Historically, what do you see as the relationship between science and religion or mysticism? In college, I had a wonderful professor who taught a class on these subjects. To kick off the class, he asked us, 'How do you know what you think you know?' I've spent the last quarter century trying to answer that question. Because the world is a mysterious place and our relationship to it is not always clear, people have often turned to science, faith, and magic for answers. They help people find responses to the questions of, who am I and why am I here? Diana is an appealing heroine, determined, accomplished, and yet aware of her own weaknesses. In what ways, if any, does Diana reflect your own experience or personality? There are some similarities - Diana is also a historian of science, also interested in the history of alchemy, and shares some of my passions (including television cooking programs, tea, and rowing). Really, all the characters have

some element of me in them. I think that's how authors create imaginary people who nevertheless feel real. The rest of Diana's character comes from a combination of qualities I admire in others, wish fulfilment, and my completion of the following statement: 'Wouldn't it be great if a heroine in a book was . . . The Prophet's Wife - Libbie Grant 2022-03-01

A sweeping, lyrical tale of historical fiction that tells the unbelievable story of the early days of the Mormon church through the eyes of the woman who saw it all—Emma, the first wife of the prophet Joseph Smith. In 1825, in rural Pennsylvania, Emma Hale marries an itinerant treasure-digger, a man who has nothing but a peep-stone in his pocket and a conviction that he can speak directly to God. His name is Joseph Smith and in a few short years, he will found his own religion, gather zealous adherents by the tens of thousands, and fracture Emma's life and faith While the Mormon religion finds its feet and runs beyond the grasp of its founder, Emma struggles to maintain her place in Joseph's heart—and in the religion that has become her world. The Mormons make themselves outcasts everywhere they go. Joseph can only maintain his authority by issuing ever-stranger commandments on God's behalf, culminating in an edict that men should marry as many women as they please. The Mormons' adoption of polygamy only sets them further apart, and soon their communities are ravaged by violence at the hands of their outraged fellow Americans. For Emma, things take a more personal toll as Joseph brings in a new wife—a woman whom Emma considers a sister. As Emma's family grows along with Joseph's infamy, she knows there will never be peace until Joseph faces the law. But on the half-wild edge of the frontier, he's more likely to find death at the hands of a vigilante posse than a fair trial. For the sake of her people—and her soul—Emma must convince the Prophet of God to surrender... and perhaps to sacrifice his life.

Shadow of Night - Deborah Harkness 2020-11-26

The Jewel House - Deborah E. Harkness 2007-10-24

The #1 New York Times–bestselling author of *A Discovery of Witches* examines the real-life history of the scientific community of Elizabethan London. Travel to the streets, shops, back alleys, and gardens of Elizabethan London, where a boisterous and diverse group of men and women shared a keen interest in the study of nature. These assorted merchants, gardeners, barber-surgeons, midwives, instrument makers, mathematics teachers, engineers, alchemists, and other experimenters formed a patchwork scientific community whose practices set the stage for the Scientific Revolution. While Francis Bacon has been widely regarded as the father of modern science, scores of his London contemporaries also deserve a share in this distinction. It was their collaborative, yet often contentious, ethos that helped to develop the ideals of modern scientific research. The book examines six particularly fascinating episodes of scientific inquiry and dispute in sixteenth-century London, bringing to life the individuals involved and the challenges they faced. These men and women experimented and invented, argued and competed, waged wars in the press, and struggled to understand the complexities of the natural world. Together their stories illuminate the blind alleys and surprising twists and turns taken as medieval philosophy gave way to the empirical, experimental culture that became a hallmark of the Scientific Revolution. “Elegant and erudite.” —Anthony Grafton, *American Scientist* “A truly wonderful book, deeply researched, full of original material, and

exhilarating to read.” —John Carey, *Sunday Times* “Widely accessible.” —Ian Archer, *Oxford University* “Vivid, compelling, and panoramic, this revelatory work will force us to revise everything we thought we knew about Renaissance science.” —Adrian Johns, author of *The Nature Book*

The extraordinary find leads to even more disturbing puzzles. The red-haired girl is not the only enigma in this remote corner of Galway. Two years earlier, Mina Osborne, the wife of a local landowner, went for a walk with her young son and vanished without a trace. Could they, too, be hidden in the bog's treacherous depths, only to be discovered centuries from now? Or did Hugh Osborne murder his family, as some villagers suspect? Bracklyn House, Osborne's stately home, holds many secrets, and Nora and Cormac's inquiries threaten to expose them all.
