Edible Insects - Arnold van Huis 2013

Edible insects have always been a part of human

diets, but in some societies there remains a degree of disdain and disgust for their consumption. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at

a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.

Hungry for Peace - Keith McHenry 2013-03-01

The de facto how-to manual of the international Food Not Bombs movement, which provides free food to the homeless and hungry and has branches in countries on every continent except Antarctica, this book describes at length how to set up and operate a Food Not Bombs chapter. The guide considers every aspect of the operation, from food collection and distribution to fund-raising, consensus decision making, and what to do when the police arrive. It contains

detailed information on setting up a kitchen and cooking for large groups as well as a variety of delicious recipes. Accompanying numerous photographs is a lengthy section on the history of Food Not Bombs, with stories of the jailing and murder of activists, as well as premade handbills and flyers ready for photocopying.

The State of the World's Land and Water Resources for Food and Agriculture - Food and Agriculture Organization of the United Nations 2013-06-17

The State of the World's Land and Water Resources for Food and Agriculture is FAO's first flagship publication on the global status of land and water resources. It is an 'advocacy' report, to be published every three to five years, and targeted at senior level decision makers in

agriculture as well as in other sectors. SOLAW is aimed at sensitizing its target audience on the status of land resources at global and regional levels and FAO's viewpoint on appropriate recommendations for policy formulation. SOLAW focuses on these key dimensions of analysis: (i) quantity, quality of land and water resources, (ii) the rate of use and sustainable management of these resources in the context of relevant socio-economic driving factors and concerns, including food security and poverty, and climate change. This is the first time that a global, baseline status report on land and water resources has been made. It is based on several global spatial databases (e.g. land suitability for agriculture, land use and management, land and water degradation and depletion) for which FAO is the world-recognized data source. Topical and emerging issues on land and water are dealt with in an integrated rather than sectoral manner. The implications of the status and trends are used to advocate remedial

interventions which are tailored to major farming systems within different geographic regions.

Cultural Perspectives, Geopolitics & Energy Security of Eurasia - Mahir Ibrahimov

2017-04-16

This anthology provides insight and observations on the importance of the Eurasia region, including Russia and other countries of the former USSR. The articles that make up this work provide a detailed description of regional realities, including a contextual discussion of the current Ukraine situation, viewed through the prism of Russia's traditional military-strategic culture. As with all countries in the Eurasian region, Russia's traditional strategic interests play a critical role in the geopolitical and socio-cultural situation in that region. The anthology was created for the Army University Press, but goes beyond the obvious military strategic nexus and seeks to identify new spaces for consideration by planners and policymakers

Mechanization for Rural Development - Josef Kienzle 2013

This publication gives a wide-ranging perspective on the present state of mechanization in the developing world, and, as such, constitutes a solid platform on which to build strategies for a sustainable future. Farm mechanization forms an integral plank in the implementation of sustainable crop production intensification methodologies and sustainable intensification necessarily means that the protection of natural resources and the production of ecosystem services go hand-in-hand with intensified production practices. This requires specific mechanization measures to allow crops to be established with minimum soil

Global Trends 2030 - National Intelligence Council (U.S.) 2012

This report is intended to stimulate thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories over the next 15 years. As with the NIC's previous Global Trends reports, we do not seek to predict the future, which would be an impossible feat, but instead provide

a framework for thinking about possible futures and their implications. In-depth research, detailed modeling and a variety of analytical tools drawn from public, private and academic sources were employed in the production of Global Trends 2030. NIC leadership engaged with experts in nearly 20 countries, from think tanks, banks, government offices and business groups, to solicit reviews of the report.

[Gender Politics at Home and Abroad](#) - Hyaeweol Choi 2020-07-30

Hyaeweol Choi examines the formation of modern gender relations in Korea from a transnational perspective. Diverging from a conventional understanding of 'secularization' as a defining feature of modernity, Choi argues that Protestant Christianity, introduced to Korea in the late nineteenth century, was crucial in shaping modern gender ideology, reforming domestic practices and claiming new space for women in the public sphere. In Korea, Japanese colonial power - and with it, Japanese

representations of modernity - was confronted with the dominant cultural and material power of Europe and the US, which was reflected in Korean attitudes. One of the key agents in conveying ideas of “Western modernity” in Korea was globally connected Christianity, especially US-led Protestant missionary organizations. By placing gender and religion at the center of the analysis, Choi shows that the development of modern gender relations was rooted in the transnational experience of Koreans and not in a simple nexus of the colonizer and the colonized.

Compact Utility Tractors - Dennis David
2013-06-01

Compact Utility Tractors, or CUTs, are cute little
cutters! As farming became more refined so did
the needs of tractors. The answer was a smaller,
more maneuverable and fuel-efficient tractor
with a variety of implements and attachments.

With this focus on special needs, attachments
became available such as plows, disc harrows,
mower decks, cultivators, spreaders,
snowblowers, and more. They have become a
necessary utility for farmers, orchards, small
construction jobs, and landscaping/maintenance
for estates, parks and golf courses. At the
forefront of this evolution was the Farmall Cub
and John Deere Model L. Then came the
Japanese invasion; a new kind of tractor by
companies such as Yanmar and Kubota. These
four-wheel drive machines were rugged and
tough and used a variety of hydraulically
powered attachments. American companies like
John Deere, International Harvester, and Massey
Ferguson built their own their own four-wheel
versions. Today's compact tractors, such as the
Kubota BX series, Massey Ferguson's GC series,
and the John Deere 3000, offer an even larger
selection of implements for special purposes.

2003-04-22

Trends such as shifting dietary patterns and an increasingly sedentary lifestyle combined with smoking and alcohol consumption are major risk factors for noncommunicable chronic diseases such as obesity, diabetes, cardiovascular diseases such as hypertension and stroke, cancer dental diseases and osteoporosis. This report reviews the scientific evidence on the effects of diet, nutrition and physical activity on chronic diseases and makes recommendations for public health policies and programmes. Issues considered include the macro-economic implications of public health on agriculture and the global supply and demand for fresh and processed foods.

One of the greatest challenges today is to end

hunger and poverty while making agriculture and food systems sustainable. The challenge is daunting because of continued population growth, profound changes in food demand, and the threat of mass migration of rural youth in search of a better life. This report presents strategies that can leverage the potential of food systems to become the engine of inclusive economic development and rural prosperity in low-income countries. It analyses the structural and rural transformations now under way, and examines the opportunities and challenges they present to millions of small-scale food producers. It shows how an “agroterritorial” planning approach, focused on connecting cities and towns and their surrounding rural areas, combined with agro-industrial and infrastructure development can generate income opportunities throughout the food sector and underpin sustainable and inclusive rural transformation.

Global Trends 2030 - Office of the Director of National Intelligence Council 2017-03-11

This publication covers global megatrends for the next 20 years and how they will affect the United States. This is the fifth installment in the National Intelligence Council's series aimed at providing a framework for thinking about possible futures and their implications. The report is intended to stimulate strategic thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories during the next 15-20 years by identifying critical trends and potential discontinuities. The authors distinguish between megatrends, those factors that will likely occur under any scenario, and game-changers, critical variables whose trajectories are far less certain. NIC 2012-001. Several innovations are included in Global Trends 2030, including: a review of the four previous Global Trends reports, input from academic and other experts around the world, coverage of disruptive technologies, and a

chapter on the potential trajectories for the US role in the international system and the possible the impact on future international relations.
