WRITTEN VOICES SPOKEN SIGNS - Egbert J Bakker
2009-06-30

Written Voices, Spoken Signs is a stimulating introduction to new perspectives on Homer and other traditional epics. Taking advantage of recent research on language and social exchange, the nine essays in this volume focus on performance and audience reception of oral poetry. These innovative essays by leading scholars of Homer, oral poetics, and epic invite us to rethink some key concepts for an understanding of traditional epic poetry. Egbert Bakker examines the epic performer's use of time and tense in recounting a past that is alive.

Tackling the question of full-length performance of the monumental Iliad, Andrew Ford considers the extent to which the work was perceived as a coherent whole in the archaic age. John Miles Foley addresses questions about spoken signs and the process of reference in epic discourse, and Ahuvia Kahane studies rhythm as a semantic factor in the Homeric performance. Richard Martin suggests a new range of performance functions for the Homeric simile. And Gregory Nagy establishes the importance of one feature of epic language, the ellipsis. These six essays centered on Homer engage with fundamental issues that are addressed by three essays primarily concerned with medieval epic: those by Franz BÃuml on the concept of fact; by Wulf Oesterreicher on types of orality; and by Ursula Schaefer on written and spoken media. In their Introduction the editors highlight the underlying approach and viewpoints of this collaborative volume.

Reviews of this book: "Despite its wide range of topics and approaches, the volume has a clear thematic focus. All contributors seek to leave behind the more formal concerns of past generations of scholars and aim instead at an understanding of orality as that which is (conceptually or actually) close, immediate, or performed. In their joint search for the new picture, classicists, linguists, and medievalists discover a range of different 'oralities'." DD--J. Haubold, *Classical Review*

The Cars That Henry Ford Built - Beverly Rae Kimes
2005-08-21

At the time, in 1978, when *The Cars That Henry Ford Built* was first published, sending a copy for Henry Ford II to review seemed a vain request. Automobile Quarterly founding editor and publisher L. Scott Bailey was told that Mr. Ford (never comments on a book written about Ford. ÷ Two

weeks later came an unexpected exhortation from Henry Ford II: (My grandfather would have loved this book. ÷ Ford then specially ordered 20 copies bound in white leather-needed in two weeks. The rush order was necessitated by an upcoming trip to Japan. As is culturally customary to offer a gift that honors one's ancestors, Henry Ford II specifically chose The Cars That Henry Ford Built to give to his Japanese hosts. Such high-level praise is derived from the book's fresh approach to the subject of Henry Ford, both in its study of the man and his cars, as well as the exceptional pictorial presentation. Presented for the first time in full color, there is every model Henry Ford produced from the Quadricycle he put together as a young man in 1896 to the famous V8 Ford on the production lines four and a half decades later during his failing years. Probably no other individual in automobile history more accurately mirrored in his cars his view of himself and of America as he

saw it. Join award-winning historian and author Beverly Rae Kimes as she presents lively historical text that captures Henry growing and aging as his cars grew and aged, each lock-stepped together through history. Over 100 full-color photographs further bring the man and his creations to life.

Insider Outsider - Bryan Loritts 2018-10-02
Pastor Bryan Loritts dives deep into what it's like to be a person of color in predominantly white evangelical spaces today and where we can go from here. God boldly proclaims throughout the book of Acts that there is no "ethnic home team" when it comes to Christianity. But the minority experience in America today--and throughout history--too often tells a different story. As Loritts writes, "It is impossible to do theology devoid of cultural lenses and expressions. Like an American unaware of their own accent,

most whites are unaware of the ethnic theological accent they carry." Insider Outsider bears witness to the true stories that often go untold--stories that will startle, enlighten, and herald a brighter way forward for all seeking belonging in the family of God. This seminal book on race and the church will help Christians discover: How they can learn the art of listening to stories unlike their own Identify the problems and pitfalls that keep Sunday morning the most segregated hour of the week And participate in an active movement with God toward a holy vision of what Dietrich Bonhoeffer calls "life together" Drawing on insightful snapshots through history, eye-opening personal experiences, and biblical exposition, Loritts awakens both our minds and hearts to the painful reality of racial divides as well as the hope of forgiveness.

This book provides algorithms and ideas for computationalists. Subjects treated include low-level algorithms, bit wizardry, combinatorial generation, fast transforms like the Fourier transform, and fast arithmetic for both real numbers and finite fields. Various optimization techniques are described and the actual performance of many given implementations is examined. The focus is on material that does not usually appear in textbooks on algorithms. The implementations are done in C++ and the GP language,

written for POSIX-compliant platforms such as the Linux and BSD operating systems. *Spelling, Grade 2* - Spectrum 2012-09-01

- Thushan Ganegedara

2018-05-31

Write modern natural language processing applications using deep learning algorithms and TensorFlow Key Features Focuses on more efficient natural language processing using TensorFlow Covers NLP as a field in its own right to improve understanding for choosing TensorFlow tools and other deep learning approaches Provides choices for how to process and evaluate large unstructured text datasets Learn to apply the TensorFlow toolbox to specific tasks in the most interesting field in artificial intelligence Book Description Natural language processing (NLP) supplies the majority of data available to deep learning applications, while TensorFlow is the most important deep learning framework currently available. Natural Language Processing with TensorFlow brings TensorFlow and NLP together to give you invaluable tools to work with the immense volume of unstructured data in today's data streams, and apply these tools to specific NLP tasks. Thushan Ganegedara

starts by giving you a grounding in NLP and TensorFlow basics. You'll then learn how to use Word2vec, including advanced extensions, to create word embeddings that turn sequences of words into vectors accessible to deep learning algorithms. Chapters on classical deep learning algorithms, like convolutional neural networks (CNN) and recurrent neural networks (RNN), demonstrate important NLP tasks as sentence classification and language generation. You will learn how to apply high-performance RNN models, like long short-term memory (LSTM) cells, to NLP tasks. You will also explore neural machine translation and implement a neural machine translator. After reading this book, you will gain an understanding of NLP and you'll have the skills to apply TensorFlow in deep learning NLP applications, and how to perform specific NLP tasks. Colossians - John Paul Heil
2010

This book investigates Colossians as a "captivity" letter from the primary implied author, the imprisoned Paul, to an implied audience of mainly Gentile converts currently in danger of influence by local Jews or Jewish Christians. Utilizing a text-centered, literary-rhetorical, and audience-oriented method, it demonstrates new chiasmic structures for the entire letter that progressively encourage the audience to resist deceit and conduct themselves according to all the wisdom at their disposal as holy ones in Christ.
