free Declaration, you will be inspired to adopt mindful daily practices and new thought-processes that will help you:

- Make meaningful, lasting human connections despite the busyness of everyday life.
- Live in the now despite that inner nudge pushing you out of the moment toward

perfection and productivity.

- Protect your most sacred relationships, as well as your values, beliefs, health, and happiness, despite the latent dangers of technology and social media.
- Pursue the passions of your heart without sacrificing your job or your daily responsibilities.
- Evaluate your daily choices to insure you are investing in a life that matters to you. With a Hands Free Life perspective, you will have the power to look back and see you didn't just manage life, you actually lived it—and lived it well.

The Zones of Regulation - Leah M. Kuypers

2011

"... a curriculum geared toward helping students gain skills in consciously regulating their actions, which in turn leads to increased control and problem solving abilities. Using a cognitive behavior approach, the curriculum's learning activities are designed to help students recognize when they are in different states called "zones," with each of four zones represented by a different color. In the activities, students also learn how to use strategies or tools to stay in a zone or move from one to another. Students explore calming techniques, cognitive strategies, and sensory supports so they will have a toolbox of methods to use to move between zones. To deepen students' understanding of how to self-regulate, the lessons set out to teach students these skills: how to read others' facial expressions and recognize a broader range of emotions, perspective about how others see and react to their behavior, insight into events that trigger

their less regulated states, and when and how to use tools and problem solving skills. The curriculum's learning activities are presented in 18 lessons. To reinforce the concepts being taught, each lesson includes probing questions to discuss and instructions for one or more learning activities. Many lessons offer extension activities and ways to adapt the activity for individual student needs. The curriculum also includes worksheets, other handouts, and visuals to display and share. These can be photocopied from this book or printed from the accompanying CD."--Publisher's website.

I Wish My Teacher Knew - Kyle Schwartz
2016-07-12

One day, third-grade teacher Kyle Schwartz asked her students to fill-in-the-blank in this sentence: "I wish my teacher knew ____." The results astounded her. Some answers were humorous, others were heartbreaking-all were profoundly moving and enlightening. The results opened her eyes to the need for educators to

understand the unique realities their students face in order to create an open, safe and supportive place in the classroom. When Schwartz shared her experience online, #IWishMyTeacherKnew became an immediate worldwide viral phenomenon. Schwartz's book tells the story of #IWishMyTeacherKnew, including many students' emotional and insightful responses, and ultimately provides an invaluable guide for teachers, parents, and communities.

Shortlisted for the 2013 Nursery World Awards! Margaret Carr's seminal work on Learning Stories was first published by SAGE in 2001, and this widely acclaimed approach to assessment has since gained a huge international following. In this new full-colour book, the authors outline the philosophy behind Learning Stories and refer to the latest findings from the research projects they have led with teachers on learning dispositions and learning power, to argue that Learning Stories can construct learner identities in early childhood settings and schools. By making the connection between sociocultural approaches to pedagogy and assessment, and narrative inquiry, this book contextualizes Learning Stories as a philosophical approach to education, learning and pedagogy. Chapters explore how Learning Stories: - help make connections with families - support the inclusion of children and family voices - tell us stories about babies - allow children to dictate their own stories - can be used to revisit children's

learning journeys - can contribute to teaching and learning wisdom This ground-breaking book expands on the concept of Learning Stories and includes examples from practice in both New Zealand and the UK. It outlines the philosophy behind this pedagogical tool for documenting how learning identities are constructed and shows, through research evidence, why the early years is such a critical time in the formation of learning dispositions. Margaret Carr is a Professor of Education at the University of Waikato, New Zealand. Wendy Lee is Director of the Educational Leadership Project, New Zealand.

Strategies that Work - Stephanie Harvey 2017

In this new edition of their groundbreaking book *Strategies That Work*, Stephanie Harvey and Anne Goudvis share the work and thinking they've done since the second edition came out a decade ago and offer new perspectives on how to explicitly teach thinking strategies so that students become engaged, thoughtful, independent readers. Thirty new lessons and new and revised chapters shine a light on children's thinking, curiosity, and questions. Steph and Anne tackle close reading, close listening, text complexity, and critical thinking in a new chapter on building knowledge through thinking-intensive reading and learning. Other fully revised chapters focus on digital reading, strategies for integrating comprehension and

technology, and comprehension across the curriculum. The new edition is organized around three sections: Part I provides readers with a solid introduction to reading comprehension instruction, including the principles that guide practice, suggestions for text selection, and a review of recent research that underlies comprehension instruction. Part II contains lessons to put these principles into practice for all areas of reading comprehension. Part III shows you how to integrate comprehension instruction across the curriculum and the school day, particularly in science and social studies. Updated bibliographies, including the popular "Great Books for Teaching Content," are accessible online. Since the first publication of *Strategies That Work*, more than a million teachers have benefited from Steph and Anne's practical advice on creating classrooms that are incubators for deep thought. This third edition is a must-have resource for a generation of new teachers--and a welcome refresher for those

Funds of Knowledge - Norma Gonzalez 2006-04-21

The concept of "funds of knowledge" is based on a simple premise: people are competent and have knowledge, and their life experiences have given them that knowledge. The claim in this book is that first-hand research experiences with

*Downloaded from

families allow one to document this competence and knowledge, and that such engagement provides many possibilities for positive pedagogical actions. Drawing from both Vygotskian and neo-sociocultural perspectives in designing a methodology that views the everyday practices of language and action as constructing knowledge, the funds of knowledge approach facilitates a systematic and powerful way to represent communities in terms of the resources they possess and how to harness them for classroom teaching. This book accomplishes three objectives: It gives readers the basic methodology and techniques followed in the contributors' funds of knowledge research; it extends the boundaries of what these researchers have done; and it explores the applications to classroom practice that can result from teachers knowing the communities in which they work. In a time when national educational discourses focus on system reform and wholesale replicability across school sites,

this book offers a counter-perspective stating that instruction must be linked to students' lives, and that details of effective pedagogy should be linked to local histories and community contexts. This approach should not be confused with parent participation programs, although that is often a fortuitous consequence of the work described. It is also not an attempt to teach parents "how to do school" although that could certainly be an outcome if the parents so desired. Instead, the funds of knowledge approach attempts to accomplish something that may be even more challenging: to alter the perceptions of working-class or poor communities by viewing their households primarily in terms of their strengths and resources, their defining pedagogical characteristics. Funds of Knowledge: Theorizing Practices in Households, Communities, and Classrooms is a critically important volume for all teachers and teachers-to-be, and for researchers and graduate students of language,
