ERP Systems and Organisational Change - Bernard Grabot 2008-04-16 ERP (Enterprise Resource Planning) systems are now the backbone of the information systems in public and private sector organisations. Yet difficulties remain. This book provides a unique and comprehensive insight into ERP systems, from both a social and a technical viewpoint. Without trying to

build an artificial consensus, several case studies are commented upon alternatively with a technical and social view, showing how the same facts can have different interpretations.

reports. The guide is presented in four parts: the first part examines the regulations, their enforcement and the concept of due diligence; the second and most detailed part takes the reader through the process of product self evaluation and report compilation; part three deals with the documentation, i.e. how to compile a technical file and how to prepare a declaration of conformity; finally part four explains how to set up factory and production control systems. Electrical Product Safety has been written by a Trading Standards Office (D. Holland) and an experienced Safety Approvals Engineer (J. Tzimenakis). A complete, practical guide to meeting core EU legal requirements Designed for easy application by small and medium companies, not just large technical teams Expertise of an author who has set up a similar system at Sony, and supplies supporting software

Biomass Chars: Elaboration,

Characterization and Applications II - Lionel

Limousy 2019-10-16

Biomass can be converted to energy, biofuels, and bioproducts via thermochemical conversion processes, such as combustion, pyrolysis, and gasification. Combustion technology is most widely applied on an industrial scale. However, biomass gasification and pyrolysis processes are still in the research and development stage. The major products from these processes are syngas, bio-oil, and char (called also biochar for agronomic application). Among these products, biomass chars have received increasing attention for different applications, such as gasification, co-combustion, catalysts or adsorbents precursors, soil amendment, carbon fuel cells, and supercapacitors. This Special Issue provides an overview of biomass char production methods (pyrolysis, hydrothermal carbonization, etc.), characterization techniques (e.g., scanning

Ethnicity and Kinship in North American and European Literatures - Silvia Schultermandl 2021-03-18

This edited collection applies kinship as an analytical concept to better understand the affective economies, discursive practices, and aesthetic dimensions through which cultural narratives of belonging establish a sense of intimacy and affiliation. In North American and European ethnic literatures, kinship has several social functions: negotiating diasporic belonging

in and outside of the perimeters of bloodlines and genealogy; positioning queer-feminist interventions to counter ethno-nationalist narratives of belonging; challenging liberal sentimentalist narratives, such as those grafted onto the bodies of transnational adoptees; re-formulating cultural heterogeneity through interracial and interethnic kinship constellations outside either post-racial assumptions about colorblindness or celebrations of racial and ethnic pluralism. In all of these cases, kinship features as a common theme through which contemporary authors attend to challenges of conscribing individuals into inclusive, counter-hegemonic cultural narratives of belonging.

Kooperation als Strategie technologischen

Paradigmenwechsels - Mathias Knappe 2015-05-13

Mathias Knappe weist nach, dass die nachhaltigkeitsinduzierte Elektrifizierung des automobilen Antriebs existenzielle Gefährdungen für die etablierten Unternehmen der Automobilindustrie birgt, die sich gegenüber ihren Herausforderern explorationsbezogen in einer nachteiligen Ausgangssituation befinden. Dabei identifiziert er das reale Kooperationsniveau in Relation zu den umfangreichen Potenzialen kooperativer Exploration elektrischer Antriebe als gering, volatil und - vor allem in Deutschland - übermäßig intrasektoral fokussiert. Dieses Verhalten geht am überwiegend intersektoralen Potenzial vorbei und lässt die

bisherige Position als Eintrittskarte in einen neuen technologischen Zyklus ungenutzt.

The Ultimate Question 2.0 (Revised and Expanded Edition) - Fred Reichheld
2011-09-20

In the first edition of this landmark book, business loyalty guru Fred Reichheld revealed the question most critical to your company's future: "Would you recommend us to a friend?" By asking customers this question, you identify detractors, who sully your firm's reputation and readily switch to competitors, and promoters, who generate good profits and true, sustainable growth. You also generate a vital metric: your Net Promoter Score. Since the book was first published, Net Promoter has transformed companies, across industries and sectors, constituting a game-changing system and ethos that rivals Six Sigma in its power. In this thoroughly updated and expanded edition, Reichheld, with Bain colleague Rob Markey, explains how

practitioners have built Net Promoter into a full-fledged management system that drives extraordinary financial and competitive results. With his trademark clarity, Reichheld:

- Defines the fundamental concept of Net Promoter, explaining its connection to your company's growth and sustained success
- Presents the closed-loop feedback process and demonstrates its power to energize employees and delight customers
- Shares new and compelling stories of companies that have transformed their performance by putting Net Promoter at the center of their business

Practical and insightful, *The Ultimate Question 2.0* provides a blueprint for long-term growth and success.

Internal Combustion

Engines - Institution of Mechanical Engineers
2014-10-10

This book presents the papers from the Internal Combustion Engines: Performance, fuel economy and emissions held in London, UK. This popular international conference from the Institution of Mechanical Engineers provides a forum for IC engine experts looking closely at developments for personal transport applications, though many of the drivers of change apply to light and heavy duty, on and off highway, transport and other sectors. These are exciting times to be working in the IC

engine field. With the move towards downsizing, advances in FIE and alternative fuels, new engine architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce both CO2 emissions and the dependence on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current improvements in combustion, pollution prevention strategies and data comparisons. presents the latest requirements and challenges for personal transport applications gives an insight into the technical advances and research going

Designing for Automation -

*Screenwriters and
Screenwriting* - C. Batty

2014-07-29

Screenwriters and

Screenwriting is an innovative, fresh and lively book that is useful for both screenwriting practice and academic study. It is international in scope, with case studies and analyses from the US, the UK, Australia, Japan, Ireland and Denmark. The book presents a distinctive collection of chapters from creative academics and critical practitioners that serve one purpose: to put aspects of screenwriting practice into their relevant contexts.

Focusing on how screenplays are written, developed and received, the contributors challenge assumptions of what 'screenwriting studies' might be, and celebrates the role of the screenwriter in the creation of a screenplay. It is intended to be thought provoking and stimulating, with the ultimate aim of inspiring current and future screenwriting practitioners and scholars.
