*The Writing Revolution* - Judith C. Hochman

2017-08-07

Why you need a writing revolution in your classroom and how to lead it The Writing Revolution (TWR) provides a clear method of instruction that you can use no matter what subject or grade level you teach. The model, also known as The Hochman Method, has demonstrated, over and over, that it can turn weak writers into strong communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback. Insurmountable as the challenges faced by many students may seem, The Writing Revolution can make a dramatic difference. And the method does more than improve writing skills. It also helps:

- Boost reading comprehension
- Improve organizational and study skills
- Enhance speaking abilities
- Develop analytical capabilities

The Writing Revolution is as much a method of teaching content as it is a method of teaching writing. There's no separate writing block and no separate writing

curriculum. Instead, teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction. But perhaps what's most revolutionary about the TWR method is that it takes the mystery out of learning to write well. It breaks the writing process down into manageable chunks and then has students practice the chunks they need, repeatedly, while also learning content.

**Lope de Vega: Fuente Ovejuna** - 1989-05  
Fuente Ovejuna (C.1613) is the most famous and frequently performed play by the creator of Spanish theatre, Lope de Vega (1562-1635). Astonishingly for its period, it celebrates the murder in 1476 of a nobleman, the Grand Commander of the Military Order of Calatrava, by the peasants he had oppressed, and their subsequent solidarity under torture. Fuente Ovejuna, however, is less a history lesson or political tract than an optimistic moral fable.

*Early Biliteracy Development* - Eurydice B. Bauer  
2012-05-22

A large and growing number of students from culturally and linguistically diverse backgrounds in the US and around the world have the potential to develop bilingualism and biliteracy if supported in their immediate environment. At the forefront in focusing exclusively on biliteracy development in early childhood across a variety

of languages, this book provides both findings from empirical research with young bilinguals in home and school contexts and practical applications of these findings. Each chapter is structured in a similar format to offer parallel descriptions of the research, including a brief review of related empirical studies, an overview of the methods for data collection and analysis, a description of the main findings, and specific pedagogical implications to support educators' efforts to construct meaningful, challenging, and dynamic literacy and language learning communities where one or more languages are used for communicating and learning. Pushing the field forward, this book is a valuable resource for helping literacy educators understand and respond to critical issues related to the development of young children's literate competencies in two languages in home and school contexts.

qualitative, of the change process at the two schools involved, including student language and achievement data for five years of program implementation that were used to test the basic two-way bilingual theory, the specific school interventions, and the particular classroom instructional practices. The contribution of *Becoming Biliterate: A Study of Two-Way Bilingual Immersion Education* is to provide a comprehensive description of contextual and instructional factors that might help or hinder the attainment of successful literacy and student outcomes in both languages. The study has broad theoretical, policy, and practical instructional relevance for the many other U.S. school districts with large student populations of non-native speakers of English. This volume is highly relevant for researchers, teacher educators, and graduate students in bilingual and ESL education, language policy, linguistics, and language education, and as a text for

master's- and doctoral-level classes in these areas.
