**Soil pollution: a hidden reality** - Food and Agriculture Organization of the United Nations 2018-04-30

This document presents key messages and the state-of-the-art of soil pollution, its implications on food safety and human health. It aims to set the basis for further discussion during the forthcoming Global Symposium on Soil Pollution (GSOP18), to be held at FAO HQ from May 2nd to 4th 2018. The publication has been reviewed by the Intergovernmental Technical Panel on Soil (ITPS) and contributing authors. It addresses scientific evidences on soil pollution and highlights the need to assess the extent of soil pollution globally in order to achieve food safety and sustainable development. This is linked to FAO's strategic objectives, especially SO1, SO2, SO4 and SO5 because of the crucial role of soils to ensure effective nutrient cycling to produce nutritious and safe food, reduce atmospheric CO<sub>2</sub> and N<sub>2</sub>O concentrations and thus mitigate climate change, develop sustainable soil management practices that enhance agricultural resilience to extreme climate events by reducing soil degradation processes. This document will be a reference material for those interested in learning more about sources and effects of soil pollution.

**The Cop and the Anthem** - O. Henry 2020-08-26

While some try to get out of prison, Soapy, the only character in O. Henry's short story, tries to get into it. Soapy is a homeless guy who prefers the warm cell to the cold night under the New York sky. He does everything he can think of in order to draw the attention of the police. However without any success. Until he hears a magical organ anthem. How will this story develop? Will Soapy manage to get into jail or he will find another way to sort out his life? "The Cop and the Anthem" is a comical short story with a touch of irony which emphatically presents the lower class and the obstacles man has to face. William Sidney Porter (1862-1919), known simply as O. Henry, was a prolific American author of humorous literary pieces. His fame came exceptionally quickly and he became a bestselling author of short story collections, among the most famous being "Cabbages and Kings", "The Voice of the City", and "Strictly Business." As a result of the outstanding literature legacy that O. Henry left behind, there is an American annual award after his name, given to exceptional short stories.

*Cell Organelles* - Reinhold G. Herrmann 2012-12-06

The compartmentation of genetic information is a fundamental feature of the eukaryotic cell. The metabolic capacity of a eukaryotic (plant) cell and the steps leading to it are overwhelmingly an endeavour of a joint genetic cooperation between nucleus/cytosol, plastids, and mitochondria. Alter ation of the genetic material in anyone of these compartments or exchange of organelles between species can seriously affect harmoniously balanced growth of an organism. Although the biological significance of this genetic design has been vividly evident since the discovery of non-Mendelian inheritance by Baur and Correns at the beginning of this century, and became indisputable in principle after Renner's work on interspecific nuclear/plastid hybrids (summarized in his classical article in 1934), studies on the genetics of organelles have long suffered from the lack of respectabil ity. Non-Mendelian inheritance was considered a research sideline~ifnot a freak~by most geneticists, which becomes evident when one consults common textbooks. For instance, these have usually impeccable accounts of photosynthetic and respiratory energy conversion in chloroplasts and mitochondria, of metabolism and global circulation of the biological key elements C, N, and S, as well as of the organization, maintenance, and function of nuclear genetic information. In contrast, the heredity and molecular biology of organelles are generally treated as an adjunct, and neither goes as far as to describe the impact of the integrated genetic system.

**Not Very Far** - Jinnat Saberlin

Fate- the most fluctuating element of life. At times, it dissembles to be your best friend, your helping hand, your guardian. But the moment you trust it, it shatters you and your trust into pieces. It breaks you, builds you up, so that it can break you again. Fate binds the two budding teenagers- Ashik and Sakshi. This pair of complete strangers belonging to two different corners of India seems to share an innumerable number of surprising similarities. It went from having the same letters in their

names to having similar hobbies. The similarities never ceased to amaze them both. Back at the time, when Facebook and Orkut weren't the 'basic needs' of the teens, there were those ridiculous chat rooms on channel [V]. Those that appear at the bottom of your TV screen. That's where they talked for the first time. Who knew a real relationship would take birth there? Who knew they'd even fall in love? That's fate! But the age was wrong- and the distance was long. Mistakes were inevitable and trust was easy to lose. Ashik makes a mistake. A mistake so bad that Sakshi finds it hard to ever trust him again. She leaves. They say you realise you love someone when you let them go- That's what happened to Ashik, too. Determined he would bring her back to his life, he heads off to Hyderabad from Assam, resisting all sorts of parental oppositions to study BBA- a course he was never interested in. Sakshi's decisions were mostly governed by her emotions and not on logic. As a result of which she's either very right or very wrong. Their relationship blooms, yet again. But too much of dependency and an uncertain career isn't a very pretty condition for a relationship.
