Government in the Federal Republic of Germany - Nevil Johnson 2013-10-22

Government in the Federal Republic of Germany: The Executive at Work focuses on the government in the Federal Republic of Germany as an executive activity, as well as the institutional framework for the overall control and direction of public action. The effects of the decentralized structure of government on the behavior and relationships of political parties are also explored. This book is comprised of eight chapters and begins with a discussion on past institutional structures and procedures that have shaped particular ideas about law, politics, and government in West Germany, including the retention of a federal structure of government, constitutionalism, and the Rechtsstaat. The following chapters deal with the political framework of the Federal Republic of Germany; federal executive leadership; the federal administrative system; and federalism and decentralization in West German government. The bureaucracy, the problem of how to control the exercise of governmental powers, and the challenge of expanding government in West Germany are also considered. This monograph will be of interest to political scientists, politicians, government officials, and students of government and politics.

All Souls' Day - Cees Nooteboom 2011-07-22

Arthur Daane, a documentary film-maker and inveterate globetrotter, has lost his wife and child in a plane crash. In ALL SOULS' DAY we follow Arthur as he wanders the streets of Berlin, a city uniquely shaped by

history. Berlin provides the backdrop for Daane's reflections on life as he plans his latest project - a self-funded film that will show the world through Daane's eyes. With a new circle of friends - a philosopher, a sculptor and a physicist - Arthur discusses everything from history to metaphysics, and the cumulative power of remembered images and philosophical musings on the meaning of our contemporary existence comes to permeate the atmosphere of the book. Then one cold, wintry day, Daane meets the young history student Elik Orange and his world is turned upside down. Whenever this mysterious woman beckons, Daane is compelled to follow. *ALL SOULS' DAY* is, finally, an elegiac love story in which the personal histories of the characters are skilfully interwoven with the history of the countries in which they find themselves. It is also the poignant and affecting tale of a man coming to terms with his place in the world. 'Nooteboom is one of the great modern novelists' A.S. Peaks of Europe - Johan Lolos 2018-07

'Peaks of Europe' is not a traditional landscape photography book. It's the result of a 5-month adventure across 17 countries told through the lens of a European travel photographer who took 29 years to finally explore the continent on which in he was born. The book has been designed for a specific purpose: telling the story of a 5-month road trip and what it takes to be living out of a car for several months, with all the good and bad moments. For this project, Johan Lolos wasn't just documenting the landscapes. This book features a series of photos with a focus on the storytelling as much as the imagery. At the end, the people he met were what he remembered most.

Mems - Dirk Zielke 2021-05

MEMS, 2nd Edition, 2021, Black and White Print The field of Microsystems is a rapidly evolving topic. This is due to the increasing quantities of micro-sensors through their integration into smartphones and their manifold use in cars, as well as through the use of these sensors in new areas, such as medical technology. With the present textbook as a tool, the reader will be able to get to know the state of the

art in this field, and to use successfully Microsystems in various applications. The following textbook is based on the lecture module "Microsystems," which is held at University of Applied Sciences Bielefeld in the 6th semester of the bachelor course electrical engineering. The lecture module includes a practical course, which deals with the structure and the characterization of an acceleration sensor module. The instructions for this course are attached at the end of the book. During the continuous use of the book for teaching at the University of Applied Sciences Bielefeld, a revision became necessary after 5 years. This is reflected first of all in a large number of new sensors from the various manufacturers and thus with significantly improved parameters. But also in terms of technology and design a lot has happened in recent years. In the 2nd edition of the book, therefore, all overviews were therefore updated and new trends added. In addition, the book has been expanded to include MEMS actuators and RF MEMS. This book is translated from the original German "Mikrosysteme". The title of the book has been changed to "MEMS" for the 2nd edition, as this better describes the content of the book for the English-speaking world.

Mathilde Franziska Anneke (1817-1884) - Susan L. Piepke 2006

One of the forgotten nineteenth-century women writers, Mathilde Franziska Anneke (1817-1884) was a political activist, writer, and educator who experienced exciting historical times in both Germany and the United States (Wisconsin). Writing on the eve of the German Revolution of 1848, she founded a short-lived revolutionary newspaper and even rode into battle. Later, in exile in the United States, she used her journalistic and oratory skills in support of the women's suffrage and anti-slavery movements. This book is an excellent supplemental reading for women's studies and history classes as well as German literature in translation.

The Pininfarina Book - Günther Raupp 2015-03

What is innovation? The dictionary defines it as "renewal through the use of new processes and technologies." In advertising, everything is an innovation. But what is truly innovative? Since 1930, the Pininfarina design firm of Turin, Italy, has been answering that question. This is where the Cistalia 202 was developed, the first vehicle to be added to MoMA's permanent collection. The list goes on: the interior of the new stadium for Juventus Turin, the Nash Healey Spider seen in Billy Wilder's Sabrina, and the legendary Ferrari Dino 246 and Ferrari Testarossa.

However, Pininfarina is not resting on its laurels, but blasting full speed ahead into the future with an expanded portfolio while honoring its heritage. Whether it's a solution for sustainable mobility, interior designs, or household gadgets, all Pininfarina projects bear an unmistakable signature. To visually celebrate the history and influence of Pininfarina, there is no one better suited than a man who has made his

own unmistakable mark on automotive photography. Gunther Raupp has spent 30 years photographing cars for Ferrari's official calendars, which enjoy a cult following among the experts. He has two successful books with teNeues, the most recent being The Ferrari Book. As a star photographer and connoisseur of industrial design, Raupp showcases a company that embodies true Italianità.

The Timbuktu School for Nomads - Nicholas Jubber 2016-11-15

The Sahara: a dream-like, far away landscape of Lawrence of Arabia and Wilfred Thesiger, The English Patient and Star Wars, and home to nomadic communities whose ways of life stretch back millennia. Today it's a teeth-janglingly dangerous destination, where the threat of jihadists lurks just over the horizon. Following in the footsteps of 16th century traveller Leo Africanus, Nicholas Jubber went on a turbulent adventure to the forgotten places of North Africa and the legendary Timbuktu. Once the seat of African civilization and home to the richest man who ever lived, this mythic city is now scarred by terrorist occupation and is so remote its own inhabitants hail you with the greeting, 'Welcome to the middle of nowhere'. From the cattle markets of the Atlas, across the Western Sahara and up the Niger river, Nicholas joins the camps of the Tuareg, Fulani, Berbers, and other communities, to learn about their craft, their values and their place in the world. The Timbuktu School for Nomads is a unique look at a resilient city and how the nomads pit ancient ways of life against the challenges of the 21st century.
